A steep drop in plastics production a. World Trade Center bombin	on in 2008-2009 can be attributed to the	
b. financial crisis that started in	_	
c. wars in Afghanistan and Irac		
d. demand for crude oil	1	
ANSWER: b		
	uction by 2020 have been based on the growth	of plastics in a.
aeronautics		
b. space travel		
c. medical technology		
d. the automotive industry		
ANSWER: d		
3. One of the five states that enacted	d bottle deposit laws in the 1970s is	
a. Oregon	•	
b. Pennsylvania		
c. New York		
d. Texas		
ANSWER: a		
4. Recycling is a term generally res	erved for	
a. reuse of waste materials gen		
	als generated during manufacturing	
c. postconsumer waste materia		
d. incineration of waste materia		
ANSWER: c		
5. Why has there been so little succ	ess in bottle deposit laws?	
a. consumers have been slow to	-	
b. major soft drink manufacture		
c. the federal government oppo		

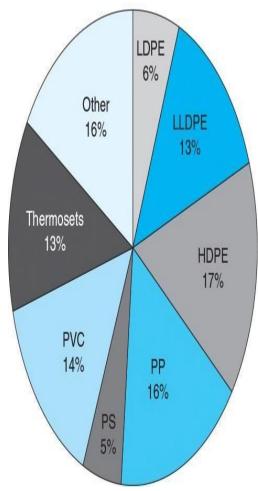

Name:	Class:	Date:
Chapter 02: Current Status of the Plastics Inc	lustry	
d. there is great diversity in state laws conce	rning recycling	

Name:	Class:	Date:
Chapter 02: Current Status of the ANSWER: b	Plastics Industry	
• •	bottle recycling was related to the fact thated materials to be in contact with food	
b. PET bottles has toxic materiac. the FDA imposed steep inspection	ection costs on recycled PET	
d. PET bottles were an alloy of ANSWER: a	unknown substances	
7. Because residents often make mis	stakes in sorting plastic containers, many large of	communities accept a.
b. only HDPE plastics		
c. only nonplastics		
d. commingled materials		
ANSWER: d		
8. In recycling collection trucks, the plastics	greatest volume collected isa.	
b. mixed paper		
c. cardboard		
d. aluminum cans		
ANSWER: a		
9. In a materials recovery facility (N	IRF), the conveyor belts that move recycled ma	aterials past employees who sort them
are called		
a. sorting lines		
b. magnetic sorting features		
c. picking lines		
d. baling lines		
ANSWER: c		
10. Natural HDPE bottles are mostl a. clear bottles	y	
b. opaque bottles suitable for bl	each	
c. juice containers		
d. milk jugs		
ANSWER: d		
11. What is the process in which a bupdraft?	slower system separates the fine pieces out that	are too light to fall through a controlled
a. baling		
b. elutriation		
c. decanting		

Name:	Class:	Date:
Chapter 02: Current Status of the Plastics	Industry	
d. flotation		
ANSWER: b		
12. Automatic sorting systems detect the chera. single wavelength infrared (IR)	mical makeup of material, such as the	systems that detect opacity.
b. multiple wavelength IR		
c. optical		
d. X-ray		
ANSWER: a		
13. The type of depolymerization that produc a. pyrolysis	ces useful monomers is called	
b. decomposition		
c. hydrolysis		
d. liquefaction		
ANSWER: c		
14. What is an advantage of incineration? a. it is environmentally friendly		
b. it is very economical		
c. it provides an 10% to 20% reduction i	n the volume of the solid waste	
d. it does not require sorting of the solid		
ANSWER: d	wastes	
15. Polymer materials that derive from renew as	vable resources, such as corn rather than	petroleum-based plastics are known
a. degradable plastics		
b. bioplastics		
c. biodegradable plastics		
d. hydrolyzed plastics		
ANSWER: b		
16. This pie chart shows thatrepresents	s the highest percentage of production.	

Name:	Class.	Date:

<u>Chapter 02: Current Status of the Plastics Industry</u>
Distribution of US Production

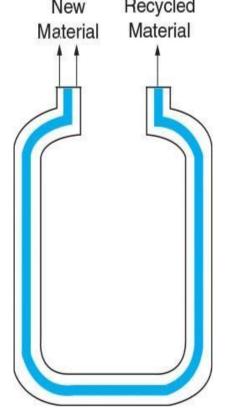

- a. low-density polyethylene
- b. polyvinyl chloride
- c. high-density polyethylene
- d. polystyrene

ANSWER: c

17. This figure shows an early idea to remedy the problem of the FDA not allowing the use of_____in food contact applications.

Name [.]	Class.	Date:

Chapter 02: Current Status of the Plastics Industry New Recycled

- a. PVS
- b. HDPE
- c. plastics
- d. recycled materials

ANSWER: d
