Answer: B

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

- 92) What are three major types of financial markets? Describe what the main characteristics of each market are.

Answer: Equity market - stock market
Bond market - buy and sell bonds
Capital market - long term financing
Money Market - short term financing

- 93) Describe the difference between the primary and the secondary market.

Answer: Primary market is for the sale of NEW securities.
Secondary market is for the sale of already issued securities.

- 94) Describe the difference between the money and the capital market. Provide one example of each type of security that is traded in each market.

Answer: Money market - short term financing Example - commercial paper
Capital market - long term financing Example - bonds, shares

- 95) Describe the difference between the stock market and the fixed income market. Provide one example of each type of security that is traded in each market.

Answer: Stock market - buy and sell shares - shares
Fixed income market - debt - bonds

- 96) Describe what a financial intermediary is and does.

Answer: An organization that raises money from investors and provides financing for individuals, corporations and other organizations.

- 97) Describe what a mutual fund is.

Answer: A managed investment fund, pooling the savings of many investors and investing in a portfolio of securities.

- 98) What is meant by the term of liquidity why is it important?

Answer: The ability to sell or exchange an asset for cash on short notice, without a significant loss in economic value. It is important because bills are normally paid in cash as they become due. Lack of liquidity will lead to default and eventually bankruptcy.

99) Define what cost of capital is and describe why it is important.

Answer: Cost of capital is the minimum required rate of return on capital investments. It is important because it helps an organization differentiate between investments that will increase or decrease the value of the organization.

100) Identify a minimum of four major market factors that contributed to the financial crisis of 2007-2009.

Answer: 1. The Federal Reserve for its easy money policy
2. The US government for encouraging banks to expand credit for low income housing
3. The rating agencies for providing triple-A ratings for mortgage bonds that shortly afterward went into default
4. Bankers for promoting and reselling subprime mortgages.
