## **Chapter 2**

### **The Balance Sheet**

#### **ANSWERS TO QUESTIONS**

1.
  - (a) An asset is a resource owned by a company that has measurable value and is expected to provide future benefits.
  - (b) A current asset is an asset that will be used up or turned into cash within the next 12 months.
  - (c) A liability is a debt or obligation arising from past transactions or events, which the company is likely to pay, settle, or fulfill by sacrificing resources in the future.
  - (d) A current liability is a debt or obligation that will be paid, settled, or fulfilled within one year.
  - (e) Common stock includes the amount of financing (cash and sometimes other assets) provided to the company by stockholders in exchange for shares of common stock.
  - (f) Retained earnings are the cumulative earnings of a company that are not distributed to the owners and instead are reinvested in the business.
2. A transaction is an exchange or event that has a direct and measurable financial effect on the assets, liabilities, or stockholders' equity of a business. Transactions include two different types of events: (1) external exchanges and (2) internal events. The first situation (1) is exemplified by the sale of goods or services to customers. The second situation (2) is exemplified by employees using up the benefits of equipment owned by the company.
3. Accounts are used to accumulate and report the effects of different business activities. Accounts are necessary to keep track of all increases and decreases in the basic accounting equation.

4. The basic accounting equation is:  $\text{Assets} = \text{Liabilities} + \text{Stockholders' Equity}$ .
5. Debit is the left side of a T-account and credit is the right side of a T-account. A debit is an increase in assets or a decrease in liabilities or stockholders' equity. A credit is the opposite – a decrease in assets or an increase in liabilities or stockholders' equity.

6. Transaction analysis is the process of studying a transaction to determine its financial effect on the business in terms of the basic accounting equation:  
$$\text{Assets} = \text{Liabilities} + \text{Stockholders' Equity}$$
The two principles underlying the process are:
- \* Duality of effects: every transaction affects at least two accounts.
  - \*  $A=L+SE$ ; the accounting equation must remain in balance after each transaction.
7. The accounting equalities in transaction analysis are:
- (a)  $\text{Assets} = \text{Liabilities} + \text{Stockholders' Equity}$
  - (b)  $\text{Debits} = \text{Credits}$
8. A journal entry is a method for expressing the effects of a transaction on accounts in a debits equal credits format. The title of the account(s) to be debited is (are) listed first. The title of the account(s) to be credited is (are) listed underneath the debited accounts and both account title(s) and amount(s) are indented to the right. (An optional explanation can be included on the lines following the journal entry; this explanation is omitted in most textbook examples and homework problems because the description of the transaction in the textbook already provides the explanation.)
9. T-accounts are a simplified version of the ledger, which summarizes transaction effects for each account. T-accounts show increases on the left (debit) side for assets, which are on the left side of the accounting equation. T-accounts show increases on the right (credit) side for liabilities and stockholders' equity, which are on the right side of the accounting equation. The T-account is a tool for summarizing transaction effects for each account and determining balances.
10. The cost principle requires that assets and liabilities be recorded at their original cost to the company.
11. Because the customer list was not purchased by her salon (it was developed internally), her salon does not report it on the balance sheet. Knowing this, she should be sure to advise her banker that the salon has established a loyal group of customers that holds considerable value for generating future revenues (but is excluded from the balance sheet for accounting reasons).

\* Due to the nature of cases, it is very difficult to estimate the amount of time students will need to complete them. As with any open-ended project, it is possible for students to devote a large amount of time to these assignments. While students often benefit from the extra effort, we find that some become frustrated by the perceived difficulty of the task. You can reduce student frustration and anxiety by making your expectations clear, and by offering suggestions (about how to research topics or what companies to select). The skills developed by these cases are indicated in the table on the following page.

Case	Financial Analysis	Research	Ethical Reasoning	Critical Thinking	Technology	Writing	Teamwork
1	x						
2	x						
3	x	x			x	x	x
4	x		X	x			
5	x		X	x		x

**M2-21**

**CHARLIE'S CRISPY CHICKEN**

Balance Sheet  
At September 30

Assets		Liabilities	
Current Assets		Current Liabilities	
Cash	\$ 1,800	Accounts Payable	\$ 2,000
Supplies	<u>1,500</u>	Salaries and Wages Payable	<u>200</u>
Total Current Assets	3,300	Total Current Liabilities	2,200
Equipment	38,000	Note Payable (long-term)	<u>25,000</u>
Land	<u>18,900</u>	<b>Total Liabilities</b>	<u>27,200</u>
<b>Total Assets</b>	<u>\$60,200</u>		
		Stockholders' Equity	
		Common Stock	30,000
		Retained Earnings	<u>3,000</u>
		<b>Total Stockholders' Equity</b>	<u>33,000</u>
		<b>Total Liabilities &amp; Stockholders' Equity</b>	<u>\$60,200</u>

CCC's current ratio ( $3,300/2,200 = 1.5$ ) suggests the company has enough current assets that could be converted into cash to cover its current liabilities. At September 30, CCC had \$1.50 of current assets for each dollar of current liabilities.

**M2-22**

Req. 1

**FACEBOOK, INC.**  
Balance Sheet  
At September 30, 2013

*(amounts in millions)*

<i>Assets</i>		<i>Liabilities</i>	
<i>Current Assets</i>		<i>Current Liabilities</i>	
Cash	\$ 3,100	Accounts Payable	\$ 700
Short Term Investments	6,300	Notes Payable (short-term)	<u>300</u>
Prepaid Rent	<u>1,100</u>	<i>Total Current Liabilities</i>	1,000
<i>Total Current Assets</i>	<u>10,500</u>	Note Payable (long-term)	<u>900</u>
		<i>Total Liabilities</i>	<u>1,900</u>
Software	1,700	<i>Stockholders' Equity</i>	
Equipment	<u>2,700</u>	Common Stock	10,400
<i>Total Non-Current Assets</i>	<u>4,400</u>	Retained Earnings	2,600
<b>Total Assets</b>	<u>\$ 14,900</u>	<i>Total Stockholders' Equity</i>	<u>13,000</u>
		<b>Total Liabilities &amp; Stockholders' Equity</b>	<u>\$ 14,900</u>

Req. 2

As of September 30, 2013, stockholders' equity has provided the primary source of financing for Facebook, Inc. The company has financed \$13,000 of its assets with stockholders' equity and only \$1,900 with liabilities.

Req. 3

Facebook's current ratio ( $\$10,500/\$1,000 = 10.5$ ) suggests the company has enough current assets that could be converted into cash to cover its current liabilities. Specifically, the current ratio of 10.5 implies that, at September 30, 2013, Facebook had \$10.50 of current assets for each dollar of current liabilities.

**M2-23**

$$\text{Current Ratio} = \frac{\text{Current Assets}}{\text{Current Liabilities}}$$

$$\text{Current Ratio} = \frac{\$30,000}{\$15,000} = 2.0$$

Yes, it is likely that Mister Ribs will be able to pay its current liabilities as they come due. The current ratio of 2.0 indicates that for every dollar in current liabilities, the company has two dollars in current assets. This ratio indicates a good ability to pay.

**M2-24**

$$\text{a. Decrease} \quad \frac{\$30,000 - \$2,000}{\$15,000 + \$0} = 1.87$$

$$\text{b. Increase} \quad \frac{\$30,000 + \$2,000}{\$15,000 + \$0} = 2.13$$

$$\text{c. Increase} \quad \frac{\$30,000 + \$5,000}{\$15,000 + \$0} = 2.33$$

$$\text{d. Decrease} \quad \frac{\$30,000 + \$500}{\$15,000 + \$500} = 1.97$$

**M2-25**

$$\text{a. Decrease} \quad \frac{\$1,000,000 + \$20,000}{\$500,000 + \$20,000} = 1.96$$

$$\text{b. Increase} \quad \frac{\$1,000,000 - \$50,000}{\$500,000 - \$50,000} = 2.11$$

$$\text{c. Increase} \quad \frac{\$1,000,000 + \$100,000}{\$500,000 + \$0} = 2.20$$

$$\text{d. Decrease} \quad \frac{\$1,000,000 + \$250,000}{\$500,000 + \$250,000} = 1.67$$

## ANSWERS TO EXERCISES

**E2-1**    (1) E      (2) F      (3) B      (4) N      (5) I  
          (6) A      (7) K      (8) M      (9) L      (10) D

### E2-2

Req. 1

	<u>Given</u>	<u>Received</u>	
(a)	Note Payable (short-term)	Equipment	
(b)	Cash	Equipment	
(c)	—	—	<i>No exchange transaction</i>
(d)	Common Stock	Cash	
(e)	Cash	Land	
(f)	—	—	<i>No company transaction</i>
(g)	Note Payable (short-term)	Cash	
(h)	Cash	Note Payable (long-term)	

Req. 2

The truck in (b) would be recorded as an asset of \$21,000. The land in (e) would be recorded as an asset of \$50,000. These are applications of the cost principle.

Req. 3

The agreement in (c) involves no exchange or receipt of cash, goods, or services and thus is not a transaction. Because transaction (f) occurs between the owner and others, the separate entity assumption implies this transaction does not affect the business.

**E2-3**

<u>Account</u>	<u>Balance Sheet Classification</u>	<u>Debit or Credit Balance</u>
1. Land	NCA	Debit
2. Retained Earnings	SE	Credit
3. Note Payable (3 years)	NCL	Credit
4. Accounts Receivable	CA	Debit
5. Supplies	CA	Debit
6. Common Stock	SE	Credit
7. Equipment	NCA	Debit
8. Accounts Payable	CL	Credit
9. Cash	CA	Debit
10. Income Taxes Payable	CL	Credit

**E2-4**

<u>Assets</u>		=	<u>Liabilities</u>		+	<u>Stockholders' Equity</u>	
a. Cash	+10,000	=				Common Stock	+10,000
b. Cash	+7,000	=	Note Payable (short-term)	+7,000			
c. Equipment	+800	=	Accounts Payable	+800			
d. Land	+12,000	=	Note Payable	+11,000			
Cash	-1,000		(long term)				
e. Equipment	+3,000	=	Accounts Payable	+2,000			
Cash	-1,000						

## E2-5

Req. 1

<u>Assets</u>		=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>
a. Equipment	+216				
Cash		=	Note Payable		+5
	-211		(long-term)		
b. Cash	+21	=		Common Stock	+21
c. <i>No effect</i>					
<b>TOTALS</b>		<b>26 =</b>		<b>5 +</b>	<b>21</b>

Req. 2

The separate entity assumption states that transactions of the business are separate from transactions of the owners. Because transaction (c) occurs between the owners and others in the stock market, there is no effect on the business.

Req. 3

The greater increase in stockholders' equity (versus liabilities) indicates that these transactions led NIKE to rely proportionately more on stockholders (versus creditors).

## E2-6

a.	Cash (+A) .....	10,000	
	Common Stock (+SE) .....		10,000
b.	Cash (+A) .....	7,000	
	Note Payable (short-term) (+L) .....		7,000
c.	Equipment (+A) .....	800	
	Accounts Payable (+L) .....		800
d.	Land (+A) .....	12,000	
	Cash (-A) .....		1,000
	Note Payable (long-term) (+L) .....		11,000
e.	Equipment (+A) .....	3,000	
	Cash (-A) .....		1,000
	Accounts Payable (+L) .....		2,000

**E2-7**

Req. 1

- a. Equipment (+A)..... 216  
     Cash (-A).....211  
     Note Payable (long-term) (+L) ..... 5
- b. Cash (+A)..... 21  
     Common Stock (+SE) ..... 21
- c. No journal entry required.

Req. 2

The separate entity assumption states that transactions of the business are separate from transactions of the owners. Because transaction (c) occurs between the owners and others in the stock market, there is no effect on the business.

	60,000 (a)																
	60,000 End.																

Req. 2

Assets \$ 69,000 = Liabilities \$ 9,000 + Stockholders' Equity \$ 60,000

Req. 3

The agreement in (c) involves no exchange or receipt of cash, goods, or services and thus is not yet a transaction. Because transaction (d) occurs between the owners and others, the separate entity assumption implies this transaction does not affect the business.

## E2-9

Req. 1

<b>Transaction</b>	<b>Brief Explanation</b>
1	Issued common stock for \$12,000 cash.
2	Borrowed \$50,000 cash and signed a note for this amount.
3	Purchased equipment for \$12,000; paid \$4,000 cash and gave an \$8,000 Note Payable for the balance.
4	Borrowed \$4,000 cash and signed a note for this amount.

Req. 2

From table:

$$\begin{array}{r} \text{Cash} + \text{Equipment} = \text{Note Payable} + \text{Common Stock} \\ \text{Ending } 62,000 + 12,000 = 62,000 + 12,000 \end{array}$$

Req. 3

Most of Home Comfort's financing has come from liabilities. The company has financed \$62,000 of its investment in assets with liabilities and only \$12,000 with stockholders' equity.

**E2-10**

Req 1:

	<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>
(a)	No transaction - no obligation exists until the supplies are received.				
(b)	Cash	- 10,000	Note Payable	+ 20,000

Balance Sheet

At December 31

<i>Assets</i>		<i>Liabilities</i>	
<i>Current Assets</i>		Notes Payable (long-term)	<u>\$30,000</u>
Cash	<u>\$36,000</u>	<i>Total Liabilities</i>	30,000
<i>Total Current Assets</i>	36,000		
Equipment	22,000	<i>Stockholders' Equity</i>	
Land	<u>12,000</u>	Common Stock	<u>40,000</u>
		<i>Total Liabilities &amp; Stockholders'</i>	
<i>Total Assets</i>	<u>\$70,000</u>	<i>Equity</i>	<u>\$70,000</u>

Req. 5

LDS's assets were financed primarily by stockholders' equity. The stockholders' equity financed \$40,000 of the company's assets and liabilities financed \$30,000.

## E2-13

<b>Transaction</b>	<b>Brief Explanation</b>
(a)	Issued common stock for \$17,000 cash.
(b)	Purchased a building for \$50,000; paid \$10,000 cash and gave a \$40,000 note payable for the balance.
(c)	Used cash to purchase supplies costing \$1,500.

## E2-14

Req. 1

September 30, 2013

December 31, 2012

$$\text{Current Ratio} = \frac{\$1,180,200}{\$270,700} = 4.36$$

$$\text{Current Ratio} = \frac{\$1,122,600}{\$252,100} = 4.45$$

Req. 2

The company's current ratio decreased, which implies a decreased ability to pay current liabilities.

Req. 3

$$\text{Current Ratio} = \frac{\$1,180,200 - \$10,000}{\$270,700 - \$10,000} = 4.49$$

Paying down Accounts Payable in this case (when the current ratio is larger than one) increases the current ratio.

Req. 4

As of September 30, 2013, stockholders' equity has provided the primary source of financing for Columbia Sportswear, Inc. The company has financed \$1,219,800 of its assets with stockholders' equity and only \$314,500 with liabilities.

## E2-15

Req. 1

<u>Assets</u>		=	<u>Liabilities</u>	=	<u>+ Stockholders' Equity</u>

		<i>Total Stockholders' Equity</i>	<u>12,000</u>
<i>Total Assets</i>	<u>\$ 47,900</u>	<i>Total Liabilities &amp; Stockholders' Equity</i>	<u>\$ 47,900</u>

Req. 4

At September 30, BSC reported \$7,900 of current assets and \$5,900 of current liabilities, resulting in a current ratio of 1.33 (7,900/5,900). Because this ratio is greater than 1.3, BSC is complying with the loan covenant. (This means that the bank will not be able to demand repayment or renegotiation of the \$30,000 note payable until it matures in two years.)

## ANSWERS TO COACHED PROBLEMS

### CP2-1

Req. 1

Ag BioTech was organized as a corporation. Only a corporation issues shares of stock to its owners in exchange for their investment, as ABT did in transaction (a).

Req. 2

	<u>Assets</u>					=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>	
	<u>Cash</u>	<u>Supplies</u>	<u>Land</u>	<u>Building</u>	<u>Equipment</u>		<u>Note Payable</u>		<u>Common Stock</u>	<u>Retained Earnings</u>
(a)	+40,000					=			+40,000	
(b)	-13,000		+18,000	+65,000	+16,000	=	+86,000			
(c)	No effect									
(d)	-3,000	+3,000				=			No change	
(e)	+6,000		-6,000			=			No change	
	<u>+30,000</u>	<u>+3,000</u>	<u>+12,000</u>	<u>+65,000</u>	<u>+16,000</u>	=	<u>+86,000</u>		<u>+40,000</u>	

Req. 3

The transaction between the two stockholders (event c) was not included in the spreadsheet. Because event (c) occurs between the owners and others, the separate entity assumption implies this transaction does not affect the business.

## CP2-1 (Continued)

Req. 4

$$(a) \text{ Total assets} = \$30,000 + \$3,000 + \$12,000 + \$65,000 + \$16,000 \\ = \$126,000$$

$$(b) \text{ Total liabilities} = \$86,000$$

$$(c) \text{ Total stockholders' equity} = \text{Total assets} - \text{Total liabilities} \\ = \$126,000 - \$86,000 = \$40,000$$

$$(d) \text{ Cash balance} = \$40,000 - \$13,000 - \$3,000 + \$6,000 = \$30,000$$

$$(e) \text{ Total current assets} = \$30,000 + \$3,000 = \$33,000$$

Req. 5

As of January 31, the financing for ABT's assets came primarily from liabilities. For ABT, the liabilities financed \$86,000 of its assets and stockholders' equity financed \$40,000.

## CP2-2

Req. 1

	Assets					=	Liabilities		+	Stockholders' Equity	
	Cash	Supplies	Building	Equip	Land	Accounts Payable	Notes Payable	Common Stock		Retained Earnings

(b)	+120,000			=	+120,000			
(c)	-200,000		+200,000	=				
(d)	-3,000	+30,000		=	+27,000			
(e)		-3,000		=	-3,000			
(f)	-7,000	+10,000		=	+3,000			
(g)	No effect			=				
	+10,000	+37,000	+200,000	=	+147,000		+100,000	
Changes	+ \$247,000				+ \$147,000		+\$100,000	

Req. 2

The transaction between the stockholder and his neighbor (event *g*) was not included in the spreadsheet. Because event (*g*) occurs between an owner and another person, the separate entity assumption implies this transaction does not affect the business.

Req. 3

- (a) Beginning total assets \$500,000 + Changes \$247,000 = \$747,000 Ending total assets
- (b) Beginning total liabilities \$200,000 + Changes \$147,000 = \$347,000 Ending total liabilities
- (c) Ending total assets \$747,000 – Ending total liabilities \$347,000 = Ending stockholders' equity \$400,000

Or, Beginning stockholders' equity \$300,000 + Changes in stockholders' equity \$100,000 = Ending stockholders' equity \$400,000.

**PA2-1 (continued)**

Req. 4

As of the end of the year, MI's assets were financed by slightly more stockholders' equity than liabilities. MI's stockholders' equity financed \$400,000 of the company's total assets and liabilities financed \$347,000.

**PA2-2**

Total Stockholders' Equity	<u>362</u>
----------------------------	------------

Total Liabilities and Stockholders' Equity	<u>\$ 757</u>
--	---------------

Req. 6

As of December 31, 2013, the financing for Ethan Allen's investment in assets has come primarily from liabilities. Liabilities financed \$395,000,000 of the company's total assets and shareholders' equity financed \$362,000,000.

Req. 7

As of September 30, 2013, Ethan Allen had \$297 of current assets ( $\$106 + 13 + 13 + 142 + 23$ ) and \$145 of current liabilities ( $\$121 + 1 + 23$ ), yielding a current ratio of 2.05. Although considered a strong level of liquidity, Ethan Allen's ratio is less than the 4.73 for LinkedIn, so LinkedIn was in a better position to pay liabilities as they come due in the next year.

## ANSWERS TO GROUP B PROBLEMS

### PB2-1

Req. 1

<u>Assets</u>			=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>	
<u>Cash</u>	<u>Equipment</u>	<u>Buildings</u>	=	<u>Notes Payable</u>		<u>Common Stock</u>	<u>Retained Earnings</u>
(a) +109,000			=			+109,000	
(b) +186,000			=	+186,000			
(c) No effect			=				
(d) -200,000		+200,000	=				
(e) -12,000	+44,000		=	+32,000			
(f) +4,000	-4,000		=				
<hr/>				<hr/>		<hr/>	
+87,000	+40,000	+200,000	=	+218,000		+109,000	
Changes	+ \$327,000			+ \$218,000		+ \$109,000	

Req. 2

The transaction between the stockholder and another investor (event c) was not included in the spreadsheet. Because event (c) occurs between an owner and another investor, the separate entity assumption implies this transaction does not affect the business.

Req. 3

- (a) Beginning total assets \$2,255,000 + Changes \$327,000 = \$2,582,000 Ending total assets
- (b) Beginning total liabilities \$1,780,000 + Changes \$218,000 = \$1,998,000 Ending total liabilities
- (c) Ending total assets \$2,582,000 – Ending total liabilities \$1,998,000 = Ending stockholders' equity \$584,000

Or, Beginning stockholders' equity \$475,000 + Changes in stockholders' equity \$109,000 = Ending stockholders' equity \$584,000.

**PB2-1 (continued)**

Req. 4

As of December 31, Swish Watch Corporation's assets were financed primarily by liabilities. Swish Watch Corporation's liabilities financed \$1,998,000 of the company's total assets and stockholders' equity financed \$584,000.

## PB2-3 (continued)

Req. 4

The negotiations to purchase a coffee farm were not included in the transactions. Because event (e) involves only negotiations, it does not constitute an exchange of cash, goods, or services and thus is not a transaction.

Req. 5

**STARBUCKS**  
**Balance Sheet**  
At December 31, 2013  
(in millions of dollars)

**Assets**

*Current Assets*

Cash	\$ 6,760
Short-term Investments	660
Accounts Receivable	560
Inventory	1,110
Prepaid Rent	<u>570</u>
<i>Total Current Assets</i>	9,660

Property, Plant, and Equipment	16,720
Intangible Assets	<u>3,850</u>
<b>Total Assets</b>	<u><b>\$30,230</b></u>

**Liabilities**

*Current Liabilities*

Accounts Payable	\$ 4,110
Salaries and Wages Payable	<u>470</u>
<i>Total Current Liabilities</i>	4,580

Notes Payable (long-term)	<u>11,160</u>
<b>Total Liabilities</b>	<u><b>15,740</b></u>

**Stockholders' Equity**

Common Stock	10,350
Retained Earnings	<u>4,140</u>
<b>Total Stockholders' Equity</b>	<u><b>14,490</b></u>

<b>Total Liabilities and Stockholders' Equity</b>	<u><b>\$30,230</b></u>
---	------------------------

Req. 6

As of December 31, 2013, financing for Starbucks' assets has come primarily from liabilities. Stockholders' equity financed \$14,490,000,000 of the company's total assets and liabilities financed \$15,740,000,000.

## PB2-3 (continued)

Req. 7

### Starbucks

$$\text{Current Ratio} = \frac{\$5,460^*}{\$5,380^{**}} = 1.01$$

### Apple

$$\text{Current Ratio} = \frac{\$73,300}{\$43,700} = 1.68$$

\* (\$2,560 Cash + \$560 AR + \$1,110 Inventory + \$570 Prepaid + \$660 Invest = \$5,460)

\*\* (\$4,110 AP + \$1,270 Salaries & Wages Payable = \$5,380)

Apple was in a better position to pay current liabilities because for every dollar of liabilities, Apple had \$1.68 of current assets, whereas Starbucks had \$1.01 of current assets for every dollar of current liabilities.

## ANSWERS TO SKILLS DEVELOPMENT CASES

### S2-1

1. D
2. B
3. B
4. A

### S2-2

Req. 1

Lowe's:

Assets = Liabilities + Shareholders' Equity

$$\$32,732,000,000 = \$20,879,000,000 + \$11,853,000,000$$

The Home Depot:

Assets = Liabilities + Shareholders' Equity

$$\$40,518,000,000 = \$27,996,000,000 + \$12,522,000,000$$

The Home Depot is larger in terms of total assets of \$40,518,000,000 compared to Lowe's total assets of \$32,732,000,000.

Req. 2

Lowe's current liabilities of \$8,876,000,000 are less than the \$10,749,000,000 reported by The Home Depot.

The Home Depot:

$$\text{Current Ratio} = \frac{\$15,279}{\$10,749} = 1.42$$

Lowes:

$$\text{Current Ratio} = \frac{\$10,296}{\$8,876} = 1.16$$

The Home Depot has a larger current ratio, implying better ability to pay current liabilities as they come due.

Req. 3

The amount reported for inventory on the balance sheet represents the original cost of the products to Lowe's, not the expected selling price. The cost principle requires that transactions be recorded at their original cost to the company.

## S2-2 (continued)

Req. 4

Financing for the Lowe's investment in assets has come more from liabilities than stockholders' equity. Lowe's liabilities have financed \$20,879,000,000 of the total assets of the company and stockholders' equity has financed \$11,853,000,000.

The more the company has in assets and the less it has in liabilities, the more likely the company will be able to pay all that it owes to creditors, making the company a less risky investment. To predict whether a company is likely to pay all that it owes to creditors and still have something left over to pay out to owners, creditors and investors consider the relative amounts of assets, liabilities, and shareholders' equity. To calculate the percentage of assets financed by creditors, simply divide total liabilities by total assets and multiply by 100.

Lowe's	$\frac{\text{Total liabilities}}{\text{Total assets}} \times 100 = - \frac{20,879,000,000}{32,732,000,000} \times 100 = 63.8\%$
Home Depot	$\frac{\text{Total liabilities}}{\text{Total assets}} \times 100 = - \frac{27,996,000,000}{40,518,000,000} \times 100 = 69.1\%$

This places Lowe's in a less risky financial position for investors because it has a smaller percentage of its assets financed by creditors (or liabilities).

## S2-3

The solution to this team project will depend on the companies and/or accounting period selected for analysis.

## S2-4

Req. 1

Assets = Liabilities + Stockholders' Equity

$$\$15,000 = \$15,000 + 0$$

Ponzi received \$15,000 cash (\$5,000 from each of the three lenders) in exchange for a promise to repay that money in 90 days. The 50% interest that Ponzi is paying is not a factor in the accounting equation yet because interest is not owed until time has passed. As of December 27, 1919, the interest is just a promise and so no transaction has occurred.

Req. 2

If two of the lenders are repaid their original loan plus the 50% interest there will be no cash left in the business to repay the third lender. It was possible for Ponzi to remain in "business" for 8 months because he continued to collect more money from new lenders, which was used to repay the other lenders.

Req. 3

With the exception of Ponzi and his first lenders (family and friends), almost everyone who provided funds to him was harmed financially. Beyond that, the credibility of all new businesses and their founders was called into question. Ultimately, schemes like Ponzi's led to the creation of accounting rules and stock regulation, but not until thousands of innocent people lost millions of dollars.

## S2-5

### Req. 1

The president is concerned with the amount of assets that are reported on the balance sheet because investors and creditors judge the riskiness of the company by comparing the amount of recorded assets to liabilities. The greater the amount of the company's assets for a given amount of liabilities, the less risky the company appears to investors and creditors.

### Req. 2

The accounting concept that relates to reporting "Intellectual Abilities" as an asset is measurement and, specifically, the cost principle. In the case of "Intellectual Abilities," the company has not acquired this asset through an identifiable transaction (and there exists no known cost for this asset), so it cannot be reported on the balance sheet as an asset.

### Req. 3

The accounting concept that relates to reporting the land is the cost principle, which requires that nonfinancial investments such as land be reported at cost even if an appraisal suggests it is worth more. In this case, if the op in land value is judged to be permanent, conservatism would require that the amount recorded for land be reduced to the lower amount.

### Req. 4

Parties that might be hurt by the president's suggestions include investors, lenders, and other creditors. The bank in particular could be hurt because its managers will consider the company's recorded assets as a benchmark for assessing the company's credit risk. Also, if you were to go along with the president's requests, you also could be personally hurt because you might be charged as an accomplice to fraudulent financial reporting.

You should not report the "Intellectual Abilities" on the balance sheet. Also, you should insist that the amount reported for land be reported at cost, following the cost principle.

## S2-6

The major deficiency in this balance sheet is the inclusion of the owner's personal residence as a business asset. Under the separate entity assumption, each business must be accounted for as a separate organization, apart from its owners. The improper inclusion of this asset as part of Betsey Jordan's business overstates total assets by \$300,000; total assets should be \$105,000 rather than \$405,000, and stockholder's equity should be only \$5,000, rather than \$305,000. Betsey Jordan's business is far riskier than suggested by this balance sheet.

## ANSWERS TO CONTINUING CASE

### CC2-1

Req. 1

- a. Cash (+A) ..... 80,000  
     Common Stock (+SE) ..... 80,000
- b. Land (+A) ..... 9,000  
     Cash (-A) ..... 2,000  
     Note Payable (long-term) (+L) ..... 7,000
- c. This is an exchange of only promises, so it is not a transaction.
- d. Equipment (+A).....18,000  
     Cash (-A)..... 18,000
- e. Supplies (+A) ..... 1,000  
     Accounts Payable (+L) ..... 1,000
- f. Accounts Payable (-L) ..... 350  
     Cash (-A).....350
- g. No transaction. Separate entity assumption.

Cash (A)		Supplies (A)		Equipment (A)	
Beg.	0	Beg.	0	Beg.	0
(a)	80,000	(e)	1,000	(d)	18,000
	2,000 (b)				
	18,000 (d)				
	350 (f)				
End.	59,650	End.	1,000	End.	18,000

Land (A)		Accounts Payable (L)	
Beg.	0	Beg.	0
(b)	9,000	(f)	350
End.	9,000	(e)	1,000
		End.	650

Notes Payable (long-term) (L)		Common Stock (SE)	
	0 Beg.		0 Beg.
	7,000 (b)		80,000 (a)
End.	7,000	End.	80,000

## CC2-1 (Continued)

Req. 3

NICOLE'S GETAWAY SPA  
Balance Sheet  
At April 30

Assets	
<i>Current Assets</i>	
Cash	\$ 59,650
Supplies	<u>1,000</u>
<i>Total Current Assets</i>	60,650
Equipment	18,000
Land	<u>9,000</u>
<i>Total Assets</i>	<u><u>\$ 87,650</u></u>
Liabilities	
<i>Current Liabilities</i>	
Accounts Payable	\$ <u>650</u>
<i>Total Current Liabilities</i>	650
Notes Payable	<u>7,000</u>
<i>Total Liabilities</i>	<u><u>7,650</u></u>
Stockholders' Equity:	
Common Stock	80,000
Retained Earnings	<u>0</u>
<i>Total Stockholders' Equity</i>	<u>80,000</u>
<i>Total Liabilities and Stockholders' Equity</i>	<u><u>\$ 87,650</u></u>

Req. 4

The current ratio indicates the proportion of current assets relative to current liabilities. As of April 30, NGS has 93.3 times more current assets than current liabilities ( $\$60,650 \div \$650 = 93.3$ ). Clearly, NGS is presently able to pay its current liabilities with no difficulty. Nevertheless, this is likely to change in the future when some of the initial start-up cash is used to operate the company.
