Chapter 2—A Review of the Accounting Cycle

MULTIPLE CHOICE

1. In an accrual accounting system,
 - a. all accounts have normal debit balances.
 - b. a debit entry is recorded on the left-hand side of an account.
 - c. liabilities, owner's capital, and dividends all have normal credit balances.
 - d. revenues are recorded only when cash is received.

ANS: B PTS: 1 DIF: Easy OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Analytic

2. A common business transaction that would *not* affect the amount of owners' equity is
 - a. signing a note payable to purchase equipment.
 - b. payment of property taxes.
 - c. billing of customers for services rendered.
 - d. payment of dividends.

ANS: A PTS: 1 DIF: Medium OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Analytic

3. Failure to record the expired amount of prepaid rent expense would *not*
 - a. understate expense.
 - b. overstate net income.
 - c. overstate owners' equity.

d. understate liabilities.

ANS: D PTS: 1 DIF: Medium OBJ: LO 3
TOP: AICPA FN-Measurement MSC: AACSB Analytic

4. On June 30, a company paid \$3,600 for insurance premiums for the current year and debited the amount to Prepaid Insurance. At December 31, the bookkeeper forgot to record the amount expired. The omission has the following effect on the financial statements prepared December 31: a. overstates owners' equity.
b. overstates assets.
c. understates net income.
d. overstates both owners' equity and assets.

ANS: D PTS: 1 DIF: Medium OBJ: LO 3
TOP: AICPA FN-Measurement MSC: AACSB Analytic

5. A chart of accounts is a
a. subsidiary ledger.
b. listing of all account titles.
c. general ledger.
d. general journal.

ANS: B PTS: 1 DIF: Easy OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Analytic

6. Which of the following criteria must be met before an event should be recorded for accounting purposes?
a. The event must be an arm's-length transaction.
b. The event must be repeatable in a future period.
c. The event must be measurable in financial terms.
d. The event must be disclosed in the reported footnotes.

ANS: C PTS: 1 DIF: Medium OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Reflective Thinking

7. Adjusting entries normally involve
a. real accounts only.
b. nominal accounts only.
c. real and nominal accounts.
d. liability accounts only.

ANS: C PTS: 1 DIF: Easy OBJ: LO 3

TOP: AICPA FN-Measurement

MSC: AACSB Analytic

8. Which of the following is an item that is reportable in the financial records of an enterprise?
- The value of goodwill earned through business operations
 - The value of human resources
 - Changes in personnel
 - Changes in inventory costing methods

ANS: D

PTS: 1

DIF: Medium

OBJ: LO 1

TOP: AICPA FN-Reporting

MSC: AACSB Reflective Thinking

9. The balance in a deferred revenue account represents an amount that is

	<u>Earned</u>	<u>Collected</u>
a.	Yes	Yes
b.	Yes	No
c.	No	Yes
d.	No	No

ANS: C

PTS: 1

DIF: Easy

OBJ: LO 3

TOP: AICPA FN-Measurement

MSC: AACSB Analytic

10. The debit and credit analysis of a transaction normally takes place when the
- entry is posted to a subsidiary ledger.
 - entry is recorded in a journal.
 - trial balance is prepared.
 - financial statements are prepared.

ANS: B

PTS: 1

DIF: Easy

OBJ: LO 2

TOP: AICPA FN-Measurement

MSC: AACSB Reflective Thinking

11. A trial balance is useful because it indicates that
- owners' equity is correct.
 - net income is correct.
 - all entries were made correctly.
 - total debits equal total credits.

ANS: D

PTS: 1

DIF: Medium

OBJ: LO 3

TOP: AICPA FN-Measurement

MSC: AACSB Analytic

12. Which of the following would typically be considered a source document?
- Chart of accounts
 - General ledger

- c. General journal
- d. Invoice received from seller

ANS: D PTS: 1 DIF: Easy OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Reflective Thinking

13. Which of the following is *not* among the first five steps in the accounting cycle?
- a. Record transactions in journals.
 - b. Record closing entries.
 - c. Adjust the general ledger accounts.
 - d. Post entries to general ledger accounts.

ANS: B PTS: 1 DIF: Easy OBJ: LO 1
TOP: AICPA FN-Measurement MSC: AACSB Reflective Thinking

14. A routine collection on a customer's account was recorded and posted as a debit to Cash and a credit to Sales Revenue. The journal entry to correct this error would be
- a. a debit to Sales Revenue and a credit to Accounts Receivable.
 - b. a debit to Sales Revenue and a credit to Unearned Revenue.
 - c. a debit to Cash and a credit to Accounts Receivable.
 - d. a debit to Accounts Receivable and a credit to Sales Revenue.

ANS: A PTS: 1 DIF: Medium OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Analytic

15. An accrued expense can be described as an amount
- a. paid and matched with earnings for the current period.
 - b. paid and not matched with earnings for the current period.
 - c. not paid and not matched with earnings for the current period.
 - d. not paid and matched with earnings for the current period.

ANS: D PTS: 1 DIF: Medium OBJ: LO 3
TOP: AICPA FN-Measurement MSC: AACSB Analytic

16. Which of the following errors will be detected when a trial balance is properly prepared?
- a. An amount that was entered in the wrong account
 - b. A transaction that was entered twice
 - c. A transaction that had been omitted
 - d. None of these

ANS: D PTS: 1 DIF: Medium OBJ: LO 3

17. The premium on a two-year insurance policy expiring on June 30, 2015, was paid in total on July 1, 2013. The original payment was debited to the insurance expense account. The appropriate journal entry has been recorded on December 31, 2013. The balance in the prepaid asset account on December 31, 2013, should be
- the same as the original payment.
 - higher than if the original payment had been initially debited to an asset account.
 - lower than if the original payment had been initially debited to an asset account.
 - the same as it would have been if the original payment had been initially debited to an asset account.

ANS: D

PTS: 1

DIF: Medium

ANS: A PTS: 1 DIF: Easy OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Analytic

26. Which of the following is presented in a balance sheet?

- a. Prepaid expenses
- b. Revenues
- c. Net income
- d. Gains

ANS: A PTS: 1 DIF: Easy OBJ: LO 2
TOP: AICPA FN-Reporting MSC: AACSB Reflective Thinking

27. If an expense has been incurred but not yet recorded, then the end-of-period adjusting entry would involve

- a. a liability account and an asset account.
- b. a liability account and a revenue account.
- c. a liability and an expense account.
- d. a receivable account and a revenue account.

ANS: C PTS: 1 DIF: Medium OBJ: LO 3
TOP: AICPA FN-Measurement MSC: AACSB Analytic

28. Failure to record depreciation expense at the end of an accounting period results in a. understated income.

- b. understated assets.
- c. overstated expenses.
- d. overstated assets.

ANS: D PTS: 1 DIF: Easy OBJ: LO 3
TOP: AICPA FN-Measurement MSC: AACSB Analytic

29. Iowa Cattle Company uses a perpetual inventory system. Iowa purchased cattle from Big D Ranch at a cost of \$19,500, payable at time of delivery. The entry to record the delivery would be

a.	Purchases	19,500	
	Accounts Payable		19,500
b.	Inventory	19,500	
	Accounts Payable		19,500
c.	Purchases	19,500	

	Cash		19,500
d.	Inventory	19,500	
	Cash		19,500

ANS: D PTS: 1 DIF: Easy OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Analytic

30. Beginning and ending Accounts Receivable balances were \$28,000 and \$24,000, respectively. If collections from clients during the period were \$80,000, then total services rendered on account were apparently
- \$76,000.
 - \$84,000.
 - \$104,000.
 - \$108,000.

ANS: A PTS: 1 DIF: Easy OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Analytic

31. For a given year, beginning and ending total liabilities were \$8,400 and \$10,000, respectively. At year-end, owners' equity was \$26,000 and total assets were \$2,000 larger than at the beginning of the year. If new capital stock issued exceeded dividends by \$2,400, net income (loss) for the year was apparently
- (\$2,800).
 - (\$2,000).
 - \$400.
 - \$2,800.

ANS: B PTS: 1 DIF: Challenging OBJ: LO 2
TOP: AICPA FN-Measurement MSC: AACSB Analytic

32. The Supplies on Hand account balance at the beginning of the period was \$6,600. Supplies totaling \$12,825 were purchased during the period and debited to Supplies on Hand. A physical count shows \$3,825 of Supplies on Hand at the end of the period. The proper journal entry at the end of the period
- debits Supplies on Hand and credits Supplies Expense for \$9,000.
 - debits Supplies Expense and credits Supplies on Hand for \$12,825.
 - debits Supplies on Hand and credits Supplies Expense for \$15,600.
 - debits Supplies Expense and credits Supplies on Hand for \$15,600.

ANS: D PTS: 1 DIF: Easy OBJ: LO 3
TOP: AICPA FN-Measurement MSC: AACSB Analytic

33. Arid Company paid \$1,704 on June 1, 2013, for a two-year insurance policy and recorded the entire amount as Insurance Expense. The December 31, 2013, adjusting entry is
- debit Prepaid Insurance and credit Insurance Expense, \$497.
 - debit Insurance Expense and credit Prepaid Insurance, \$497.
 - debit Insurance Expense and credit Prepaid Insurance, \$1,207.

d. debit Prepaid Insurance and credit Insurance Expense, \$1,207.

ANS: D PTS: 1 DIF: Medium OBJ: LO 3
TOP: AICPA FN-Measurement MSC: AACSB Analytic

34. Moon Company purchased equipment on November 1, 2013, by giving its supplier a 12-month, 9 percent note with a face value of \$48,000. The December 31, 2013, adjusting entry is a. debit Interest Expense and credit Cash, \$720.
- b. debit Interest Expense and credit Interest Payable, \$720.
 - c. debit Interest Expense and credit Interest Payable, \$1,080.
 - d. debit Interest Expense and credit Interest Payable, \$4,320.

TOP: AICPA FN-Measurement MSC: AACSB Analytic

43. Bannister Inc.'s fiscal year ended on November 30, 2013. The accounts had not been adjusted for the fiscal year ending November 30, 2013. The balance in the prepaid insurance account as of November 30, 2013, was \$35,200 (before adjustment at Nov. 30, 2013) and consisted of the following policies:

<u>Policy Number</u>	<u>Date of Purchase</u>	<u>Date of Expiration</u>	<u>Balance in Account</u>
279248	7/1/2013	6/30/2014	\$14,400
694421	12/1/2011	11/30/2013	9,600
800616	4/1/2012	3/31/2014	<u>11,200</u>
			<u>\$35,200</u>

The adjusting entry required on November 30, 2013, would be

a. Insurance Expense	24,000	
Prepaid Insurance		24,000
b. Insurance Expense	9,600	
Prepaid Insurance		9,600
c. Insurance Expense	11,200	
Prepaid Insurance		11,200
d. Insurance Expense	16,400	

Prepaid Insurance 16,400

ANS: A

#279248:

\$14,400 balance represents twelve months of coverage left since no adjustment has been made at Nov. 30, 2013. $\$14,400/12 = \$1,200/\text{month}$. Policy was purchased on 7/1/13, so five months have expired, or $\$1,200 \times 5 \text{ mos.} = \mathbf{\$6,000 \text{ that should be expensed for year ending 11/30/2013.}}$

#694421:

The entire balance of \$9,600 should be expensed for the year ending 11/30/2013 since the policy expired on Nov. 30, 2013, and the \$9,600 balance represents the final year of prepaid insurance remaining to be expensed, assuming again that no adjustments have been made at Nov. 30, 2013, for the year then ended.

#800616:

The balance of \$11,200 represents 16 months of coverage left at the **beginning** of fiscal year 2013. $\$11,200/16 = \700 . 12 months of prepaid insurance should be expensed for the fiscal year ending 11/30/2013. $12 \text{ months} \times \$700 = \mathbf{\$8,400 \text{ to be expensed for the year ending 11/30/2013.}}$

Total amount to be expensed at 11/30/2013:

#279248	\$ 6,000
#694421	\$ 9,600
#800616	<u>\$ 8,400</u>
Total	<u>\$24,000</u>

8. The following data are from a comparison of the balance sheets of Brassie Company as of December 31, 2013, and December 31, 2012:

Accounts Receivable	increase	\$7,600
Inventory	decrease	4,500
Accounts Payable	increase	2,400 (all accounts
payable relate to inventory		purchases)
Prepaid Insurance	decrease	1,350
Wages Payable	decrease	670

The following data are from Brassie's 2011 income statement:

Sales	\$200,000
Cost of Goods Sold	110,000
Insurance Expense	25,000
Wages Expense	40,000

During 2013:

- (a) How much cash was collected from customers?
- (b) How much cash was paid for inventory purchases?
- (c) How much cash was paid for insurance?
- (d) How much cash was paid for wages?

ANS:

- (a) $\$200,000 - \$7,600 = \$192,400$
- (b) $\$110,000 - \$4,500 - \$2,400 = \$103,100$
- (c) $\$25,000 - \$1,350 = \$23,650$ (d) $\$40,000 + \$670 = \$40,670$

10. The trial balance and transaction descriptions below are for Coachman Company:

Coachman Company		
Trial Balance		
February 1, 2013		
	<u>Debit</u>	<u>Credit</u>
Cash	\$ 250	
Accounts Receivable	320	
Inventory	495	
Equipment	1,200	
Accumulated Depreciation		\$ 245
Accounts Payable		185
Mortgage Payable		900
Common Stock		300
Retained Earnings		<u>635</u>
	<u>\$2,265</u>	<u>\$2,265</u>

Summary transactions for February:

- (a) Collected \$100 on open account
- (b) Purchased \$130 inventory for \$20 cash and the remainder on open account.
- (c) Bought new equipment costing \$200 for \$50 cash, with the remainder due on a mortgage payable.
- (d) Paid \$85 on open account.
- (e) Recorded depreciation expense of \$35.
- (f) Sold goods costing \$90 for \$30 cash and \$120 on open account.

What is Coachman's total equity at the end of February?

ANS:

		Retained Earnings	
		Begin	635
(e)	35		
(f)	90	(f)	150
			660

Total equity = Retained Earnings \$660 + Common Stock \$300 = \$960.

12. Account balances taken from the ledger of Owens Company on December 31, 2013, are as follows:

Accounts Payable	\$ 23,000
Accounts Receivable	38,000
Accumulated Depreciation--Equipment	64,000
Allowance for Doubtful Accounts	2,000
Patent	8,400
Capital Stock, \$10 par	100,000
Cash	60,260
Inventory	105,000
Sales Supplies Inventory	900
Extraordinary Gain (net of tax)	10,000
Interest Expense	6,600
Inventory, December 31, 2012	104,850
Contributed Capital in Excess of Par Value	15,000

Long-Term Note Receivable, 14%	12,000
Mortgage Payable, 12%	60,000
Investment Revenue	1,120
Accumulated Depreciation-Equipment	64,000
Rent Revenue	3,000
Retained Earnings, December 31, 2012	32,440
Sales	700,000
Cost of Goods Sold	380,000
Selling Expenses	164,400
General and Administrative Expenses	55,000
Equipment	180,000

Adjustments on December 31, 2013, are required as follows:

- (a) Estimated bad debt loss rate is 1/4 percent of credit sales. Credit sales for the year amounted to \$200,000. Classify bad debt expense as a selling expense.
 - (b) Interest on the long-term note receivable was last collected August 31, 2013.
 - (c) Estimated life of the equipment is 10 years, with a residual value of \$20,000. Allocate 10 percent of depreciation expense to general and administrative expense and the remainder to selling expenses. Use straight-line depreciation.
 - (d) Estimated economic life of the patent is 14 years (from January 1, 2013) with no residual value. Straight-line amortization is used. Depreciation expense is classified as selling expense.
 - (e) Interest on the mortgage payable was last paid on November 30, 2013.
 - (f) On June 1, 2013, the company rented some office space to a tenant for one year and collected \$3,000 rent in advance for the year; the entire amount was credited to rent revenue on this date.
 - (g) On December 31, 2013, the company received a statement for calendar year 2013 property taxes amounting to \$1,300. The payment is due February 15, 2014. Assume that the payment will be made on February 15, 2014, and classify expense as selling expense.
 - (h) Sales supplies on hand at December 31, 2013, amounted to \$300; classify as selling expense.
 - (i) Assume an average income tax rate of 40 percent corporate tax rate on all items including the extraordinary gain..
- (1) Prepare an eight-column work sheet.
 - (2) Prepare adjusting and closing entries.

14. The following ten items are independent of each other. For each item, indicate the amount of any cash flow that occurs or state that no cash flow resulted from the item.

1. Prepaid rent decreased \$20,000 during the year. Rent expense recognized for the year amounted to \$30,000.
2. Patent amortization recognized amounted to \$30,000.
3. Net income was \$100,000; retained earnings increased \$60,000; and dividends payable decreased \$20,000.
4. Wages payable decreased \$12,000 and wages expense for the year amounted to \$48,000.
5. The balance in accounts receivable at the beginning of the year was \$600,000, and at the end of the year was \$175,000. Sales for the year were \$1,000,000. The balance of the allowance for doubtful accounts was \$20,000 at the beginning of the year and \$35,000 at the end of the year. Bad debt expense for the year was \$40,000.
6. Sales on account for the year are \$1,000 and the balance in accounts receivable increased \$200 during the year. All sales are on account.
7. Sale at a gain of \$500 of a plant asset costing \$4,000 with \$2,500 of accumulated depreciation.
8. The balance in accumulated depreciation increased \$10,000 for the year. No disposals of plant assets occurred during the year.
9. At the beginning of the fiscal year, merchandise inventory amounted to \$30,000. A physical count at year-end showed \$37,000 worth of inventory on hand. The balance of accounts payable at the beginning of the fiscal year was \$26,000 and at the end of the fiscal year was \$30,000. Cost of goods sold for the fiscal year was \$42,000. The company uses a perpetual inventory system.
10. The retained earnings account decreased \$10,000. Net income for the fiscal year was \$15,000. Dividends payable decreased \$10,000.

ANS:

1. Of the total rent expense, \$20,000 represented the expiration of prepaid rent paid for an earlier period while \$10,000 of rent was actually paid in cash during the current period.
2. No cash flow is associated with depreciation or amortization; these are noncash expenses.
3. Dividends declared equals $\$100,000 - \$60,000 = \$40,000$. Dividends payable decreased \$20,000 such that \$60,000 of dividends were paid.

4. Wages expense for the year was \$48,000 and wages payable decreased by \$12,000, which means that wages paid must have been \$60,000.
5. Begin with the allowance account and determine the amount of the accounts written off ($\$20,000 + \$40,000 - \$35,000 = \$25,000$). Go to the accounts receivable account and calculate the amount of cash collected on receivables ($\$600,000 + \$1,000,000 - \$25,000 - \$175,000 = \$1,400,000$).
6. Sales exceeded cash collections by \$200 since accounts receivable increased resulting in cash flows of \$800.
7. Book value of the plant asset costing \$4,000 with \$2,500 accumulated depreciation is \$1,500. A gain of \$500 results from a selling price of \$1,500 book value + \$500 gain, or \$2,000, the amount of the cash flow in the transaction.
8. Depreciation expense for the year was \$10,000. There was no cash flow since depreciation is a noncash expense.
9. Cash payments to supplies equal \$45,000. This amount is determined by subtracting from cost of goods sold of \$42,000 the \$4,000 increase in accounts payable and adding the \$7,000 increase in inventory.
10. Dividends declared equals $\$15,000 + \$10,000 = \$25,000$. Dividends payable decreased \$10,000 such that dividends paid equals \$35,000.

15. The following information is available for the Central Company:

**Central Company Balance
Sheet
December 31, xxxx**

<u>ASSETS</u>	<u>Current Year</u>	<u>Prior Year</u>
Cash	\$125,000	\$100,000
Accounts Receivable	515,000	500,000
Allowance for Doubtful Accounts	(70,150)	(60,000)
Inventory	660,000	500,000
Prepaid Expenses	80,000	72,000
Equipment	892,000	900,000
Less: Accumulated Depreciation	(460,000)	(452,500)
<u>LIABILITIES</u>		
Accounts Payable	430,000	370,000
Accrued Expenses	250,000	230,000
Income Tax Payable	58,000	50,000

**Central Company
Income Statement**

For Year Ending December 31, xxxx

Sales (all sales are on credit)	\$780,000
Cost of Goods Sold	<u>450,000</u>
Gross Profit	\$330,000
Operating Expenses:	
Bad Debt Expense	25,150
Depreciation Expense	11,500
Other Operating Expenses	160,000
Loss on Sale of Equipment	1,500
Income Tax Expense	43,000

Determine the amount of cash flow associated with each of the following items:

1. Cash receipts from customers.
2. Cash payments to suppliers.
3. Cash payments for other operating expenses.
4. Cash received from sale of equipment (no equipment purchases were made during the year and only one sale of equipment occurred during the years).
5. Cash paid for income taxes.

ANS:

1. Cash flows from sales to customers for the fiscal year equals the amount of cash collected on accounts receivable. The change in accounts receivable cannot be determined without considering the change in the allowance account. The allowance account had a beginning balance of \$60,000, bad debt expense for the year was \$25,150, and the ending balance of the allowance was \$70,150. The amount of accounts written off against the allowance for the year is $\$60,000 + \$25,150 - \$70,150 = \$15,000$. The change in accounts receivable is determined by taking the beginning balance of receivables, adding credit sales, subtracting the amount of accounts written off, and subtracting the ending balance of accounts receivable. This computation is $\$500,000 + \$780,000 - \$15,000 - \$515,000 = \$750,000$, the amount of cash collected from customers.
2. Cash payments to suppliers equals purchases minus increase in accounts payable. Purchases for the period equals cost of goods sold plus increase in inventory, or $\$450,000 + (\$660,000 - \$500,000) = \$610,000$. Change in accounts payable equals $\$430,000 - \$370,000 = \$60,000$. Purchases minus increase in accounts payable equals $\$610,000 - \$60,000 = \$550,000$, the total cash payments to suppliers.
3. Cash payments for other operating expenses equals accrual basis operating expenses plus the increase in prepaid expenses minus the increase in accrued expenses, or $\$160,000 + (\$80,000 - \$72,000) - (\$250,000 - \$230,000) = \$148,000$.
4. Cash received from the sale of equipment equals the original cost of the equipment sold minus the accumulated depreciation on the equipment sold plus the loss on the sale of the equipment. Since no equipment purchases were made during the year, the cost of the equipment sold is $\$892,000 - \$900,000 = \$8,000$. Depreciation on the equipment sold equals the beginning balance of accumulated depreciation plus the depreciation expense during the period minus the ending balance of accumulated depreciation ($\$452,500 +$

- $\$11,500 - \$460,000 = \$4,000$). The loss is given as $\$1,500$. As a result, $\$8,000 - \$4,000 - (1,500) = \$2,500$, the amount of the cash proceeds.
5. Cash paid for income taxes equals income tax expense minus the increase in income tax payable, or $\$43,000 - \$8,000 = \$35,000$.

16. *Statement of Financial Accounting Concepts No. 1* states that one of the objectives of financial reporting is to help “current and potential investors and creditors (and other users) in assessing the amounts, timing, and uncertainty of future cash flows such as dividends or interest payments.” Generally Accepted Accounting Principles (GAAP) require the use of the accrual basis of accounting.

Explain the difference between the accrual basis and the cash basis of accounting and why GAAP requires the accrual basis.

ANS:

Statement of Financial Accounting Concepts No. 1 assumes that investors and creditors are interested in cash-flow information when evaluating investment opportunities. Accrual information helps investors estimate future net cash flows and the risks associated with these flows. The accrual basis is required under Generally Accepted Accounting Principles (GAAP).

Accrual basis accounting requires that an event that alters the economic status of a firm as represented in the firm’s financial statements be recognized in the period in which the event occurs rather than when cash is exchanged. The accrual basis focuses on transactions and related events with cash consequences. Under the accrual basis, revenues are recorded when they are earned and expenses when they are incurred. Recognition of expenses or revenues in the accounting records under the accrual basis often occurs before or after the payment or receipt of cash.

The earnings figure resulting from application of the accrual basis reflects changes in financial position rather than immediate cash consequences. Accrual basis earnings more fully reflect the resource changes affecting the firm’s net assets for a period than does the cash basis. Financial statement users find earnings information valuable because profits determine the long-run success of a company. Accrual measures, including financial statement ratios, have been found by researchers to be more accurate predictors of business failure. Companies with poor operating cash flows can survive for extended periods of time if creditors are willing to renegotiate and restructure debt. Companies that are growing rapidly may have negative cash flows because these companies may need to invest heavily in capital expenditures.

Adjusting journal entries are required under the accrual basis to ensure that revenues are recorded when earned and expenses are recorded when incurred. For example, an adjusting journal entry records interest expense before cash is paid since the passage of time results in the obligation to ultimately pay interest.

A cash basis accounting system reports only the receipt and disbursement of cash. Cash basis accounting requires few, if any adjusting entries. Cash information is far from useless, however.

In the short run, cash flow information is most important since it indicates whether a borrower will produce sufficient cash to pay its liabilities. Creditors are interested in a company's past and future ability to generate positive cash flows.

Research has found that cash flow information increases the overall information content of financial statements. Cash flow information also has been shown to supply risk assessment information beyond that provided by accrual basis earnings information. For example, a company with a strong working capital position but with large amounts of inventories, prepaid expenses, and receivables might be in a weak cash position.

The increasing complexity of financial accounting principles and the increasing complexity of financial statements as a result of applying these principles has increased the demand by financial statement users for cash flow information. Under current accrual basis accounting principles, managers also have flexibility to choose among several reporting choices thus allowing the manipulation of earnings under current GAAP.

The prevailing view currently is that neither cash flow nor accrual basis information alone is sufficient for a complete understanding of a company's performance. The relationships between revenues and cash inflows and between expenses and cash outflows can be understood only by studying both types of information.
