## Chapter 2 The Environment of Business

### 2.1 Multiple-Choice Questions

- 1) In terms of organizational boundaries and environments, which is correct?
- A) Large business firms are heavily influenced by events in the external environment, but small business firms are much less influenced.
  - B) No single firm can control the environment.
  - C) Most organizations have a single environment, but some have multiple environments they must cope with.
  - D) The major elements of the external environment are marketing, finance, production, and human resources.
  - E) The most important features of the external environment are the political and social aspects.

Answer: B

Diff: 2 Type: MC Page Ref: 25-26

Skill: Comprehension

Objective: 2.1

- 2) Distributors who are in a grocery store restocking shelves are normally considered part of the \_\_\_\_\_ rather than the \_\_\_\_\_.

- A) environment; culture
- B) organization; environment
- C) culture; store
- D) environment; organization
- E) none of these are correct

Answer: D

Diff: 2 Type: MC Page Ref: 25

Skill: Comprehension

Objective: 2.1

3) A(n)\_\_\_\_\_separates the organization from its environment.

A) organizational boundary

B) process boundary

C) enterprise resource

D) aggregate output

E) integration

Answer: A

Skill: Knowledge  
Objective: 2.1

- 4) How might low inflation levels in the general economy affect a company like McDonald's?
- A) McDonald's will pay much higher prices for supplies and will charge customers more for its products.
  - B) McDonald's will pay higher prices for supplies and will charge customers more for its products.
  - C) McDonald's will pay relatively constant prices for supplies, but will be unable to increase the price paid by customers.
  - D) McDonald's will pay relatively constant prices for supplies and will charge customers more for its products.
  - E) McDonald's will pay higher prices for supplies, but will be unable to increase the price paid by customers.

Answer: C

Diff: 3 Type: MC Page Ref: 26

Skill: Comprehension

Objective: 2.2

- 5) Agriculture efficiency has resulted in
- A) Canadians contributing more resources to farms.
  - B) an increase in the number of people employed in the industry.
  - C) Canadians needing more farms.
  - D) a decrease in the number of people employed in the industry.
  - E) none of these.

Answer: B

Diff: 2 Type: MC Page Ref: 27

Skill: Comprehension

Objective: 2.2

- 6) Since the increase in the unemployment level in a small Atlantic Canadian town, retailers have noticed that sales have decreased. The retailers are being affected by which element of the external environment?
- A) Socio-cultural
  - B) Economic
  - C) Environmental
  - D) Global
  - E) Political-legal

Answer: B

Diff: 2 Type: MC Page Ref: 27

Skill: Comprehension

Objective: 2.2

7) At one time, about \_\_\_\_\_ of the population of Canada was involved in producing the food that we needed; today less than \_\_\_\_\_ percent of the population works in agriculture.

- A) half; 0.5
- B) half; 2.5
- C) one-third; 5
- D) three-quarters; 2.5
- E) four-fifths; 3

Answer: B

Diff: 3 Type: MC Page Ref: 27

Skill: Knowledge

Objective: 2.2

8) Agricultural production has \_\_\_\_\_ because \_\_\_\_\_.

- A) grown; we have increased total output in that sector
- B) increased; Canada imports more agricultural products
- C) declined; fewer Canadians are working in agriculture
- D) remained unchanged; there have been relatively few changes in agricultural technology
- E) increased; more people are involved in farming

Answer: A

Diff: 2 Type: MC Page Ref: 27

Skill: Comprehension

Objective: 2.2

9) The main measure of growth in an economic system is

- A) the business cycle.
- B) standard of living.
- C) gross national product.
- D) gross domestic product.
- E) aggregate output.

Answer: E

Diff: 1 Type: MC Page Ref: 27

Skill: Knowledge

Objective: 2.2

10) Which is the *best* explanation for why standard of living only increases through productivity?

- A) The more goods that are available, the lower prices will be.
- B) More goods are available without having to come by additional resources.
- C) Productivity increases the money supply in an economy.
- D) Purchasing power increases when there is more consumer choice.
- E) Prices are determined by the standard of living.

Answer: B

Diff: 1 Type: MC Page Ref: 27

Skill: Knowledge

Objective: 2.2

11) Which of the following *best* defines the term *aggregate output*?

- A) The total quantity and quality of goods and services that a country's citizens can purchase with the currency used in their economic system
- B) The measure of economic growth that compares how much a system produces with the resources needed to produce it
- C) The pattern of short-term ups and downs in an economy
- D) The total quantity of goods and services produced by an economic system during a given period
- E) The conditions of the economic system in which an organization operates

Answer: D

Diff: 2 Type: MC Page Ref: 27

Skill: Comprehension

Objective: 2.2

12) \_\_\_\_\_ refers to the total quality and quantity of goods and services that a country's citizens can purchase with the currency used in their economic system.

- A) Aggregate output
- B) The national debt
- C) Standard of living
- D) The business cycle
- E) The consumer price index

Answer: C

Diff: 1 Type: MC Page Ref: 27

Skill: Knowledge

13) Which of the following *best* defines the term *business cycle*?

- A) The conditions of the economic system in which an organization operates
- B) The pattern of short-term ups and downs in an economy
- C) The total quantity of goods and services produced by an economic system during a given period
- D) The measure of economic growth that compares how much a system produces with the resources needed to produce it
- E) The total quantity and quality of goods and services that a country's citizens can purchase with the currency used in their economic system

Answer: B

Diff: 2 Type: MC Page Ref: 28

Skill: Comprehension

Objective: 2.2

14) Which of the following is correct with regard to the business cycle?

- A) Due to better government management of the economic environment, the business cycle has become less volatile in recent decades.
- B) A depression occurs when the trough of the business cycle extends five or more years.
- C) There are no recognizable short-term phases in the business cycle; rather, the cycle can only be recognized as a long-term phenomenon.
- D) A recession is usually defined as two consecutive quarters when the economy shrinks.
- E) All of these are correct.

Answer: D

Diff: 2 Type: MC Page Ref: 28

Skill: Comprehension

Objective: 2.2

15) Sales had been low at Stephen's Home Office Supplies for several months, but then business starting picking up again. Stephen's business went through which two phases of the business cycle?

- A) Recession and trough
- B) Peak and recession
- C) Trough and recovery
- D) Recovery and peak
- E) Any of these answers could be correct.

Answer: C

Diff: 2 Type: MC Page Ref: 28

Skill: Comprehension

Objective: 2.2

16) Which statement is *true* with regard to the standard of living?

- A) It is dependent on the size of the city in which one lives.
- B) It is comparable for every citizen in every country.
- C) It is the amount and quality of goods and services that people can buy with their money.
- D) It is improved when high-end stores stock expensive merchandise.
- E) It is unaffected by business productivity.

Answer: C

Diff: 2 Type: MC Page Ref: 27

Skill: Knowledge

Objective: 2.2

17) Which of the following would *not* likely be a consequence of a recession?

- A) Aggregate output declines.
- B) Producers will hire more employees.
- C) Unemployment will increase.
- D) Less labour will be needed to produce products.
- E) GDP will decrease.

Answer: B

Diff: 2 Type: MC Page Ref: 28

Skill: Comprehension

Objective: 2.2

- 18) Which of the following *best* gives the meaning of the term *gross national product*?
- A) Total quantity of goods and services produced by an economic system
  - B) Total quantity of goods and services produced within a given period by a national economy, not including foreign production
  - C) Total value of all goods and services produced within a given period by a national economy through domestic factors of production
  - D) Total value of all goods and services produced within a given period regardless of where the factors of production are located
  - E) Total value of all goods and services that are exported

Answer: D

Diff: 2 Type: MC Page Ref: 28

Skill: Comprehension

Objective: 2.2

- 19) Which of the following *best* describes the term *gross domestic product*?
- A) Total quantity and quality of goods and services that a country's citizens can purchase with the currency used in their economic system
  - B) Conditions of the economic system in which an organization operates
  - C) The total value of all goods and services produced within a given period by a national economy through domestic factors of production
  - D) The total value of all goods and services produced by a national economy within a given period regardless of where the factors of production are located
  - E) The total quantity of goods and services produced by an economic system

Answer: C

## 2.2 Critical Thinking Questions

1) Flavour Foods runs The Hungry Cow, a chain of fast food restaurants located all over the country. The chain has a loyal customer base and is well-known for its signature dishes like the Big Bite Burger, Springy Fries, and the Orange Float. The company is faced with a critical decision: Should it expand its operations into China?

Which of the following, if true, would strengthen the argument for competing in the Chinese market?

- A) Changes in exchange rates can affect the value of sales made in different countries.
- B) Even global brands typically choose to tailor their offerings according to the tastes of consumers in different countries.
- C) The Big Bite Burger has a higher selling price than other items on The Hungry Cow's menu, but it is not the most profitable item because of the cost of its ingredients.
- D) The Hungry Cow's research indicates that reaching new customers in domestic markets will be more expensive than doing so in emerging markets.
- E) Chinese companies tend not to pursue the franchise option when attempting to expand into other countries.

Answer: D

Diff: 3 Type: MC

Skill: Analysis

2) Flavour Foods runs The Hungry Cow, a chain of fast food restaurants located all over the country. The chain has a loyal customer base and is well-known for its signature dishes like the Big Bite Burger, Springy Fries, and the Orange Float. The company is faced with a critical decision: Should it expand its operations into China?

Which of the following, if true, would weaken the argument for competing in the Chinese market?

- A) An American fast food chain found that the time to recoup its investments in China was greater under the franchise model as opposed to the corporate chain store model.
- B) Chinese government policies can impose lengthy delays on businesses seeking food sale licenses.
- C) Studies show that modern Chinese consumers are more likely than previous generations to dine outside the home.
- D) When choosing a restaurant, Chinese consumers seek benefits beyond simple food quality.
- E) Expanding into every market within China would require more resources than The Hungry Cow has at its disposal.

Answer: B

Diff: 3 Type: MC

Skill: Analysis

3) In the past, only India's elite could afford to buy a car. But recent dramatic changes in India's economy have produced a growing middle class and rapidly rising incomes. Now, to meet the new demand, established automakers are introducing smaller, more affordable vehicles into India. But they will have to find a way to compete with India's Tata Motors, which has unveiled the least expensive car ever in this market, the Tata Nano. The Nano sells for only 100 000 rupees (about US\$2200). It seats four passengers, gets 50 miles per gallon, and travels at a top speed of 60 miles per hour.

Based on the information above, Tata most likely believed that as a result of recent changes in India's economy, what would be true of a growing number of Indian consumers?

- A) They had become even more cost-conscious than ever before.
- B) They would be willing and able to spend 100 000 rupees on a car.
- C) They would choose a vehicle with high fuel efficiency primarily because of concern about the natural environment.
- D) They will eventually prefer models similar to those currently available in the United States and Europe.
- E) They will place a higher value on car safety than fuel economy.

4) The economy in the African nation Sponeto has been stagnant for a long time. The government and central bank of Sponeto have been considering options for what can be done to help stimulate investment and growth in the economy.

The Sponeto national bank advocates increasing the money supply to encourage investment within the country. Which of the following, if true, would strengthen the case that this will cause inflation?

- A) Jobs will be created.
- B) Banks will lower interest rates.
- C) Wages will decrease.
- D) Foreign investment will be discouraged.
- E) Only low-technology sectors will benefit.

Answer: B

Diff: 3 Type: MC

Skill: Analysis

5) The economy in the African nation Sponeto has been stagnant for a long time. The government and central bank of Sponeto have been considering options for what can be done to help stimulate investment and growth in the economy.

Many in the Sponeto government agree that increasing the money supply to the nation's economy would be of significant help to the country. The national bank's reserve, however, is short on the funds needed, and suggests asking for them from the International Monetary Fund (IMF). Which of the following, if true, would strengthen the case for this course of action?

- A) The IMF has been known to force donor countries to drop tariffs put in place to protect domestic industries.
- B) The IMF has been known to force donor countries to privatize national companies.
- C) The IMF contributes money as well as financial advice to help countries with economies suffering from balance-of-payment problems.
- D) IMF loans typically come with many conditions attached that may result in increased poverty in the donor country.
- E) A number of developing countries have suffered financial disasters from following IMF advice.

Answer: C

6) The economy in the African nation Sponeto has been stagnant for a long time. The government and central bank of Sponeto have been considering options for what can be done to help stimulate investment and growth in the economy.

Some in the Sponeto government would like the country to appeal to the World Bank for funding toward economic development, rather than short-term monetary stimulation. Which of the following, if true, would strengthen the case for this course of action?

- A) Sponeto has come under criticism in the United Nations for alleged human rights abuses.
- B) Sponeto has been able to grow enough food to export to surrounding nations.
- C) Corruption is a major problem among Sponeto's government officials.
- D) Sponeto urgently needs humanitarian aid due to a recent natural disaster.
- E) Chronic and widespread poverty is Sponeto's biggest economic problem.

7) Marquand says: Information technology has had its biggest impact on business in communication and access to data. With the networking and streamlined communication modalities now available to businesses, businesses can collaborate with each other as well as within a business at different locations with the greatest of ease. Businesses also have access to a greater range of information and at a greater speed than ever before. And with this information being constantly updated, businesses now have the ability to plan in response to market conditions with much greater efficiency than before.

Stevenson responds: Information is important, but what's most important is how that information is used. And there is no more direct way that information technology has helped businesses than the ability to sell directly. Selling online has opened up entirely new markets that allow businesses to make greater profits, with greater efficiency, than ever before. Many businesses, such as Amazon, have been able to use online selling exclusively to dramatic effect: without having to spend money on bricks-and-mortar storefronts, they can make billions in profits selling products at low prices.

Which of the following is at issue between Marquand and Stevenson?

- A) Whether online selling is an important factor in business today
- B) Whether information technology has made a significant difference to businesses
- C) Whether doing business is significantly helped by online communications
- D) What the most important effect of information technology has been on business
- E) What has changed in business since the advent of the latest information technology

Answer: D

Diff: 3 Type: MC

## 2.5 Essay Questions

1) How does the external environment affect business?

Answer: All businesses operate within the context of a larger external environment. The external environment consists of everything outside a business's boundaries that might affect it. The domestic business environment refers to the environment in which a firm operates, conducting operations and generating revenues. The global business environment includes the international forces affecting a business. The technological environment refers to human knowledge, work methods, physical equipment, electronics and telecommunications, and various processing systems used to conduct a business. The relationship between business and government describes the political-legal environment. The sociocultural environment includes the customs, mores, values, and demographic characteristics of the society in which a business conducts operations. Finally, the economic environment refers to the economic conditions which exist in the economic system in which a company operates.

Objective: 2.1

2) List and briefly describe each of the organizational environments that affect businesses.

Answer: The environments are (1) *economic* (the condition of the economic system in which the company operates), (2) *technological* (changes in the way that businesses create value for their customers), (3) *political-legal* (the relationship between businesses and government), (4) *socio-cultural* (the customs, values, attitudes, and demographics of the society in which a company operates), and (5) *business* (the complex, demanding, and ever-changing set of circumstances in which businesses try to differentiate themselves from their competitors).

Objective: 2.1

3) How might an economic environment characterized by moderate unemployment and low inflation affect a McDonald's restaurant?

Answer: Moderate unemployment will result in most people being able to afford to eat out, but it also means that McDonald's must pay higher wages to attract employees. Low inflation will result in McDonald's paying relatively constant prices for its supplies, but it also means that McDonald's will be constrained from increasing the prices it charges.

4) How does GNP differ from GDP? Give an example of a product that would be included in Canada's GNP, but not its GDP.

Answer: A nation's gross national product (GNP) measures the total value of all goods and services produced by its economy within a given period of time, regardless of where the factors of production are located. A nation's gross domestic product (GDP) measures the total value of all goods and services produced within a given period by a national economy through domestic factors of production. The profits earned by a Canadian-owned automobile plant operating in Brazil would be included in Canadian GNP, but not GDP.

Objective: 2.2

5) How does the national debt affect economic growth?

Answer: A country's national debt is the amount of money that the government owes its creditors. The government raises money through taxes and the sale of bonds. By selling bonds, the government competes with other potential borrowers for the available supply of loanable money. The more the government borrows, the less money is available for the private borrowing and investment that increases productivity.

Skill: Comprehension

Objective: 2.2

6) Explain the relationship between productivity and the standard of living.

Answer: Standard of living refers to the total quantity and quality of goods and services that people can purchase with the currency used by their economic system. Productivity is a measure of economic growth that compares how much a system produces with the resources needed to produce it. Standard of living improves only through increases in productivity.

7) What are the pros and cons of prolonged economic stability?

Answer: Pros: Balance, wages constant, low inflation, predictability, stable interest rates

Cons: Possible stagnation, less innovation, decreasing efficiency, job loss, slowed economy, high unemployment

8) New Vermont underwent a recession two years ago. How might New Vermont's aggregate output have been affected?

Answer: A recession is defined as a period during which aggregate output, as measured by GDP, declines. Therefore, New Vermont's aggregate output would have declined.

Skill: Comprehension

Objective: 2.2

9) What is inflation and how does it threaten economic stability?

Answer: Inflation occurs when there are widespread price increases throughout an economic system. During periods of inflation, the amount of money injected into an economy outstrips the increase in actual output. When this happens, people will have more money to spend, but there will still be the same quantity of products available for them to buy. As they compete with one another to buy available products, prices go up. Higher prices erase the increase in the amount of money injected into the economy and purchasing power declines.

10) How might the productivity of a company that is located in an island nation (e.g., Madagascar) be negatively affected?

Answer: Productivity is the measure of economic growth that compares how much a system produces with the resources needed to produce it. Because Madagascar's location may result in a less-than-optimum efficiency of imports and exports, manufacturers located there may be more dependent on local materials, which may not facilitate the highest levels of productivity.

Objective: 2.2

12) What is unemployment? How does low unemployment threaten economic stability?

Answer: Unemployment is the joblessness of people actively seeking work in an economic system. While low unemployment might seem to be positive, it can threaten economic stability. When unemployment is low, there is a shortage of labour available for businesses to hire. As businesses compete with one another for the available supply of labour, businesses raise the wages that they are willing to pay. Because higher wages cut into profit margins, companies raise the prices of their products. While the increase in pay results in consumers having more money to spend, high prices offset any gain and purchasing power declines.

13) How is the effectiveness of the government's attempts to manage Canada's economy measured? Briefly explain each tool.

Answer:

- GDP: value of all goods and services produced *in* a country
- GNP: value of all goods and services produced *by* a country
- Productivity: a measure of efficiency
- Standard of living: a measure of a society's economic well-being
- Balance of trade: exports minus imports.

15) List and discuss the four different types of unemployment, using examples to demonstrate the different types.

Answer: (1) Frictional unemployment (people are unemployed while they search for a new job), (2) seasonal unemployment (people are unemployed because of the seasonal nature of their work), (3) cyclical unemployment (people are unemployed because of a downturn in the business cycle), and (4) structural unemployment (people are unemployed because they do not have the specific skills the market requires). For example, farm workers may be out of work during the winter because there are no crops to harvest (seasonal unemployment). Computer workers may be unemployed because they do not have certain software or hardware skills that the market demands (structural unemployment). Some people are unemployed because they have quit their current job because they were dissatisfied with it, but they haven't yet found another job (frictional unemployment). Some people are unemployed because they have been laid off from their job because of a downturn in the business cycle (cyclical unemployment).

16) Why should companies always be on the lookout for technological breakthroughs?

Answer: There are two good reasons. First, technological breakthroughs might allow a company to develop new products to supplement its current product offerings. The new product may well contribute to increased profits. Second, a technological breakthrough may make one or more of a company's current product line obsolete and threaten its very survival.

Objective: 2.3

17) Why is it important for businesses to be aware of trends in the political/legal environment?  
Answer: There are several reasons why it is important for businesses to be aware of trends in the political-legal environment. First, the legal system defines in part what an organization can and can't do. Various government agencies regulate important areas such as advertising practices, safety and health considerations, and acceptable standards of business conduct. Periods of pro-business sentiment may result in less regulation, while periods of anti-business sentiment may result in greater restriction in competitive activities. Finally, political stability is also an important consideration, especially for international firms.

Objective: 2.4

18) Why is the socio-cultural environment important for business firms?

Answer: It is important because the values, attitudes, tastes, customs, and demographic characteristics of a society strongly influence what products or services a company can profitably sell to consumers. For example, failure to accurately assess consumer tastes will lead to poor sales and reduced profitability. Unethical behaviour by a company's managers will lead to a poor public image for the company and may very well result in decreased sales and profits.

Objective: 2.5

19) How is Porter's five forces model useful?

Answer: Porter's model helps managers analyze the competitive situation in their industry and then decide what their competitive strategy should be. Using the model requires assessment of five elements: rivalry among existing competitors (intensity and type varies across industries), the threat of potential new entrants (new competitors can cause big changes in an industry), the amount of bargaining power that suppliers have (the greater the number of suppliers, the less their individual bargaining power), the amount of bargaining power that buyers have (the fewer the number of buyers, the more their bargaining power), and product substitutes (if there are many substitute products, the industry is more competitive).

20) What is *outsourcing*? Give an example of outsourcing.

Answer: Outsourcing is the strategy of paying suppliers and distributors to perform certain business processes or to provide needed materials and services. A large bank might outsource an ancillary service such as food service. Other firms outsource payroll, training, and research and development functions.

Skill: Comprehension

Objective: 2.6

23) Why is business process management important?

Answer: It is important because it requires a business to ask a very fundamental question: What must we do well to stay in business? To answer that question, a business must identify the major processes that must be performed well, and then organize resources and skills around those essential processes. This leads to faster decision making and a stronger customer orientation.

Skill: Comprehension

Objective: 2.7

25) How does a *poison pill* work?

Answer: A poison pill is a defence used to make a firm less attractive to an actual or potential hostile suitor in a takeover attempt. The objective is to make the "pill" so distasteful that the potential acquirer will not want to swallow it. For example, BCE allowed its shareholders to purchase BCE stock at a 50 percent discount if another organization announced its intention to purchase 20 percent or more of BCE.
