Chapter 2 Recording Business Transactions

Review Questions

- 1. The three categories of the accounting equation are assets, liabilities, and equity. Assets include Cash, Accounts Receivable, Notes Receivable, Prepaid Expenses, Land, Building, Equipment, Furniture, and Fixtures. Liabilities include Accounts Payable, Notes Payable, Accrued Liability, and Unearned Revenue. Equity includes Owner's Capital, Owner's Withdrawals, Revenue, and Expenses.
- 2. Companies need a way to organize their accounts so they use a chart of accounts. Accounts starting with 1 are usually Assets, 2 Liabilities, 3 Equity, 4 Revenues, and 5 Expenses. The second and third digits in account number indicate where the account fits within the category.
- 3. A chart of accounts and a ledger are similar in that they both list the account names and account numbers of the business. A ledger, though, provides more detail. It includes the increases and decreases of each account for a specific period and the balance of each account at a specific point in time.
- 4. With a double-entry you need to record the dual effects of each transaction. Every transaction affects at least two accounts.
- 5. A T-account is a shortened form of each account in the ledger. The debit is on the left side, credit on the right side, and the account name is shown on top.
- 6. Debits are increases for assets, owner's withdrawals, and expenses. Debits are decreases for liabilities, owner's capital, and revenue.
- 7. Credits are increases for liabilities, owner's capital, and revenue. Credits are decreases for assets, owner's withdrawal, and expenses.

- 8. Assets, owner's withdrawal, and expenses have a normal debit balance. Liabilities, owner's capital, and revenue have a normal credit balance.
- 9. Source documents provide the evidence and data for accounting transactions. Examples of source documents a business would have are: bank deposit slips, purchase invoices, bank checks, and sales invoices
- 10. Transactions are first recorded in a journal, which is the record of transactions in date order.

Horngren's Accounting 10/e Solutions Manual

2-1

- 11. Step 1: Identify the accounts and the account type. You need this information before you can complete the next step. Step 2: Decide if each account increases or decreases using the rules of debits and credits. Reviewing the rules of debits and credits, we use the accounting equation to help determine debits and credits for each account. Step 3: Record transactions in the journal using journal entries. Step 4: Post the journal entry to the ledger. When journal entries are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date on the journal entry should also be transferred to the accounts in the ledger. Step 5: Determine whether the accounting equation is in balance. After each entry the accounting equation should always be in balance.
- **12.** Part 1: Date of the transaction. Part 2: Debit account name and dollar amount. Part 3: Credit account name and dollar amount. The credit account name is indented. Part 4: Brief explanation.
- 13. When transactions are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date of the journal entry is also transferred to the accounts in the ledger. The posting reference columns in the journal and ledger are also completed. In a computerized system, this step is completed automatically when the transaction is recorded in the journal.
- **14.** The trial balance is used to prove the equality of total debits and total credits of all accounts in the ledger; it is also used to prepare the financial statements.
- **15.** A trial balance verifies the equality of total debits and total credits of all accounts on the trial balance and is an internal document used only by employees of the company. The balance sheet, on the other hand, presents the business's accounting equation and is a financial statement that can be used by both internal and external users.
- **16.** If total debits equal total credits on the trial balance, it does not mean that the trial balance is error-free. An incorrect amount could have been used, an entry could have been completely missed, or the wrong account title could have been debited or credited .
- **17.** The debt ratio is calculated by dividing total liabilities by total assets and shows the proportion of assets financed with debt. It can be used to evaluate a business's ability to pay its debts.

Short Exercises

S2-1

- a. Notes Receivable (A)
 b. Nations, Capital (E)
 c. Prepaid Insurance (A)
 d. Notes Payable (L)

 f. Taxes Payable (L)
 g. Rent Expense (E)
 h. Furniture (A)
 i. Nations, Withdrawals
- d. Notes Payable (L)

 e. Rent Revenue (E)

 i. Nations, Withdrawals (E)
 j. Unearned Revenue (L)

S2-2

a. Increase to Accounts Receivable (DR)
b. Decrease to Unearned Revenue (DR)
c. Decrease to Cash (CR)
d. Increase to Interest Expense (DR)
e. Increase to Salaries Payable (CR)
f. Decrease to Prepaid Rent (CR)
g. Increase to Perez, Capital (CR)
h. Increase to Notes Receivable (DR)
i. Decrease to Accounts Payable (DR)
j. Increase to Interest Revenue (CR)

S2-3

a. Notes Payable (CR)
b. Harris, Withdrawals (DR)
c. Service Revenue (CR)
d. Land (DR)
e. Unearned Revenue (CR)

f. Harris, Capital (CR)
g. Utilities Expense (DR)
h. Office Supplies (DR)
i. Advertising Expense (DR)
j. Interest Payable (CR)

Decision Case 2-2

Requirement 1

The advantage of double-entry bookkeeping it that it provides an arithmetic check on the accounting transactions; the total debits and total credits have to equal, and something is wrong if they don't. Double-entry bookkeeping can also handle a higher number of transactions than using the accounting equation.

Requirement 2

The bank uses the term "credit your account" when you deposit money, because it is crediting a liability on their books. They owe you the funds that you just deposited.

Ethical Issue 2-1

The bank has a standing agreement with Better Days Ahead for overdrafts, so as long as transactions are compliant with terms of the agreement, there is no ethical issue. The exercise refers to Better Days Ahead managing funds "wisely." However, whether funds are managed wisely or not is a matter of prudent business management and not an ethical issue. Presumably if Better Days Ahead was exceeding the terms of the agreement, the bank would cancel the arrangement.

Some students may point out that the agreement was for times when donations were running low, whereas the reasons given for the overdraft are for expansion and fundraising. If this is interpreted to mean that Better Days Ahead is abusing the privilege according to the terms of the agreement, then there may be an ethical issue involved, but that is not made clear by the information given.

Students may approve of Henson's cash management if the arrangement is beneficial to Better Days Ahead, and thus helps them accomplish their charitable mission more effectively. Students may disapprove of Henson's cash management if (a) they feel it is "unwise" (poor business management), or (b) if they believe he is exceeding the terms of the agreement.

Fraud Case 2-1

Requirement 1

By changing an expense to an asset, the total expenses will decrease and net income will increase.

Requirement 2

The CEO gained by earning a bonus, and the accounting manager may have gained by getting favorable treatment from the CEO. The shareholders of the company lost, because the company paid out the bonus under fraudulent conditions.

Financial Statement Case 2-1

Requirement 1

```
Debt ratio = Total liabilities / Total assets
= $2,973.1 (in millions) / $7,360.4 (in millions)
= 0.403* = 40.3%
* rounded
```

Requirement 2

Starbucks has approximately the same debt ratio than Green Mountain (40.0%).

Team Project 2-1

Requirements 1 and 2

Student answers will vary widely, as the various groups use the charts of accounts of different businesses. The financial statements that the students prepare should be consistent with the business's chart of accounts.

Communication Activity 2-1

Debits are on the left, credits are on the right. Normal balance for assets, expenses, and withdrawals is a debit. For liability, equity, and revenue accounts, the normal balance is a credit.
