On December 31, 2013, Goodwin issued \$600 in debt and 30 shares of its \$10 par value common stock to the owners of Corr to acquire all of the outstanding shares of that company. Goodwin shares had a fair value of \$40 per share. Goodwin paid \$25 to a broker for arranging the transaction. Goodwin paid \$35 in stock issuance costs. Corr's equipment was actually worth \$1,400 but its buildings were only valued at \$560.

Compute the consolidated retained earnings at December 31, 2013.

- A. \$2,800.
- B. \$2,825.
- C. \$2,850.
- D. \$3,425.
- E. \$3,450.

$\$2,850 - \$25 \text{ Broker Expense} = \$2,825$

56. Carnes has the following account balances as of May 1, 2012 before an acquisition transaction takes place.

Inventory	\$100,000
Land	400,000
Buildings (net)	500,000
Common stock (\$10 par)	600,000
Additional paid-in capital	200,000
Retained Earnings	200,000
Revenues	450,000
Expenses	250,000

The fair value of Carnes' Land and Buildings are \$650,000 and \$550,000, respectively. On May 1, 2012, Riley Company issues 30,000 shares of its \$10 par value (\$25 fair value) common stock in exchange for all of the shares of Carnes' common stock. Riley paid \$10,000 for costs to issue the new shares of stock. Before the acquisition, Riley has \$700,000 in its common stock account and \$300,000 in its additional paid-in capital account.

What will be the consolidated additional paid-in capital as a result of this acquisition?

- A. \$440,000.
- B. \$740,000.
- C. \$750,000.
- D. \$940,000.
- E. \$950,000.

94. What is the primary difference between recording an acquisition when the subsidiary is dissolved and when separate incorporation is maintained?

When the subsidiary is dissolved, the acquirer records in its books the fair value of individual assets and liabilities acquired as well as the resulting goodwill from the acquisition. However, when separate incorporation is maintained, the acquirer only records the total fair value of assets and liabilities acquired, as well as the resulting goodwill, in one account as an investment.

99. For acquisition accounting, why are assets and liabilities of the subsidiary consolidated at fair value?

The acquisition transaction is assumed to occur through an orderly transaction between market participants at the measurement date of the acquisition. Thus identified assets and liabilities acquired have been assigned fair value for the transfer to the acquirer and this is a relevant and faithful representation for consolidation.

100. Goodwill is often acquired as part of a business combination. Why, when separate incorporation is maintained, does Goodwill not appear on the Parent company's trial balance as a separate account?

While the Goodwill does not appear on the Parent company's books, it is implied as part of the account called Investment in Subsidiary. During the consolidation process, the Investment account is broken down into its component parts. Goodwill, along with other items such as subsidiary fair value adjustments, is then shown separately as part of the consolidated financial statement balances.

Topic: Acquisition-Date Fair-Value Allocations-Additional Issues

101. How are direct combination costs, contingent consideration, and a bargain purchase reflected in recording an acquisition transaction?

The acquisition method embraces a fair value concept as measured by the fair value of consideration transferred. (1) Direct combination costs are expensed as incurred; (2) Contingent consideration obligations are recognized at their present value of the potential obligation as part of the acquisition consideration transferred; (3) When a bargain purchase occurs, the acquirer measures and recognizes the fair values of each of the assets acquired and liabilities assumed at the date of the combination, and as a result a gain on the bargain purchase is recognized at the acquisition date.

102. How is contingent consideration accounted for in an acquisition business combination transaction?

The fair value approach of the acquisition method views contingent payments as part of the consideration transferred. Under this view, contingencies have a value to those who receive the consideration and represent measurable obligations of the acquirer. The amount of the contingent consideration is measured as the expected present value of a potential payment and increases the investment value recorded.
