Chapter 2 – Cryptographic Tools

TRUE/FALSE QUESTIONS:

- | | | |
|---|---|---|
| T | F | 1.Symmetric encryption is used primarily to provide confidentiality. |
| T | F | 2. Two of the most important applications of public-key encryption are digital signatures and key management. |
| T | F | 3. Cryptanalytic attacks try every possible key on a piece of ciphertext until an intelligible translation into plaintext is obtained. |
| T | F | 4.The secret key is input to the encryption algorithm. |
| T | F | 5.Triple DES takes a plaintext block of 64 bits and a key of 56 bits to produce a ciphertext block of 64 bits. |
| T | F | 6. Modes of operation are the alternative techniques that have been developed to increase the security of symmetric block encryption for large sequences of data. |
| T | F | 7. The advantage of a stream cipher is that you can reuse keys. |
| T | F | 8. A message authentication code is a small block of data generated by a secret key and appended to a message. |
| T | F | 9.Like the MAC, a hash function also takes a secret key as input. |
| T | F | 10.The strength of a hash function against brute-force attacks depends solely on the length of the hash code produced by the algorithm. |

11. Transmitted data stored locally are referred to as_____.
- A. ciphertext B. DES
C. data at rest D. ECC
12. Digital signatures and key management are the two most important applications of _____ encryption.
- A. private-key B. public-key
C. preimage resistant D. advanced
13. A_____is to try every possible key on a piece of ciphertext until an intelligible translation into plaintext is obtained.
- A. mode of operation B. hash function
C. cryptanalysis D. brute-force attack
14. Combined one byte at a time with the plaintext stream using the XOR operation, a _____is the output of the pseudorandom bit generator.
- A. keystream B. digital signature
C. secure hash D. message authentication code
15. A_____protects against an attack in which one party generates a message for another party to sign.
- A. data authenticator B. strong hash function
C. weak hash function D. digital signature

SHORT ANSWER QUESTIONS:

1. Also referred to as single-key encryption, the universal technique for providing confidentiality for transmitted or stored data is_____.
2. There are two general approaches to attacking a symmetric encryption scheme: cryptanalytic attacks and_____attacks.
3. The_____algorithm takes the ciphertext and the secret key and produces the original plaintext.

4. A _____ attack exploits the characteristics of the algorithm to attempt to deduce a specific plaintext or to deduce the key being used.
5. A _____ processes the plaintext input in fixed-size blocks and produces a block of ciphertext of equal size for each plaintext block.
6. A _____ processes the input elements continuously, producing output one element at a time.
7. Public-key encryption was first publicly proposed by _____ in 1976.
8. The two criteria used to validate that a sequence of numbers is random are independence and _____.
9. A _____ is a hardware device that sits between servers and storage systems and encrypts all data going from the server to the storage system and decrypts data going in the opposite direction.
10. In July 1998 the _____ announced that it had broken a DES encryption using a special purpose “DES cracker” machine.
11. The simplest approach to multiple block encryption is known as _____ mode, in which plaintext is handled b bits at a time and each block of plaintext is encrypted using the same key.
12. A _____ stream is one that is unpredictable without knowledge of the input key and which has an apparently random character.
13. The _____ is a pair of keys that have been selected so that if one is used for encryption, the other is used for decryption.
14. _____ is provided by means of a co-processor board embedded in the tape drive and tape library hardware.
15. The purpose of the _____ algorithm is to enable two users to securely reach agreement about a shared secret that can be used as a secret key for subsequent symmetric encryption of messages.
