**CHAPTER 2 TEST BANK**  
**Ethics and Criminal Justice Research**

---

**TRUE/FALSE**

1. Individuals must be allowed to make their own decisions about participation in research.

ANS: T REF: Ethical Issues in Criminal Justice Research

2. Participation as a research subject must always be voluntary.

ANS: F REF: Ethical Issues in Criminal Justice Research

3. Ethical considerations in research are typically quite evident.

ANS: F REF: Ethical Issues in Criminal Justice Research

4. Confidentiality and anonymity mean the same thing, and can be used interchangeably.

ANS: F REF: Ethical Issues in Criminal Justice Research

5. Non-governmental organizations that conduct research involving human subjects need not establish review committees known as institutional review boards.

ANS: F REF: Ethical Issues in Criminal Justice Research

6. As a rule, possible harm to subjects may be justified when the potential benefits of the study outweigh the possible harm.

ANS: T REF: Ethical Issues in Criminal Justice Research

7. The research goal of voluntary participation may be impossible to follow.

ANS: T REF: Ethical Issues in Criminal Justice Research

8. Deception of subjects is never appropriate.

ANS: F REF: Ethical Issues in Criminal Justice Research

9. Harm to research subjects may be justified if the potential benefits of the study outweigh the harm.

ANS: T REF: Ethical Issues in Criminal Justice Research

10. The benefits and burdens of participating in research should be distributed fairly.

ANS: T REF: Ethical Issues in Criminal Justice Research

### **MULTIPLE CHOICE**

1. With respect to harm in the conduct of research, \_\_\_\_.
- only risk of psychological harm is acceptable
  - risk of physical harm is acceptable only when participants are paid enough money to compensate them
  - research with more than minimal risk is no longer permitted
  - criminal justice research may generate special considerations regarding physical harm

ANS: D REF: Ethical Issues in Criminal Justice Research

2. Which example illustrates a research study in which there was potential harm to the researcher?
- Bruce Johnson and associates' research on violence
  - John Monahan's study of heroin users in New York, where participants were gathered by word of mouth among addicts
  - Reuter, MacCoun, and Murphy's study using probation records to identify drug dealers
  - Reuter and associates study of drug addicts

ANS: C REF: Ethical Issues in Criminal Justice Research

3. Which technique works well when interviewing subjects about topics that may be emotionally or psychologically challenging?
- having the researcher ask questions from behind a curtain
  - asking the subject to respond to questions on a laptop computer
  - putting the researcher in a disguise so that the subject does not know their identity
  - putting the subject in a disguise so that they cannot be identified

ANS: B REF: Ethical Issues in Criminal Justice Research

4. When assessing the potential for harm, the researcher should \_\_\_\_.
- proceed only when they are confident that no harm will result
  - proceed only when the harm potential is psychological and not physical
  - never proceed when harm is more than minimally possible
  - proceed when the potential benefit outweighs the potential harm

ANS: D REF: Ethical Issues in Criminal Justice Research

5. The researcher can lessen the potential for harm when doing research by\_\_\_\_\_.
- putting themselves in the line of danger to avoid harm to the participant
  - never telling the subject about the potential of harm
  - using field studies as the main source of research
  - considering which study design to use based on its potential for harm

ANS: D REF: Ethical Issues in Criminal Justice Research

6. When conducting field or survey interviews,\_\_\_\_\_.
- names and addresses should remain on data-collection forms until the research has been published
  - each interviewer should have a copy of the master identification file linking numbers to names
  - only anonymous data collection is considered permissible
  - only legitimate researchers should have access to the master file

ANS: D REF: Ethical Issues in Criminal Justice Research

7. When reporting research findings in professional journals,\_\_\_\_\_.
- negative findings should be omitted
  - technical failures and mistakes should be reported
  - unexpected findings should not be reported.
  - limitations in the research need not be discussed

ANS: B REF: Ethical Issues in Criminal Justice Research

8. Which example would create an ethical dilemma when doing applied research that is evaluative in nature?
- In an attempt to measure the success of a prison pre-release program, the researchers measure re-arrests and re-convictions and determine the programs to be failures.
  - Program staff of a pre-trial diversion program visit the homes of those awaiting trial on a nightly basis to make sure that they adhere to a curfew.
  - Upon review of a juvenile probation department, researchers found that contact sheets, which are designed to keep track of both phone and personal interactions between the officer and the juvenile, in one probation officer's files were all dated June 15<sup>th</sup>.
  - To measure the success of an adult drug treatment facility, researchers offered both the clients and the treatment staff confidentiality.

ANS: C REF: Ethical Issues in Criminal Justice Research

9. Which of the following is a purpose of institutional review boards?
- to evaluate safeguards to protect the welfare of human subjects

- b. to make sure that the data analysis is appropriate and is correctly performed
- c. to determine whether tenure recommendations should be made based on research
- d. to make sure that researchers have enough money for travel

ANS: A REF: Ethical Issues in Criminal Justice Research

10. One of the most important issues addressed by institutional review boards relates to \_\_\_\_\_.

- a. voluntariness of participation
- b. the adequacy of the experimental design
- c. whether funding was received from an appropriate source
- d. the qualifications of the researcher

ANS: A REF: Ethical Issues in Criminal Justice Research

11. The norm of voluntary participation is usually satisfied by\_\_\_\_\_.

- a. compensation for participants
- b. debriefing
- c. informed consent
- d. ensuring confidentiality

ANS: C REF: Ethical Issues in Criminal Justice Research

12. Informed consent\_\_\_\_\_.

- a. allows subjects to weigh the risks and benefits of participating
- b. is not required when results are kept confidential
- c. must disclose the true purpose of the research
- d. is rarely used in criminal justice research

ANS: A REF: Ethical Issues in Criminal Justice Research

13. According to federal regulations, which of the following populations is classified as a “special” population?

- a. public employees
- b. juvenile delinquents
- c. undergraduate students
- d. new parents

ANS: B REF: Ethical Issues in Criminal Justice Research

14. In the U.S., federally designated special populations\_\_\_\_\_.

- a. are exempt from informed consent
- b. cannot be exposed to a greater amount of risk than other populations

- c. must be compensated for research participation
- d. cannot be used in research unless it will directly benefit them

ANS: B REF: Ethical Issues in Criminal Justice Research

15. Which type of research is likely to be exempt from review under federal guidelines?
- a. research involving the analysis of existing data
  - b. research involving only moderate risk
  - c. research in which confidentiality will be protected
  - d. research involving competent adults

ANS: A REF: Ethical Issues in Criminal Justice Research

16. Institutional review boards\_\_\_\_\_.
- a. provide expert advice on how to resolve ethical dilemmas present in some research
  - b. are only necessary when research involves special populations
  - c. can be helpful when a researcher is struggling to publish his or her work
  - d. often assist researchers in applications for funding

ANS: A REF: Ethical Issues in Criminal Justice Research

17. Haney, Banks, and Zimbardo designed a simulated prison to measure\_\_\_\_\_.
- a. the dispositional hypothesis
  - b. the innate predisposition to violence
  - c. the situational hypothesis
  - d. how violent inmates can be subdued

ANS: C REF: Promoting Compliance with Ethical Principles

18. Attempts to guard against harm to the participants in the simulated prison were accomplished by\_\_\_\_\_.
- a. making certain that all participants were psychologically healthy
  - b. having “guards” and “inmates” trade roles every 24 hours
  - c. administering tranquilizers in food and beverages
  - d. telling the participants in advance about all the potential harm

ANS: A REF: Promoting Compliance with Ethical Principles

19. In the Stanford prison study,\_\_\_\_\_.
- a. subjects accepted their roles very readily
  - b. debriefing sessions were held at the conclusion of the project
  - c. participants were allowed to leave the simulation periodically
  - d. inmates were paid more than were guards

ANS: A REF: Promoting Compliance with Ethical Principles

20. Ethical issues raised with the Sanford prison study include\_\_\_\_\_.
- a. promising to pay participants but not doing so
  - b. allowing physical abuse of research subjects
  - c. failure to obtain informed consent
  - d. allowing guards to make up and modify rules

ANS: C REF: Promoting Compliance with Ethical Principles

21. A local university is hosting the Law School Admissions Test (LSAT) for a large group of prospective law students. Since there is such a large group taking the test, some professors of sociology from the local university decide to administer a questionnaire to the group asking their ideas on teenage sexual promiscuity. The professors informed the group about their research project. They assured them that their identity will not be disclosed and all information gathered will remain confidential. Which ethical issue was not considered?
- a. explaining the purpose
  - b. voluntary participation
  - c. anonymity
  - d. confidentiality

ANS: B REF: Ethical Issues in Criminal Justice Research

22. In the U.S., adult prisoners\_\_\_\_\_.
- a. have, historically, been physically harmed by research participation
  - b. must be paid the prison system's typical inmate wage for participation
  - c. cannot participate in research that asks about their criminal history
  - d. can get extra "good time" in exchange for participating

ANS: A REF: Ethical Issues in Criminal Justice Research

23. A group of researchers from an urban university want to employ some target hardening techniques in their area. Which outcome might they expect?
- a. an immediate increase in crime in their area
  - b. a decrease in crime in surrounding areas
  - c. an increase in crime in surrounding areas
  - d. crime rates that remain unchanged

ANS: C REF: Ethical Issues in Criminal Justice Research

24. Which statement best describes the purpose of an institutional review board?
- a. to give guidance on reducing potential harm to subjects
  - b. to determine if the proposed research is worthy of study

- c. to turn violators of ethical principles over to the police
- d. to make it difficult for any social science research to be completed

ANS: A REF: Ethical Issues in Criminal Justice Research

25. Which action is central to voluntary participation?
- a. paying subjects for participating
  - b. ensuring that there is some clear personal benefit for participants
  - c. emphasizing benefits while withholding information on risks
  - d. disclosing research purpose with informed consent

ANS: D REF: Ethical Issues in Criminal Justice Research

26. When it is not possible to match research data to the identities of participants, \_\_\_\_\_ has been achieved.
- a. confidentiality
  - b. the absence of deception
  - c. anonymity
  - d. assurance of voluntary participation

ANS: C REF: Ethical Issues in Criminal Justice Research

27. If a researcher uses only those subjects who volunteer for a study, then which outcome may be expected?
- a. Non-volunteers will feel left out.
  - b. The results may not be generalizable.
  - c. No one would be interested in the outcome.
  - d. Subjects may not like the results.

ANS: B REF: Ethical Issues in Criminal Justice Research

28. Researchers may face legal liability when \_\_\_\_\_.
- a. they make honest mistakes in data analysis
  - b. they become participants in the criminal activity they are observing
  - c. they do not include everyone who wants to participate
  - d. never, since researchers are protected from legal liability

ANS: B REF: Ethical Issues in Criminal Justice Research

29. A promise of anonymity is unlikely to be possible when \_\_\_\_\_.
- a. department of corrections summary data are used
  - b. personal interviews are conducted
  - c. questionnaires do not request identifying information
  - d. research involves observation in open, public settings

ANS: B REF: Ethical Issues in Criminal Justice Research

30. The dictionary definition of the word “ethical” is “conforming to standards of conduct of \_\_\_\_\_.”
- a given profession or group
  - the dominant religious group
  - society as a whole
  - the relevant legal codes

ANS: A REF: Ethical Issues in Criminal Justice Research

### COMPLETION

1. Harm to subjects, researchers, or third parties is possible in \_\_\_\_\_ studies that collect information from or about persons engaged in criminal activity;

ANS: field REF: Ethical Issues in Criminal Justice Research

2. When a professor uses students in her class as research participants, there is a potential for ethical problems in that their participation may not be \_\_\_\_\_.

ANS: voluntary REF: Ethical Issues in Criminal Justice Research

3. If a researcher cannot match a given response to a specific research subject, the research can promise \_\_\_\_\_.

ANS: anonymity REF: Ethical Issues in Criminal Justice Research

4. If a researcher is able to link information with a given person’s identity but promises not to do so publicly, the researcher is promising \_\_\_\_\_.

ANS: confidentiality REF: Ethical Issues in Criminal Justice Research

5. Research involving observations of subjects involved in criminal activities may expose the researcher to \_\_\_\_\_ liability.

ANS: legal REF: Ethical Issues in Criminal Justice Research

6. The two main ways of promoting compliance with ethical principles are \_\_\_\_\_ and \_\_\_\_\_.

ANS: codes of ethics, institutional review boards REF: Ethical Issues in Criminal Justice Research

7. Because of some controversial medical and social science research, the U.S. Department of \_\_\_\_\_ has established regulations designed to protect human subjects.

ANS: Health and Human Services REF: Ethical Issues in Criminal Justice Research

8. The norm of voluntary participation is usually satisfied through \_\_\_\_\_.

ANS: informed consent REF: Ethical Issues in Criminal Justice Research

9. Haney, Banks, and Zimbardo's prison simulation examined whether the prison environment itself creates brutal, dehumanizing conditions unrelated to the kinds of people who live and work in the institutions. The explanation is referred to as a(n) \_\_\_\_\_ hypothesis.

ANS: situational REF: Promoting Compliance with Ethical Principles

10. In order to make sure that there was no long-term damage done to the participants of a simulated prison, the researchers held \_\_\_\_\_ sessions with "prisoners" and "guards" after the termination of the project.

ANS: debriefing REF: Promoting Compliance with Ethical Principles

## **ESSAY**

1. Give an example using research discussed in class of the difference between anonymity and confidentiality. Be specific with your example.

REF: Ethical Issues in Criminal Justice Research

2. When the term "informed consent" is used in criminal justice research, it refers to some very specific ethical concerns. Discuss what is meant by "informed consent" and why it is important when engaging in research.

REF: Ethical Issues in Criminal Justice Research

3. Researchers strive to do no harm to their subjects. Identify what type of harm may occur to subjects and use specific examples to illustrate the potential harm. Include in your answer whether harm is ever appropriate when completing research in criminal justice.

REF: Ethical Issues in Criminal Justice Research

4. There are certain classes of subjects that require special treatment by the researcher. Identify at least two of those classes and discuss why they constitute a special class. What specific steps should be taken when dealing with these special classes?

REF: Ethical Issues in Criminal Justice Research

5. Discuss the role of institutional review boards in the research process. In what ways do they influence research and what is their specific purpose? Give an example of a situation that would not be approved by an institutional review board and how the researcher could rectify that situation.

REF: Promoting Compliance with Ethical Principles
