- 5. Frederick Taylor is famous for:
 - a. developing time and motion studies
 - b. first defining the functions of managers
 - c. developing the 14 principles of management
 - d. creating the principles of scientific management
 - e. doing all of these

ANS: D PTS: 1 DIF: Moderate REF: 47-48

TOP: AACSB Reflective Thinking KEY: Operations Management

- 6. The goal of scientific management was to:
 - a. make sure workers did not consider their work boring or repetitive
 - b. decreased wages for individual workers
 - c. eliminate conflict between workers and management
 - d. find the one best way to perform each task
 - e. find different ways to motivate workers

ANS: D

Scientific management is thoroughly studying and testing different work methods to identify the best, most efficient way to complete a job.

PTS: 1 DIF: Moderate REF: 48 TOP: AACSB Reflective Thinking

KEY: Operations Management

- 7. Which of the following is NOT one of the principles of scientific management?
 - a. Use group dynamics to ensure organizational goals are met.
 - b. Give employees rest breaks throughout the day
 - c. Find the one best way for doing each task.
 - d. Divide the work and the responsibility equally between management and workers.
 - e. Scientifically select, train, teach, and develop workers to help them reach their potential.

ANS: A

The importance of group dynamics was not realized until the Hawthorne Studies.

PTS: 1 DIF: Difficult REF: 48 TOP: AACSB Reflective Thinking

KEY: Operations Management

- 8. Frank and Lillian Gilbreth are important to management because they:
 - a. used motion studies to eliminate unnecessary or repetitive motions from the work process
 - b. proved the effectiveness of nonfinancial motivators in convincing workers to strive for organizational goals
 - c. realized how the principles of sociology applied to worker performance
 - d. viewed the organization as a system that influenced its environment and that was influenced by its environment
 - e. identified the four functions managers perform

ANS: A PTS: 1 DIF: Moderate REF: 50 TOP: AACSB Reflective Thinking KEY: Operations Management

- 9. During World War I, battlefield surgery was crude. Which of the following management theorists would most likely have used their understanding of how work is done to help surgeons eliminate unnecessary motions, operate more efficiently, and save more lives by closely studying how surgeries were performed?
 - a. Henri Fayol
 - b. Chester Barnard
 - c. Mary Parker Follett

d. Frederick Taylor e. Frank Gilbreth ANS: E This episode in Gilbreth's life is described in one of the books written by his son. He used motion studies to reduce the surgery time. PTS: 1 DIF: Moderate REF: 50 TOP: AACSB Reflective Thinking **KEY**: Operations Management 10. Which management theorist said, "The greatest waste in the world comes from needless, ill-directed, and ineffective motions"? a. Frederick Taylor b. Frank Gilbreth c. Elton Mayo d. Henri Fayol Chester Barnard ANS: B Gilbreth is famous for using motion studies to reduce or eliminate unnecessary and repetitive motions. PTS: 1 DIF: Moderate **REF: 50** TOP: AACSB Reflective Thinking **KEY**: Operations Management 11. A contractor was feeling defeated because the job he was working on was so far behind schedule. As he looked at the job site, he saw one worker moving bricks by carrying two at a time from where they were unloaded to where they were needed. He saw another climbing up a ladder with a few shingles, climbing back down to get more, and then repeating the process. _____ could be used to determine how the workers could perform their tasks more efficiently. a. Time and motion studies b. Resource assessments c. Workload analyses d. Systems analyses e. Cost-benefit analyses ANS: A

Time studies would show how long it takes a good worker to finish a task. Motion studies would identify which motions are unnecessary and repetitive.

PTS: 1 DIF: Moderate **REF: 50** TOP: AACSB Analytic KEY:

Operations Management

- 12. Frank and Lillian Gilbreth played a critical role in:
 - a. learning how group dynamics influence work efficiency
 - b. reducing employee turnover
 - c. the passage of the Americans with Disabilities Act
 - d. the rehabilitation and employment of disabled workers
 - e. the identification of the various roles leaders play within the organization

ANS: D PTS: 1 DIF: Moderate **REF: 50** TOP: AACSB Reflective Thinking KEY: Legal Responsibilities 13. The Gantt chart:

- a. was a precursor to the organizational chart
- b. is a chart that shows when and where tasks need to be completed so that a job can be completed in a timely fashion
 - c. was an early method for breaking jobs down into their smallest common denominator
 - d. was a major tool of scientific managers and is not widely used today
 - e. is a method for continuous training of front-line employees

ANS: B PTS: 1 **REF: 51 DIF:** Easy TOP: AACSB Reflective Thinking **KEY**: Operations Management

- 14. In which of the following situations would a Gantt chart be appropriate to use? a. building a bridge
 - b. installing a local area network for a computer system
 - rebuilding a community destroyed by a hurricane
 - d. planning a Mardi Gras parade
 - e. all of these

ANS: E

A Gantt chart would be appropriate for any of the activities because it would allow planners to see which tasks needed to be completed at which time in order to finish the project.

REF: 51-PTS: 1 DIF: Easy **TOP:** AACSB Analytic 52 KEY:

Operations Management

- 15. Which of the following management theorists created a task and bonus system that did not punish workers for not achieving higher levels of production? a. Henri Fayol
 - b. Lillian Gilbreth
 - c. Henry Gantt
 - d. Mary Parker Follett
 - e. Frederick Taylor

ANS: C PTS: 1 DIF: Moderate **REF: 52** TOP: AACSB Reflective Thinking **KEY**: Operations Management

- 16. At about the same time as management theorists were developing scientific management principles in the United States, Max Weber was in Europe developing: a. human relations management
 - b. group dynamics theory
 - c. systems management
 - d. contingency management
 - e. bureaucratic management

ANS: E PTS: 1 DIF: Moderate **REF: 53** TOP: AACSB Reflective Thinking **KEY**: Operations Management

- 17. As a surgical nurse, Mariah Hopkins has been instructed by the operating room administrators to use a special, expensive type of gauze only to pack deep wounds. Several of the surgeons for whom she works have demanded that she give them the gauze to use during surgeries because of its absorbency. The surgeons do not feel they have to abide by the rules that govern the behavior of other hospital employees. Hopkins is miserable because of the conflicting demands she receives. Whose management theories most specifically dealt with the issues described in this scenario?
 - a. Henri Fayol
 - b. Max Weber
 - c. Frank Gilbreth
 - d. Elton Mayo
 - e. Mary Parker Follett

ANS: B

Weber had strong feelings that rules and procedures should apply to all members, regardless of their position or status.

PTS: 1 DIF: Moderate REF: 54 TOP: AACSB Analytic KEY:

Individual Dynamics

- 18. According to Weber, a bureaucracy:
 - a. should be based on the theory of behavioral reinforcement
 - b. allows political connections to determine an individual's power base within organizations
 - c. is the exercise of control on the basis of knowledge, expertise, or experience
 - d. is the exercise of control by virtue of family connections
 - e. relies on scheduled, periodic corrective actions to operate at its most efficient

ANS: C PTS: 1 DIF: Moderate REF: 54 TOP: AACSB Reflective Thinking **KEY**: Leadership Principles 19. Which of the following statements about division of labor is true? a. Division of labor is a factor in bureaucratic management. b. By using division of labor, managers can assign the best qualified people to perform tasks. c. Division of labor is designed to improve both effectiveness and efficiency. d. One of the reasons division of labor works is because authority is vested in the position, not in the people. e. All of the above statements about division of labor are true. ANS: E PTS: 1 DIF: Moderate REF: 54-55 TOP: AACSB Reflective Thinking **KEY**: Leadership Principles 20. As defined by Weber, the goal of bureaucracy is to: a. achieve an organization's goal in the most efficient way possible b. create sustainable nonfinancial motivation tools c. provide managers with the tools needed to adapt to different situations d. create synergy within the organization's departments provide managers with the general tools they need to assume the various managerial roles ANS: A PTS: 1 DIF: Moderate **REF: 54** TOP: AACSB Reflective Thinking **KEY**: Operations Management 21. Which of the following is NOT associated with Max Weber's bureaucratic management? a. merit-based promotion b. span of management c. division of labor d. chain of command e. qualification-based hiring ANS: B Bureaucratic management is also identified with the impartial application of rules and procedures that are recorded in writing and the use of professional managers.

PTS: 1 DIF: Easy REF: 54 TOP: AACSB Reflective Thinking

KEY: Operations Management | Leadership Principles

- 22. One limitation of bureaucratically managed companies is:
 - a. the continued adherence to the goal of personal gain
 - b. synergy
 - c. an ever-changing organizational culture
 - d. reliance on favoritism
 - e. their strong resistance to change

	ANS: E PTS: 1 DIF: Moderate REF: 55 TOP: AACSB Reflective Thinking KEY: Group Dynamics
23.	is best known for developing the five functions of managers and the 14 principles of management. a. Henri Fayol b. Max Weber c. Frank Gilbreth
	d. Elton Mayo e. Mary Parker Follett
	ANS: A PTS: 1 DIF: Easy REF: 55 TOP: AACSB Reflective Thinking KEY: Leadership Principles
24.	Which of the following activities indicate the described company adheres to at least one of the management theories supported by Henri Fayol? a. The company uses time and motion studies to increase production efficiency. b. The company relies on teamwork to get the job done better. c. The company sends all of its managers to school to learn how to manage. d. The company uses nonmaterial and material incentives to get workers to cooperate with each other. e. The company's managerial hierarchy operates as if there is not one best way to manage a company.
	ANS: C Proponents of scientific management used time and motion studies to increase efficiency. Mary Parker Follett espoused the benefits of teamwork. Incentives and cooperation were buzzwords of Chester Barnard. Fayol did not develop contingency management, which involves choosing a management style that fits the company and its circumstances in the moment.
	PTS: 1 DIF: Moderate REF: 55-57 TOP: AACSB Analytic KEY: HRM
25.	Which of the following management theorists used his own personal experiences as a CEO to create his theory of management? a. Elton Mayo b. Frederick Taylor c. Henri Fayol d. Max Weber e. Frank Gilbreth

International Steel Group (ISG)

As the day shift supervisor at the steel plant, you summon the six college students who are working for you this summer doing whatever you need done (sweeping up, sandblasting the inside of boilers that are down for maintenance, running errands, etc.). You walk them across the plant to a field where the company stores scrap metal "leftovers." The area, about the size of a football field, is stacked with organized piles of metal. You explain that everything they see has just been sold. Metal prices, which have been depressed, have finally risen enough that the company can earn a small profit by selling its scrap.

You point out that railroad tracks divide the field into parallel sectors, like the lines on a football field, so that each stack of metal is no more than 15 feet from a track. Each stack contains 390 pieces of metal. Each piece weighs 92 pounds and is about a yard long and just over 4 inches high and 4 inches wide. You tell the students that working as a team, they are to pick up each piece, walk up a ramp to a railroad car, which will be positioned next to each stack, and then neatly position and stack the metal for shipment. That's right, you repeat, 92 pounds, walk up the ramp, and carry the metal onto the rail car. Anticipating their questions, you explain that a forklift could be used only if the metal was stored on wooden pallets (it isn't), if the pallets could withstand the weight of the metal (they would be crushed), and if you, as their supervisor, had forklifts and people trained to run them (you don't). In other words, the only way to get the metal into the rail cars is for the students to carry it.

Based on an old report from the last time the company sold some of the metal, you know that over an eight-hour shift workers typically loaded about 30 to 31 pieces of metal parts per hour. At that pace, though, it will take your six students six weeks to load all of the metal, and the purchasing manager who sold it says it must be shipped in two weeks. So, without more workers (there's a hiring freeze) and without forklifts, all of the metal has to be loaded by hand by these six workers in two weeks.

- 88. Refer to ISG. What advice should the shift supervisor at the steel plant in charge of the six college students take from the teachings of Frederick Taylor?
 - a. Look at how the task assigned influences the organizational goals.
 - b. Scientifically train, teach, and develop these employees to help them reach their full potential.
 - c. Use time and motion studies to create the most efficient work methodology.
 - d. Rely on qualification-based hiring.

United Fruit

United Fruit once dominated business and politics in Central America. It was the first truly multinational modern corporation. As well as harvesting the region's bananas, the company also wielded formidable influence over small nations, which were often ruled by corrupt dictators. United Fruit began in the 1870s as a business sideline of Minor Cooper Keith, who was also building a railway line in Costa Rica. Both ventures were successful, and by 1890, Keith owned vast banana plantations, and demand in the United States for bananas outstripped supply. By the 1920's was growing bananas for the working classes in the U.S. and in Europe. United Fruit gained a reputation for ruthlessness when crossed and acted to remove governments that did not comply with its wishes. By the 1970s, United Fruit was no longer profitable and had lost its power.

- 93. Refer to United Fruit. A(n) _____ could have been used by United Fruit to determine planting, harvesting, loading, and shipping priorities for ensuring that bananas were available to consumers when and where they wanted to buy them.
 - a. correlation study
 - b. Gantt chart
 - c. trend analysis
 - d. entropic study
 - e. bureaucratic analysis

ANS: B

The Gantt chart is a graphical chart that shows which tasks must be completed at which times in order to complete a project or task.

PTS: 1 DIF: Moderate REF: 51-52 TOP: AACSB Analytic

KEY: Operations Management

- 94. Refer to United Fruit. United Fruit might have survived if it had realized that the most effective way to run a company varies depending upon the problems faced and the situations in which problems occur. That is, United Fruit might have survived if it had used:
 - a. scientific management
 - b. the human relations approach to management
 - c. administrative management
 - d. the contingency approach to management
 - e. bureaucratic management

ANS: D

The contingency approach is that there are no universal management theories and that the most effective management theory or idea depends on the kinds of problems or situations that managers or organizations are facing at a particular time.

PTS: 1 DIF: Moderate REF: 71 TOP: AACSB Analytic

KEY: Environmental Influence

- 95. Refer to United Fruit. According to Max Weber, the goal of the bureaucratic management of United Fruit would have been to:
 - a. achieve its corporate goal in the most efficient way possible

SHORT ANSWER

1. How did the Industrial Revolution change jobs and organizations?

ANS:

First, thanks to the availability of power and numerous inventions, low-paid, unskilled laborers began to replace high-paid, skilled artisans. Whereas artisans made entire goods by themselves by hand, this new production system was based on a division of labor. Secondly, instead of being performed in fields, homes, or small shops, jobs occurred in large formal organizations where hundreds of people worked under one roof.

PTS: 1 DIF: Moderate REF: 45-46 TOP: AACSB Reflective Thinking

KEY: Operations Management

2. Describe how managers approached management before the development of scientific management.

ANS:

It can best be described as "seat of the pants" management. Decisions were made haphazardly without any systematic study, thought, or collection of information.

PTS: 1 DIF: Moderate REF: 47 TOP: AACSB Reflective Thinking

KEY: Operations Management

3. List the four principles of scientific

management. ANS:

- (1) "Develop a science" for each element of work. Study it. Analyze it. Determine the "one best way" to do the work. (2) Scientifically select, train, teach, and develop workers to help them reach their full potential. (3) Cooperate with employees to ensure implementation of the scientific principles.
- (4) Divide the work and the responsibility equally between management and workers.

4. What role did Frank and Lillian Gilbreth play in rehabilitating and employing disabled soldiers as they returned from World War I?

ANS:

The Gilbreths used motion studies to identify what kinds of tasks disabled workers could effectively perform. They argued that the government, employers, and engineers had an important role to play in employing disabled workers. They said that the government's job was to provide vocational training. They said employers should identify jobs that disabled persons could perform. (To help employers do this, the Gilbreths created a large slide show of pictures documenting hundreds of ways disabled people could effectively perform jobs.) Engineers had the responsibility to adapt and design machines so that disabled workers could use them.

5. Identify the limitations of bureaucratic management.

ANS:

Bureaucratic managers tend to emphasize punishment for noncompliance much more than rewards for compliance. Managers who use bureaucratic control often put following the rules above all else. Another limitation of bureaucratically controlled organizations is that due to their rule- and policydriven decision making, they can be highly resistant to change and slow to respond to customers and competitors.

6. What did Henri Fayol mean when he argued that "the success of an enterprise generally depends much more on the administrative ability of its leaders than on their technical ability"?

ANS:

Fayol was referring to the need of managers to perform the five functions of management in order to be successful. They needed to be able to plan, organize, lead, control, and coordinate (a function that has been folded into leading by management texts today). How a manager performs these functions determines how successful the manager is, not his or her technical skills.

7. What principles did the Hawthorne Studies demonstrate to be true?

ANS:

Elton Mayo is best known for his role in the Hawthorne Studies at the Western Electric Company. In the first stage of the Hawthorne Studies, production went up because the increased attention paid to the workers in the study and their development into a cohesive work group led to significantly higher levels of job satisfaction and productivity. In the second stage, productivity dropped because the workers had already developed strong negative norms, in which individual "rate busters" who worked faster than the rest of the team or cooperated with management were ostracized or "binged." The Hawthorne Studies demonstrated that workers' feelings and attitudes affected their work, that financial incentives weren't necessarily the most important motivator for workers, and that group norms and behavior play a critical role in behavior at work.

8. When will people generally be indifferent to managerial directives or orders?

ANS:

People will generally be indifferent to managerial directives or orders if they (1) are understood, (2) are consistent with the purpose of the organization, (3) are compatible with the people's personal interests, and (4) can actually be carried out by those people.

9. Differentiate between closed systems and open systems.

ANS:

Whereas closed systems can function without interacting with their environment, nearly all organizations should be viewed as open systems that interact with their environments and depend on them for survival.

ESSAY

1. Discuss Mary Parker Follett's methods of dealing with conflict. Which did she say about the value of each method?

ANS:

Follett believed that managers could deal with conflict in three ways. They were domination, compromise, and integration. Domination is an approach in which one party deals with the conflict by satisfying its desires and objectives at the expense of the other party's desires and objectives. Compromise is an approach in which both parties deal with the conflict by giving up some of what they want in order to reach agreement on a plan to reduce or settle the conflict. Integrative conflict resolution is an approach in which both parties deal with the conflict by indicating their preferences and then working together to find an alternative that meets the needs of both. Domination is the easiest approach, but it is not usually successful in the long run. No one really wants to compromise. With the integration approach, two ideas are integrated. Integration involves invention. It makes people think outside their normal boundaries.

2. What did the Hawthorne Studies prove about groups? What kind of experiment can you create to prove that Mayo's results are true?

ANS:

The Hawthorne Studies proved the importance of understanding group dynamics. Students' answers to the second part of this question will vary. Their answers should describe the creation of two different work groups. One group will be given lots of attention, and the other group will be ignored. They should record the behaviors of members of both groups to show how important group norms are to work efficiency.

3. What advantages does the systems approach to management offer that other approaches do not?

ANS:

A systems view of management forces managers to view their organizations as part of and subject to the competitive, economic, social, technological, and legal/regulatory forces in their environments. Second, it forces managers to be aware of how the environment affects specific parts of the organization. Third, because of the complexity and difficulty of trying to achieve synergies between different parts of the organization, the systems view encourages managers to focus on better communication and cooperation within the organization. Finally, it makes managers acutely aware that good internal management of the organization may not be enough to ensure survival. Survival also depends on making sure that the organization continues to satisfy critical environmental stakeholders, such as shareholders, employees, customers, suppliers, governments, and local communities.

4. How is your ability to be a manager influenced by acceptance of the contingency approach to management as the most effective way to manage?

ANS:

The contingency approach to management precisely states that there are no universal management theories and that the most effective management theory depends on the kinds of problems or situations that managers or organizations are facing at a particular time. One of the practical implications of the contingency approach is that management is much harder than it looks. A second implication of the contingency approach is that managers need to spend more time analyzing problems, situations, and employees before taking action to fix them. Finally, it means that as you learn about management ideas and practices, you need to pay attention to qualifying phrases such as "usually," "in most situations," and "under these circumstances."
