53. Discuss adding or deleti	ng a table in a query.	
ANSWER:	You might want to add a table's field list to the upper pane of Query Design View to s fields from that table for the query. To add a new table to Query Design View, drag it the Navigation Pane to Query Design View, or click the Show Table button on the De tab, then add the desired table(s). To delete an unneeded table from Query Design Vie click its title bar, then press [Delete].	from sign

54. Compare the capabilities	s of queries and filters.	
ANSWER:	* Queries are saved as objects in the database. Filters are not.	
	* Both can be used to select a subset of records in a datasheet.	
	* Only queries are used to select a subset of fields in a datasheet.	
	* The resulting datasheet from both filters and queries can be used to enter and	edit
	data. * The resulting datasheet from both filters and queries can be used to sort, filter, and find records.	
	* Queries but not filters are commonly used as the source of data for a form or	
	report.	
	* Queries but not filters can be used to create calculations across records.	
	* Queries but not filters can be used to create calculated fields.
