## ***Financial Management: Core Concepts, 3e (Brooks)*** **Chapter 2 Financial Statements**

### 2.1 Financial Statements

1) The purpose of studying financial statements is\_\_\_\_\_.

- A) to mechanically build portfolio analysis
- B) to understand those portions of the statements that have relevance for financial decision making
- C) to primarily investigate all portions of the statements that have relevance for dividend policy
- D) to mechanically learn how to read and understand footnotes

Answer: B

Explanation: B) Accounting and finance view the numbers in DIFFERENT WAYS.

Diff: 1

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

Hmwrk Questions: \* Taken from "Prepping for Exams" questions at the end of the chapter.

2) Which of the statements below is FALSE?

- A) The purpose of studying financial statements is to understand those portions of the statements that have relevance for financial decision making.
- B) We need to understand how to interpret and use the information presented in financial statements to form a picture of the financial profile of the firm.
- C) Accounting, it has been said, looks back to where a company has been—somewhat like looking through a rear view mirror.
- D) Accounting and finance view the numbers in the same way.

Answer: D

Explanation: D) Accounting and finance view the numbers in DIFFERENT WAYS.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

3) Understanding the sources and uses of cash in the recent past will enable a manager to\_\_\_\_\_the cash flow for a potential project of the firm.

- A) determine with perfect precision
- B) forecast with perfect precision
- C) predict more accurately
- D) know today

Answer: C

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

Hmwrk Questions: \* Taken from "Prepping for Exams" questions at the end of the chapter.

4) The fundamental starting point of all the accounting statements is the\_\_\_\_\_.

- A) accounting identity
- B) computing identity
- C) investing identity
- D) financing identity

Answer: A

Diff: 1

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

5) Which of the statements below is TRUE?

- A) Accounting Identity is: Assets = Liabilities - Owners' Equity.
- B) Accounting Identity is: Assets = Liabilities + Owners' Equity.
- C) Accounting Identity is: Assets = Owners' Equity - Liabilities.
- D) Accounting Identity is: Liabilities = Assets + Owners' Equity.

Answer: B

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

6) There are four primary financial statements that are used to measure the performance of a firm. Which of the choices below are included among these four?

- A) The balance statement and income statement
- B) The income sheet and statement of retained earnings
- C) The statement of cash flows and statement of balance
- D) The balance sheet and statement of cash flows

Answer: D

Explanation: D) There are four primary financial statements that are used to measure the performance of a firm: the *income statement*, the *balance sheet*, the *statement of retained earnings*, and the *statement of cash flows* (also known as *sources and uses of cash*). Together, these four financial statements contain much of the essential historical information about the performance and management choices of a firm.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

7) It is important to remember that the fundamental\_\_\_\_\_of accounting is the debit and credit recording activity where debits always equal credits.

- A) effect
- B) end product
- C) outcome
- D) identity

Answer: D

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

Hmwrk Questions: \* Taken from "Prepping for Exams" questions at the end of the chapter.

8) It is important to remember that the fundamental identity of accounting is the debit and credit recording activity where debits \_\_\_\_\_ equal credits.

- A) never
- B) seldom
- C) sometimes
- D) always

Answer: D

Diff: 1

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

9) Which of the statements below is FALSE?

- A) The income statement summarizes and categorizes a company's revenues and expenses for that period.
- B) Typically, income statements are prepared quarterly and annually for distribution outside the company, but usually monthly for internal managers.
- C) The income statement begins with revenue and subtracts various operating expenses until arriving at Earnings Before Interest and Taxes (EBIT).
- D) The balance sheet reports the performance of the firm over the past period. It summarizes and categorizes a company's revenues and expenses for that period.

Answer: D

Explanation: D) The income statement reports the performance of the firm over the past period. It summarizes and categorizes a company's revenues and expenses for that period.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

10) Which of the below statements is FALSE?

- A) Typically, income statements are prepared quarterly and annually for distribution outside the company, but usually semiannually for internal managers.
- B) Typically, income statements are prepared quarterly and annually for distribution outside the company.
- C) The income statement begins with revenue and subtracts various operating expenses until arriving at Earnings Before Interest and Taxes (EBIT).
- D) The income statement reports the performance of the firm over the past period. It summarizes and categorizes a company's revenues and expenses for that period.

Answer: A

Explanation: A) Typically, income statements are prepared quarterly and annually for distribution outside the company, but usually MONTHLY for internal managers.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

11) The income statement begins with revenue and subtracts various operating expenses until arriving at the intermediate point of \_\_\_\_\_.

- A) earnings after taxes
- B) net income
- C) taxable income
- D) EBIT

Answer: D

Explanation: D) The income statement begins with revenue and subtracts various operating expenses until arriving at Earnings Before Interest and Taxes (EBIT). Next, interest expense is subtracted to find the taxable income for the period. Then the appropriate taxes are calculated and subtracted. We finally arrive at the net income, the so-called bottom line of the income statement.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

Hmwrk Questions: \* Taken from "Prepping for Exams" questions at the end of the chapter.

12) The income statement begins with revenue and subtracts various operating expenses until arriving at Earnings Before Interest and Taxes. Next, interest expense is subtracted to find the \_\_\_\_\_ for the period.

- A) EBIT
- B) after-tax income
- C) net income
- D) taxable income

Answer: D

Explanation: D) The income statement begins with revenue and subtracts various operating expenses until arriving at Earnings Before Interest and Taxes (EBIT). Next, interest expense is subtracted to find the taxable income for the period. Then the appropriate taxes are calculated and subtracted. We finally arrive at the net income, the so-called bottom line of the income statement.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

13) The income statement begins with revenue and subtracts various operating expenses until arriving at Earnings Before Interest and Taxes. Next, interest expense is subtracted to find the taxable income for the period. Then the appropriate taxes are calculated and subtracted. We finally arrive at the \_\_\_\_\_, the so-called bottom line of the income statement.

- A) after-tax income
- B) before-tax income
- C) net income
- D) EBIT

Answer: C

Explanation: C) The income statement begins with revenue and subtracts various operating expenses until arriving at Earnings Before Interest and Taxes (EBIT). Next, interest expense is subtracted to find the taxable income for the period. Then the appropriate taxes are calculated and subtracted. We finally arrive at the net income, the so-called bottom line of the income statement.

Diff: 1

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

14) Net income is \_\_\_\_\_.

- A) not cash flow
- B) the cash flow from the operations of the company during the period
- C) the increase or decrease in cash flow for the period
- D) earnings before interest and taxes

Answer: A

Explanation: A) Net income is not cash flow. Net income is the ACCOUNTING PROFIT from the operations of the company during the period. Cash flow is the increase or decrease in CASH for the period.

Diff: 3

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

15) Net income is \_\_\_\_\_.

- A) the accounting profit from the operations of the company during the period
- B) cash flow
- C) the accounting profit from the non-operating assets of the company during the period
- D) always equal to the dividends paid to shareholders

Answer: A

Explanation: A) Net income is not cash flow. Net income is the accounting profits from the OPERATIONS of the company during the period. Cash flow is the increase or decrease in cash for the period.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

16) Cash flow is\_\_\_\_\_.

- A) the increase but not decrease in cash for the period
- B) the decrease but not increase in cash for the period
- C) the increase or decrease in cash for the period
- D) the net income for the period

Answer: C

Explanation: C) Net income is the accounting profits from the operations of the company during the period and thus would not typically be the cash flow (except by coincidence). Cash flow can be positive or negative and thus is the increase or decrease in cash for the period.

Diff: 1

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

17) One of the key components to making financial decisions is to\_\_\_\_\_.

- A) understand the timing and amount of dividends
- B) understand the timing and amount of cash flow
- C) understand the timing of EBIT
- D) understand the amount of net income

Answer: B

Explanation: B) One of the key components to making financial decisions is to understand the timing and amount of cash flow. Dividends, EBIT, and net income are not synonymous with the firm's cash flow for any particular period.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

18) Which of the statements below is FALSE?

- A) The textbook uses the framework of the income statement to find the operating income of the company (an accounting measure) and then makes adjustments to find the true cash flow from operations.
- B) In accrual-based accounting, revenue is recorded at the time of sale if the revenue has been received in cash.
- C) Three fundamental issues separate net income and cash flow: accrual-based accounting, noncash expense items, and interest expense.
- D) Generally Accepted Accounting Principles (GAAP) in the United States allow the use of accrual accounting to record revenue.

Answer: B

Explanation: B) In accrual-based accounting, revenue is recorded at the time of sale WHETHER OR NOT the revenue has been received in cash.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

19) Three fundamental issues separate net income and cash flow. Which of the answers below is NOT one of these three fundamental issues?

- A) Accrual accounting
- B) Noncash accounting
- C) Noncash expense items
- D) Interest expense

Answer: B

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

20) Which of the following statements is true?

- A) The finance manager uses the framework of the income statement to find the operating income of the company (an accounting measure), which is also the true cash flow from operations.
- B) In accrual-based accounting, revenue is recorded at the time of sale if the revenue has been received in cash.
- C) Three fundamental issues separate net income and cash flow: accrual-based accounting, noncash expense items, and interest expense.
- D) Generally accepted accounting principles (GAAP) in the United States do not allow the use of accrual-based accounting to record revenue.

Answer: C

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

Hmwrk Questions: \* Taken from "Prepping for Exams" questions at the end of the chapter.

21) In finance, we separate operating decisions from financing decisions and thus exclude \_\_\_\_\_ as a part of operating income from the income statement.

- A) cash flow
- B) dividends
- C) interest expense
- D) earnings

Answer: C

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

22) Which of the following statements is FALSE?

- A) The income statement is put together at a specific point in time (end of a business quarter, or business year) and so the sale could be in one period and the cash received in another period.
- B) The income statement contains the set of expenses associated with the products or services sold during the current operating period, with those expenses not associated with current cash flow labeled as non-cash expense items.
- C) In almost all circumstances depreciation is a current expense of a cash outflow in the current period.
- D) Companies depreciate fixed assets (such as office furniture, equipment, machinery, and buildings) over an assigned time period, but the initial cash outlay for the fixed asset typically occurs at the time the asset is acquired by the firm.

Answer: C

Explanation: C) Depreciation is a typically a current expense of a cash outflow from A PREVIOUS period. However, MACRS depreciation allows a half-year of depreciation in the year of purchase.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

23) To find operating cash flow for the business for the year, add depreciation expense to EBIT and then \_\_\_\_\_.

- A) subtract the interest expenses
- B) add the taxes
- C) subtract the taxes
- D) add interest expenses

Answer: C

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

24) Which of the statements below is FALSE?

- A) The cash account is much like your individual checkbook, because it tells you how much money you currently have for paying bills or spending on new items.
- B) Current assets are accounts that will normally be turned into cash over the course of the operating or business cycle of the firm, and current liabilities are the accounts that will come due for payment over the operating or business cycle.
- C) The long-term capital asset accounts of the balance sheet represent the capital investment of the company and reflect assets that the company owns and that provide the basis for producing goods and services for sale.
- D) The Plant, Property and Equipment account is straightforward in its description, yet it cannot tell you the accumulated depreciation.

Answer: D

Explanation: D) The Plant, Property and Equipment account is straightforward in its description, yet it really contains two pieces: the original value (purchase price) of the equipment and the accumulated depreciation.

Diff: 3

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

25) Which of the statements below is FALSE?

- A) The cash account is much like your individual checkbook, because it tells you how much money you currently have for paying bills or spending on new items.
- B) Long-term assets are accounts that will normally be turned into cash over the course of the operating or business cycle of the firm, and current liabilities are the accounts that will come due for payment over the operating or business cycle.
- C) The long-term capital asset accounts of the balance sheet represent the capital investment of the company and reflect assets that the company owns and that provide the basis for producing goods and services for sale.
- D) The Plant, Property and Equipment account is straightforward in its description, yet it really contains two pieces: the original value (purchase price) of the equipment and the accumulated depreciation.

Answer: B

Explanation: B) CURRENT ASSETS are accounts that will normally be turned into cash over the course of the operating or business cycle of the firm, and current liabilities are the accounts that will come due for payment over the operating or business cycle.

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

26) Debts to be paid more than one year from now are claims against the firm's assets: in other words, they are long-term liabilities. These claims are from \_\_\_\_\_ who have provided capital to the firm but whose entire repayment is not due during the coming year or operating cycle.

- A) banks and bondholders
- B) banks and stockholders
- C) stockholders and bondholders
- D) all long-term lenders

Answer: A

Diff: 1

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

27) Which of the statements below is TRUE?

- A) The ownership accounts or owners' equity section of the balance sheet reflects the owners' stake in the firm.
- B) The ownership accounts or owners' equity section of the balance sheet is made up of common stock but not retained earnings.
- C) The retained earnings amount on the balance sheet really reflect retained earnings and other stockholder equity, but not treasury stock.
- D) The Statement of Retained Earnings is used to show the distribution of the interest paid for the past period.

Answer: A

Explanation: A) The ownership accounts or owners' equity section of the balance sheet is made up of common stock AND RETAINED EARNINGS.

The retained earnings amount on the balance sheet really reflects retained earnings, other stockholder equity AND TREASURY STOCK.

The Statement of Retained Earnings is really the fourth financial statement and is used to show the distribution of the NET INCOME for the past period.

Use the information below to answer the following questions about the Savoy Corporation.

The Savoy Corporation Income Statement Accounts for the year ending December 31, 2014

<b>Account</b>	<b>Balance</b>
Cost of goods sold	\$345,000
Interest expense	\$79,000
Taxes	\$57,100
Revenue	\$836,000
Selling, general, and administrative expenses	\$93,000
Depreciation	\$126,000

32) Refer to the Savoy Corporation Income Statement Accounts. What is the net income for the Savoy Corporation for 2014?

- A) \$135,900
- B) \$272,000
- C) \$261,100
- D) \$345,000

Answer: A

Explanation: A)  $\$836,000 - \$345,000 - \$93,000 - \$126,000 - \$79,000 - \$57,100 = \$135,900$ .

Diff: 2

Topic: 2.1 Financial Statements

AACSB: 7 Application of Knowledge

LO: 2.1 Explain the foundations of the balance sheet and income statement.

33) Refer to the Savoy Corporation Income Statement Accounts. What is the cash flow for the Savoy Corporation for 2014?

- A) \$193,000
- B) \$261,900
- C) \$135,100
- D) \$272,000

Answer: B

Explanation: B) Cash Flow = Net Income + Depreciation =  $\$135,900 + \$126,000 = \$261,900$ .

Diff: 2

Topic: 2.1 Financial Statements

Answer: TRUE

Diff: 1

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

42) Explain the three main areas of the balance sheet.

Answer: The three main areas of the balance sheet are assets, liabilities, and owners' equity. *Assets* include items of economic value owned by the company—they can be physical (for example, buildings), financial (such as accounts receivable), or intellectual (including patents). Assets also include cash itself. *Liabilities* are the amounts of money that the company owes to others, such as payroll to employees, taxes to government, borrowed money to banks, and bills for materials or services to creditors. *Owners' equity* is what is left over from the assets after all liabilities have been settled.

Diff: 3

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

43) From the finance perspective, there are five principal line accounts of particular interest on the balance sheet: the cash account, the working capital accounts, long-term capital assets accounts, long-term debt accounts, and ownership accounts. Briefly explain each.

Answer: The *cash account* indicates how much money the company currently has on hand for paying bills and spending on new items. The *working capital accounts* are the current assets and current liabilities of the company; current assets are those accounts that will be turned into cash over the course of the operating cycle, and current liabilities are accounts that will come due for payment over the course of the operating cycle. Current assets minus current liabilities give us the net working capital of the company. *Long-term capital assets accounts* indicate the capital investment of the company in items like land, buildings, and machinery. *Long-term debt accounts* are those debts to be paid in more than one year. *Ownership accounts* show the amount of capital contributed by owners (common stock) and retained earnings (earnings of the company that are reinvested in the core business or used to pay off debt).

Diff: 3

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

44) Why is an understanding of cash flow so important in the study of finance?

Answer: A firm may show robust accounting profits, yet still get into serious financial trouble or even go bankrupt. It is only cash flow that allows accurate and insightful financial analysis, which is the foundation of a firm's long-run planning and value maximization.

Diff: 3

Topic: 2.1 Financial Statements

AACSB: 3 Analytical Thinking

LO: 2.1 Explain the foundations of the balance sheet and income statement.

## 2.2 Cash Flow Identity and the Statement of Cash Flows

1) Which of the statements below is FALSE?

- A) The cash that the firm generates from its operating decisions (use of its assets) is used to either pay creditors or the owners of the company.
- B) Cash flow from assets shows the success or failure of the operating decisions.
- C) Cash flow to owners shows cash paid to owners plus any new borrowing from owners.
- D) Cash flow to creditors shows a portion of how the firm is financing the operations.

Answer: C

Explanation: C) Cash flow to owners COMPLETES the overview of financing and examines any additional contributions by the owners and the return of capital to the owners.

Diff: 2

Topic: 2.2 Cash Flow Identity and the Statement of Cash Flows

AACSB: 3 Analytical Thinking

LO: 2.2 Use the cash flow identity to explain cash flow.

2) Which one of the answers below is NOT one of the three components of the "Cash Flow from Assets"?

- A) Operating Cash Flow
- B) Net Capital Spending
- C) Noncash Expenses
- D) Change in Net Working Capital

Answer: C

Diff: 2

Topic: 2.2 Cash Flow Identity and the Statement of Cash Flows

AACSB: 3 Analytical Thinking

LO: 2.2 Use the cash flow identity to explain cash flow.

3) Which of the following identities is TRUE?

- A) Operating Cash Flow = EBIT + Depreciation - Taxes
- B) Net Capital Spending = Ending Net Fixed Assets - Depreciation
- C) Change in Net Working Capital (NWC) = Current Assets - Current Liabilities
- D) Cash Flow from Assets = Operating Cash Flow + Net Capital Spending

Answer: A

Explanation: A) Net Capital Spending = Ending Net Fixed Assets - Beginning Net Fixed Assets + Depreciation

Change in Net Working Capital (NWC) = Ending NWC - Beginning NWC

Cash Flow from Assets = Operating Cash Flow - Net Capital Spending - Change in NWC

Diff: 2

Topic: 2.2 Cash Flow Identity and the Statement of Cash Flows

AACSB: 3 Analytical Thinking

LO: 2.2 Use the cash flow identity to explain cash flow.

Hmwrk Questions: \* Taken from "Prepping for Exams" questions at the end of the chapter.

4) Which of the following identities is TRUE?

- A) Operating Cash Flow = EBIT - Depreciation + Taxes
- B) Net Capital Spending = Ending Net Fixed Assets - Depreciation
- C) Net Working Capital (NWC) = Current Assets - Current Liabilities
- D) Cash Flow from Assets = Operating Cash Flow - Net Capital Spending

Answer: C

Explanation: C) Operating Cash Flow = EBIT + Depreciation - Taxes

Net Capital Spending = Ending Net Fixed Assets - Beginning Net Fixed Assets + Depreciation

Cash Flow from Assets = Operating Cash Flow - Net Capital Spending - Change in NWC

20) Consider the information below from a firm's balance sheet for 2013 and 2014.

Current Assets	2014	2013	Change
Cash and Equivalents	\$1,561	\$1,800	-\$ 239
Short-Term Investments	\$1,052	\$3,010	-\$1,958
Accounts Receivable	\$3,616	\$3,129	\$ 487
Inventories	\$1,816	\$1,543	\$ 273
Other Current Assets	\$ 707	\$ 601	\$ 106
<b>Total Current Assets</b>	<b>\$8,752</b>	<b>\$10,083</b>	<b>-\$1,331</b>
<b>Current Liabilities</b>			
Accounts Payable	\$5,173	\$5,111	\$ 62
Short-Term Debt	\$ 288	\$ 277	\$ 11
Other Current Liabilities	\$1,401	\$1,098	\$303
<b>Total Current Liabilities</b>	<b>\$6,862</b>	<b>\$6,486</b>	<b>\$ 376</b>

What is the Net Working Capital for 2014? What is it for 2013? What is the Change in Net Working Capital (NWC)? Assuming the Operating Cash Flows (OCF) are \$7,155 and the Net Capital Spending (NCS) is \$2,372, what is the Cash Flow from Assets?

Answer:

Net Working Capital for 2014 is  $\$8,752 - \$6,862 = \mathbf{\$1,890}$

Net Working Capital for 2013 is  $\$10,083 - \$6,486 = \mathbf{\$3,597}$

Decrease in Net Working Capital (NWC) =  $\$1,890 - \$3,597 = \mathbf{-\$1,707}$

Assuming that Operating Cash Flows (OCF) are \$7,155, Net Capital Spending (NCS) is \$2,372, and Decrease in Net Working Capital is -\$1,707, we get:

Cash Flow from Assets =  $OCF - NCS - \text{Decrease in NWC} = \$7,155 - \$2,372 - (-\$1,707) = \mathbf{\$6,490}$ .
