Chapter 02 Test Bank

1. According to the MARS model of individual behavior and performance, employee performance will remain high even if one of the four factors is low in a given situation.

FALSE

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 1 Easy

Topic: Behaviors

Feedback: All four factors in the MARS model are critical influences on an individual's voluntary behavior and performance; if any one of them is low in a given situation, the employee would perform the task poorly.

2. Intensity refers to the fact that motivation is goal-directed, not random.

FALSE

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 1 Easy

Topic: Behaviors

Feedback: Direction refers to the path along which people engage their effort. People have choices about where they put their effort; they have a sense of what they are trying to achieve and at what level of quality, quantity, and so forth. In other words, direction refers to the fact that motivation is goal-directed, not random.

3. Learned capabilities refer to the skills and knowledge that one has actually acquired.

TRUE

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 1 Easy

Topic: Managerial Skills

Feedback: Learned capabilities are the skills and knowledge that one currently possesses. These capabilities include the physical and mental skills and knowledge one has acquired.

4. The four elements of the MARS model affect all voluntary workplace behaviors and performance.

TRUE

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Understand

Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.

Level of Difficulty: 2 Medium

Topic: Behaviors

Feedback: The four elements of the MARS model—motivation, ability, role perceptions, and situational factors—affect all voluntary workplace behaviors and performance.

5. Proficiency refers to how well an employee responds to, copes with, and supports new circumstances and work patterns.

FALSE

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.

Level of Difficulty: 1 Easy

Topic: Behaviors

Feedback: Adaptability refers to how well an employee responds to, copes with, and supports new circumstances and work patterns.

6. An employee creates unnecessary conflicts with his coworkers at his workplace. This is an example of organizational citizenship behavior.

FALSE

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Apply
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Behaviors

Feedback: Organizational citizenship behaviors (OCBs) include various forms of cooperation and helpfulness to others that support the organization's social and psychological context. In this case, the employee is creating unnecessary conflicts with his coworkers. It is a counterproductive behavior.

7. Personality traits are more evident in situations where an individual's behavior is subject to social norms and reward systems.

FALSE

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 2 Medium
Topic: Behaviors

Feedback: People are sensitive to social norms, reward systems, and other external conditions. People vary their behavior to suit the situation, even if the behavior is at odds with their personality.

8. The "Big Five" personality dimensions represent five clusters that represent most personality traits.

TRUE

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Big Five Personality Dimensions

Feedback: The most widely respected clustering of personality traits is the five-factor model (FFM), also known as the "Big Five" personality dimensions.

9. Phoebe, a manager at a firm, was conventional, resistant to change, and unimaginative. This implies that Phoebe possessed openness to experience.

FALSE

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Apply
Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Behaviors

Feedback: Openness to experience refers to the extent to which people are imaginative, creative, unconventional, curious, nonconforming, autonomous, and aesthetically perceptive.

10. Values are stable, evaluative beliefs about what is important in a variety of situations.

TRUE

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-04 Summarize Schwartz's model of individual values and discuss the conditions where values influence behavior.
Level of Difficulty: 1 Easy
Topic: Values

Feedback: Values are stable, evaluative beliefs about what is important in a variety of situations.

11. People arrange values into a hierarchy of preferences called a value system.

TRUE

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-04 Summarize Schwartz's model of individual values and discuss the conditions where values influence behavior.

Level of Difficulty: 1 Easy
Topic: Values

Feedback: People arrange values into a hierarchy of preferences called a value system. Some individuals value new challenges more than they value conformity. Others value generosity more than frugality. Each person's unique value system is developed and reinforced through socialization.

12. Utilitarianism suggests that we should choose the option that provides the highest degree of satisfaction to those affected.

TRUE

AACSB: Ethics
AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-05 Describe three ethical principles and discuss three factors that influence ethical behavior.
Level of Difficulty: 2 Medium
Topic: Ethical Behavior

Feedback: Utilitarianism advises us to seek the greatest good for the greatest number of people. In other words, we should choose the option that provides the highest degree of satisfaction to those affected.

13. Distributive justice is sometimes known as a consequential principle because it focuses on the consequences of our actions, not on how we achieve those consequences.

FALSE

AACSB: Ethics
AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-05 Describe three ethical principles and discuss three factors that influence ethical behavior.
Level of Difficulty: 2 Medium
Topic: Ethical Behavior

Feedback: Utilitarianism is sometimes known as a consequential principle because it focuses on the consequences of our actions, not on how we achieve those consequences. Distributive justice suggests that people who are similar to one another should receive similar benefits and burdens; those who are dissimilar should receive different benefits and burdens in proportion to their dissimilarity.

14. One problem with applying the individual rights principle of ethical decision making is that one individual right may conflict with another.

TRUE

AACSB: Analytical Thinking
AACSB: Ethics
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-05 Describe three ethical principles and discuss three factors that influence ethical behavior.
Level of Difficulty: 2 Medium
Topic: Ethical Behavior

Feedback: One problem with individual rights is that certain individual rights may conflict with others.

15. Individualism and collectivism are mutually exclusive values found in certain countries and places.

FALSE

AACSB: Analytical Thinking
AACSB: Diversity
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-06 Describe five values commonly studied across cultures.
Level of Difficulty: 2 Medium
Topic: Individualism

Feedback: Contrary to popular belief, individualism is not the opposite of collectivism. In fact, an analysis of most previous studies reported that the two concepts are unrelated.

16. Which of the following directly influences an employee's voluntary behavior and performance?

- A.** role perceptions
- B. moral intensity
- C. corporate social responsibility
- D. uncertainty avoidance
- E. income

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.
Level of Difficulty: 1 Easy

Feedback: The four variables—motivation, ability, role perceptions, and situational factors—are critical influences on an individual's voluntary behavior and performance.

17. Which of the following identifies the four factors that directly influence individual behavior and performance?
- A. utilitarianism
 - B. MARS model**
 - C. Schwartz's model
 - D. Holland's model
 - E. Myers-Briggs Type Indicator

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.
Level of Difficulty: 1 Easy
Topic: Behaviors

Feedback: The four variables—motivation, ability, role perceptions, and situational factors—are represented by the acronym MARS. These factors directly influence individual behavior and performance.

18. Which of the following are external to the individual but still affect his/her behavior and performance?
- A. motivations
 - B. role perceptions
 - C. situational factors**
 - D. abilities
 - E. resolutions

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.
Level of Difficulty: 1 Easy
Topic: Behaviors

Feedback: Motivation, ability, and role perceptions are clustered together in the MARS model because they are located within the person. Situational factors are external to the individual but still affect his/her behavior and performance.

19. _____ represent(s) the forces within a person that affect the direction, intensity, and persistence of voluntary behavior.
- A. Motivation**
 - B. Personality
 - C. Values
 - D. Ethics
 - E. Ability

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.
Level of Difficulty: 1 Easy
Topic: Behaviors

Feedback: Motivation represents the forces within a person that affect the direction, intensity, and persistence of voluntary behavior.

20. Motivation affects a person's _____ of voluntary behavior.
- A. direction, intensity, and persistence**
 - B. antecedents, consequences, and reinforcers
 - C. size, shape, and weight
 - D. aptitudes, abilities, and competencies
 - E. agreeableness, locus of control, and ethical sensitivity

AACSB: Knowledge Application
Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 1 Easy

Topic: Behaviors

Feedback: Motivation represents the forces within a person that affect the direction, intensity, and persistence of voluntary behavior.

21. Which of the following refers to the fact that motivation is goal-directed, not random?

- A. persistence
- B. direction**
- C. intensity
- D. aptitude
- E. competencies

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 1 Easy

Topic: Behaviors

Feedback: With motivation, people have choices about where they put their effort; they have a sense of what they are trying to achieve and at what level of quality, quantity, and so forth. This shows that motivation is goal-directed, not random.

22. Which of the following best represents the amount of effort allocated to a particular goal?

- A. persistence
- B. direction
- C. intensity**
- D. aptitude
- E. competencies

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 1 Easy

Topic: Behaviors

Feedback: Intensity is the amount of effort allocated to a certain goal.

23. Which of the following refers to the natural talents that help employees learn specific tasks more quickly and perform them better?

- A. persistence levels
- B. direction
- C. intensity
- D. aptitude**
- E. commitment

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 1 Easy

Topic: Task Role

Feedback: Aptitudes are the natural talents that help employees learn specific tasks more quickly and perform them better.

24. Which of the following concepts consists of aptitudes, skills, and competencies?

- A. motivation
- B. personality
- C. values
- D. ethics
- E. ability**

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 1 Easy

Topic: Performing

Feedback: Ability includes aptitudes, skills, and competencies that lead to superior performance.

25. All technical employees at a paper mill take a course on how to operate a new paper-rolling machine. This course will improve job performance mainly by altering employees'

- A. aptitudes.
- B. role perceptions.
- C. motivation.
- D. organizational citizenship.
- E. learned capabilities.**

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Apply

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 2 Medium

Topic: Performing

Feedback: Learned capabilities are the skills and knowledge that you currently possess and knowledge you have acquired. This training would help the employees learn a certain capability.

26. Travel Happy Corporation gives simple accounts to newly hired employees, and then adds more challenging accounts as employees master the simple tasks. This practice mainly

- A. improves role perceptions.
- B. increases person-job matching.**
- C. reduces employee motivation.
- D. provides more resources to accomplish the assigned task.
- E. improves employee aptitudes.

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Apply

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 2 Medium

Topic: Performing

Feedback: A good person-job match produces higher performance; it also tends to increase the employee's well-being. One of the person-job matching strategies is to redesign the job so that employees are given only tasks that reflect their current learned capabilities. A complex task might be simplified—with some aspects of the work transferred to others—so that a new employee performs only those tasks that he/she is currently able to perform. As the employee becomes more competent at these tasks, other tasks are added back into the job.

27. You have just hired several new employees who are motivated, able to perform their jobs, and have adequate resources. However, they are not sure what tasks are included in their job. According to the MARS model, these new employees will likely

- A. emphasize the utilitarianism principle in their decision making.
- B. have lower job performance due to poor role perceptions.**
- C. have high job performance because they are motivated and able to perform the work.
- D. have above-average organizational citizenship.
- E. have a high degree of differentiation according to Holland's classification of occupations.

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Apply

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 2 Medium

Topic: Task Role

Feedback: Role perceptions are the extent to which a person accurately understands the job duties (roles) assigned to or expected of him/her.

28. Which of the following refers to a person's beliefs about what behaviors are appropriate or necessary in a particular situation?

- A. natural aptitudes
- B. role perceptions**
- C. competencies
- D. locus of control
- E. situational factors

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 2 Medium

Topic: Behaviors

Feedback: A form of role clarity involves understanding the preferred behaviors or procedures for accomplishing the assigned tasks.

29. To reduce the amount of non-recyclable waste that employees throw out each day, a major computer company removed containers for non-recyclable rubbish from each office and workstation. This altered employee behavior mainly by
- A. increasing employee motivation to be less wasteful.
 - B. helping employees to learn how to be less wasteful.
 - C. altering situational factors so that employees have more difficulty practicing wasteful behavior.**
 - D. increasing aptitudes that make employees less wasteful.
 - E. increasing organizational citizenship so that employees will be less wasteful.

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Apply

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 3 Hard

Topic: Behaviors

Topic: Situational Approach

Feedback: The situation mainly refers to conditions beyond the employee's immediate control that constrain or facilitate behavior and performance.

30. To help remember the three elements of motivation, consider a metaphor for
- A. flying a kite.
 - B. driving a car.**
 - C. rowing a boat.
 - D. skiing down a hill.
 - E. choosing a path at a fork in the road.

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Understand

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 2 Medium

Topic: Behaviors

Feedback: To help remember these three elements of motivation, consider the metaphor of driving a car in which the thrust of the engine is your effort. Direction refers to where you steer the car, intensity is how much you put your foot down on the gas pedal, and persistence is for how long you drive toward your destination.

31. When employees understand the priority of their various tasks and performance expectations, they have
- A. role clarity.**
 - B. role ambiguity.
 - C. role perception.
 - D. role responsibility.
 - E. role motivation.

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 2 Medium

Topic: Task Role

Feedback: Role clarity exists when employees understand the priority of their various tasks and performance expectations. This is illustrated in the classic dilemma of quantity versus quality, such as how many customers to serve in an hour (quantity) versus how well each customer should be served (quality). Role clarity in the form of task priorities also exists in the dilemma of allocating personal time and resources, such as how much time managers should devote to coaching employees versus meeting with customers.

32. _____ refers to goal-directed behaviors under the individual's control that support organizational objectives.
- A. Organizational citizenship
 - B. Counterproductive behavior
 - C. Task performance**
 - D. Maintaining attendance

E. Intensity

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Behaviors
Topic: Task Role

Feedback: Task performance refers to goal-directed behaviors under the individual's control that support organizational objectives.

33. Assisting coworkers with their work problems, adjusting work schedules to accommodate coworkers, and showing genuine courtesy toward coworkers are some of the forms of
- A. role perception.
 - B. counterproductive behavior.
 - C. task performance.
 - D. organizational citizenship.**
 - E. job matching.

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 2 Medium
Topic: Behaviors
Topic: Organizational Politics

Feedback: Organizational citizenship behaviors include various forms of cooperation and helpfulness to others that support the organization's social and psychological context.

34. Lawrence stole a clock from his workplace. Which of the following refers to Lawrence's activity?
- A. productive behavior
 - B. counterproductive behavior**
 - C. task performance
 - D. organizational citizenship behavior
 - E. job matching

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Apply
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 1 Easy

Feedback: Counterproductive work behaviors (CWBs) are voluntary behaviors that have the potential to directly or indirectly harm the organization. Some of the CWBs include harassing coworkers, creating unnecessary conflict, deviating from preferred work methods, being untruthful, stealing, sabotaging work, tardiness, and wasting resources.

35. Absenteeism is higher in organizations where there is(are)
- A. weak absence norms.
 - B. low workplace incivility.
 - C. high amounts of presenteeism.
 - D. meager sick leave benefits.
 - E. high work-related stress.**

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 2 Medium

Feedback: Employees who experience job dissatisfaction, workplace incivility, or work-related stress are more likely to be absent or late for work because taking time off is a way of temporarily withdrawing from those difficult conditions. Absenteeism is also higher in organizations with generous sick leave because this benefit minimizes the financial loss of taking time away from work. Another factor in absenteeism is the person's values and personality. Finally, studies report that absenteeism is higher in teams with strong absence norms, meaning that team members tolerate and even expect coworkers to take time off.

36. Presenteeism is exhibited in all the following ways *except*

- A. coming to work when ill.
- B. even when injured reporting to work.
- C. when the employee is preoccupied by personal problems.
- D.** when an absence would immediately affect many people.
- E. when an employee faces dangerous conditions to get to work.

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 2 Medium

Feedback: The positive consequences of absenteeism are apparent when employees engage in presenteeism—showing up for work even though they are unwell, injured, preoccupied by personal problems, or face dangerous conditions getting to work.

37. Which profession is most likely to report to work when ill?
- A. lawyer
 - B. teacher
 - C. administrative assistant
 - D. human resources director
 - E.** physician

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 2 Medium
Topic: Behaviors

Feedback: Most physicians urge sick patients to stay home, yet few take their own advice. Almost all (95 percent) of the physicians surveyed at Children’s Hospital of Pennsylvania agreed that working while sick puts patients at risk, yet 83 percent of them admitted working while sick within the past year. Similarly, 75 percent of New Zealand doctors working in hospitals say they went to work while unwell over the past year.

38. What is the organization's main source of competitive advantage?
- A. employee turnover
 - B.** human capital
 - C. relationships with coworkers
 - D. team development
 - E. external stakeholders

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 3 Hard
Topic: Competitive Environment

Feedback: Hiring qualified and productive staff is vital, but so is ensuring that they stay with the company. As we discussed in Chapter 1, human capital is arguably the organization’s main source of competitive advantage.

39. Harassing coworkers, creating unnecessary conflicts, and sabotaging work are all examples of
- A. organizational citizenship behaviors.
 - B. task performance measures.
 - C.** counterproductive work behaviors.
 - D. redundant behaviors.
 - E. illicit behaviors.

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 2 Medium
Topic: Ethical Behavior

Feedback: CWBs are voluntary behaviors that have the potential to directly or indirectly harm the organization or its stakeholders. This concept includes a wide array of behaviors, both intentional and unintentional, such as harassing coworkers, creating unnecessary conflict, deviating from preferred work methods (e.g., shortcuts that undermine work quality), being untruthful, stealing, sabotaging work, and wasting resources.

40. What are maintaining attendance, organizational citizenship, and counterproductive behavior all types of?

- A. task performance
- B. individual behavior**
- C. personal motivation
- D. role perceptions
- E. situational factors

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.
Level of Difficulty: 2 Medium
Topic: Behaviors

Feedback: There are many varieties of individual behavior, but most can be organized into the five categories described over the next few pages: task performance, organizational citizenship, counterproductive work behaviors, joining and staying with the organization, and maintaining work attendance.

41. _____ is the relatively stable pattern of behaviors and consistent internal states that explain a person's behavioral tendencies.

- A. Personality**
- B. Values
- C. Motivation
- D. Locus of control
- E. Job satisfaction

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Behaviors

Feedback: Personality is the relatively enduring pattern of thoughts, emotions, and behaviors that characterize a person, along with the psychological processes behind those characteristics.

42. An individual's personality

- A. changes several times throughout the year.
- B. is formed only from childhood socialization and the environment.
- C. is less evident in situations where social norms, reward systems, and other conditions constrain behavior.**
- D. does not provide an enduring pattern of processes.
- E. is more prominent when rewards for behavior are substantial.

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 2 Medium
Topic: Behaviors

Feedback: People are sensitive to social norms, reward systems, and other external conditions. People vary their behavior to suit the situation, even if the behavior is at odds with their personality.

43. Personality develops and changes mainly when people are young; it stabilizes by about age

- A. 15.
- B. 20.
- C. 30.**
- D. 35.
- E. 40.

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember
Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Behaviors

Feedback: Personality develops and changes mainly when people are young; it stabilizes by about 30 years of age.

44. The "Big Five" personality dimensions represent:
- A. all of the personality traits found in an ideal job applicant.
 - B.** the clusters representing most known personality traits.
 - C. the personality traits caused by the environment rather than heredity.
 - D. the necessary conditions for a person to have extraversion.
 - E. the characteristics of employees with low levels of motivation.

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Understand

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 2 Medium
Topic: Big Five Personality Dimensions

Feedback: The "Big Five" personality dimensions consist of five clusters of personality dimensions that describe personality traits of individuals.

45. Which of the following acronyms identifies the "Big Five" personality dimensions?
- A. MBTIA
 - B.** CANOE
 - C. VALUE
 - D. MARSE
 - E. SMART

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Big Five Personality Dimensions

Feedback: The "Big Five" personality dimensions are represented by the handy acronym CANOE, which includes conscientiousness, agreeableness, neuroticism, openness to experience, and extraversion.

46. Being good-natured, trusting, helpful, and tolerant are characteristics of people with which personality trait?
- A. openness to experience
 - B.** agreeableness
 - C. locus of control
 - D. emotional stability
 - E. extraversion

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Big Five Personality Dimensions

Feedback: Agreeableness is a personality dimension that includes the traits of being trusting, helpful, good-natured, considerate, tolerant, selfless, generous, and flexible.

47. Conscientiousness is a dimension of
- A. the MARS model.
 - B. Schwartz's values model.
 - C. Myers-Briggs Type Indicator.
 - D. Jungian personality theory.
 - E.** the five-factor model of personality.

AACSB: Knowledge Application
Accessibility: Keyboard Navigation
Blooms: Remember

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.
Level of Difficulty: 1 Easy
Topic: Big Five Personality Dimensions

Feedback: The five-factor model of personality includes conscientiousness, agreeableness, neuroticism, openness to experience, and extraversion.

48. Which of the following explicitly identifies neuroticism?

- A. MARS model
- B. Schwartz's Values Circumflex model
- C. the five-factor model of personality**
- D. Holland's theory of vocational choice
- E. Myers-Briggs Type Indicator

AACSB: Knowledge Application

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.

Level of Difficulty: 2 Medium

Topic: Big Five Personality Dimensions

Feedback: Neuroticism characterizes people with high levels of anxiety, hostility, depression, and self-consciousness. It is one of the dimensions of the five-factor model of personality.

49. Most employees in the social services section of a government department have frequent interaction with people who are unemployed or face personal problems. Which of the following personality characteristics is best suited to employees working in these jobs?

- A. high neuroticism
- B. external locus of control
- C. high introversion
- D. high agreeableness**
- E. low motivation

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Apply

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.

Level of Difficulty: 3 Hard

Topic: Big Five Personality Dimensions

Feedback: Agreeableness is a personality dimension that includes the traits of being trusting, helpful, good-natured, considerate, tolerant, selfless, generous, and flexible. An employee in the social service section should have agreeableness to work well.

50. Eric is the advertising head of a firm. He is extremely imaginative, creative, and curious. Which of the following personality dimensions does Eric possess?

- A. customary thinking
- B. openness to experience**
- C. resistance to change
- D. neuroticism
- E. cautiousness

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Apply

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.

Level of Difficulty: 2 Medium

Topic: Big Five Personality Dimensions

Feedback: Openness to experience refers to the extent to which people are imaginative, creative, unconventional, curious, nonconforming, autonomous, and aesthetically perceptive.

51. _____ characterizes people with high levels of anxiety, hostility, depression, and self-consciousness.

- A. Extraversion
- B. Openness to experience
- C. Conscientiousness
- D. Neuroticism**
- E. Agreeableness

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.

Level of Difficulty: 2 Medium

Topic: Big Five Personality Dimensions

Feedback: Agreeableness does not predict proficient or proactive task performance very well, mainly because it is associated with lower motivation to set goals and achieve results. However, agreeableness does predict an individual's performance as a team member as well as in customer service jobs. The reason is that employees with high agreeableness are motivated to be cooperative, sensitive, flexible, and supportive.

53. Which "Big Five" personality dimension is most valuable for predicting job performance?
- A. extraversion
 - B. openness to experience
 - C. conscientiousness**
 - D. neuroticism
 - E. agreeableness

AACSB: Analytical Thinking

Accessibility: Keyboard Navigation

Blooms: Remember

Learning Objective: 02-03 Describe personality and discuss how the "Big Five" personality dimensions and four MBTI types relate to individual behavior in organizations.

Level of Difficulty: 2 Medium

Topic: Big Five Personality Dimensions

Feedback: Conscientiousness stands out as the best overall personality predictor of proficient task performance for most jobs. The specific conscientiousness traits of industriousness (achievement, self-discipline, purposefulness) and dutifulness are the best predictors of proficient task performance. Conscientious employees set higher personal goals for themselves and are more persistent. They also engage in more organizational citizenship and in less counterproductive work behavior.

54. _____ characterizes people who are quiet, shy, and cautious.
- A. Introversion**
 - B. Openness to experience
 - C. Conscientiousness
 - D. Neuroticism
 - E. Agreeableness

92. Which of the following is a warning flag about cross-cultural knowledge?
- A. too many studies relying on small, convenient samples**
 - B. conclusions that generalize the cultures they represented
 - C. assumptions that each country has many cultures
 - D. reliance on a major study conducted almost five decades ago
 - E. knowledge of the degree of deep-level diversity across this country

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Understand
Learning Objective: 02-06 Describe five values commonly studied across cultures.
Level of Difficulty: 2 Medium
Topic: Culture

Feedback: Our knowledge of cross-cultural dynamics has blossomed, and many of these findings will be discussed throughout this book, particularly regarding leadership, conflict handling, and influence tactics. However, we also need to raise a few warning flags about cross-cultural knowledge. One problem is that too many studies have relied on small, convenient samples (such as students attending one university) to represent an entire culture. The result is that many cross-cultural studies draw conclusions that might not generalize to the cultures they intended to represent.

93. Why do Americans vary in their values and personalities across regions?
- A. The physical environment has a massive effect on individual traits and values.
 - B. National institutions have a greater influence on personal values.
 - C. Regional institutions have a greater influence on socialization practices and resulting personal values.**
 - D. Cultural tightness within each state explains similarities in personality and values across the country.
 - E. Americans have significantly lower individualism than European and Hispanic Americans.

AACSB: Analytical Thinking

Feedback: Employees require accurate role perceptions to perform their jobs well. Role perceptions are the extent to which people understand their job duties.

Scenario B

Electronika International is a fast-growing small company specializing in consumer electronics. Managers at Electronika International are exploring the idea of using the "Big Five" personality dimensions in hiring and improving work-related behaviors and job performance.

96. Electronika managers want to hire people who are dependable, goal-focused, thorough, and disciplined. Which of the following "Big Five" personality dimensions is desirable for individuals to be hired?

- A. openness to experience
- B. agreeableness
- C. conscientiousness**
- D. locus of control
- E. extraversion

Level of Difficulty: 2 Medium
Topic: Behaviors
Topic: Big Five Personality Dimensions

Feedback: Conscientiousness and emotional stability (low neuroticism) stand out as the personality traits that best predict individual performance in almost every job group.

Scenario C

International Manufacturing & Trading (IMT) is a medium-sized U.S. company rapidly expanding in the Asian and Far East markets. The company has decided to open a manufacturing plant in Japan, Taiwan, and Malaysia. IMT will send key top managers from the U.S. office and will hire the lower-level managers and employees from the local markets. IMT managers realize that there will be some cultural differences but are unsure of what and how much.

100. IMT managers should make themselves aware that people in Japan tend to have

- A. high individualism.
- B. high collectivism.
- C. medium power distance.**
- D. low achievement orientation.
- E. medium uncertainty distance.

Learning Objective: 02-06 Describe five values commonly studied across cultures.
Level of Difficulty: 1 Easy
Topic: Individualism

Feedback: U.S. managers tend to be more individualistic, low in nurturing, low in collectivism, a little above the middle of the range on achievement orientation, and have medium to low uncertainty avoidance.

103. The sales office of a large industrial products wholesale company has an increasing problem that salespeople are arriving late at the office each morning. Some sales reps go directly to visit clients rather than showing up at the office as required by company policy. Others arrive several minutes after their appointed start time. The vice president of sales does not want to introduce time clocks, but this may be necessary if the lateness problem is not corrected. Using the MARS model of individual behavior, diagnose the possible reasons why salespeople may be engaging in this "lateness" behavior.

The MARS model suggests that individual behavior and performance are a function of ability, motivation, role perceptions, and situational factors. With respect to lateness, all four of these factors may be relevant. Salespeople may be late for work because of incorrect role perceptions. Specifically, they might not know that they must show up at the office before visiting clients. Others may be late in the morning because they incorrectly believe they can do so after working late the previous day.

Lateness may also occur because sales reps are not motivated to attend work. Perhaps there are stressful conditions at work or the jobs are not interesting to the people in those jobs. Similarly, there might be a "lateness culture" in which other employees support those who show up late. A third factor may be situational factors. In the short term, some employees might be late due to road construction, conflicts with family responsibilities, distance of the location, and so forth. This is usually a short-run explanation, however, because employees should be able to adjust their schedule in the longer term. Ability is the least likely explanation for lateness. It would occur if an employee lacked the capacity to show up for work on time. Student answers will vary due to the nature of this question. The students should also discuss the possible solutions to these problems.

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.
Level of Difficulty: 2 Medium
Topic: Behaviors

104. Store #34 of CDA Hardware Associates has had below average sales over the past few years. As head of franchise operations, you are concerned with the continued low sales volume. The store manager wants you to diagnose the problem and recommend possible causes. Use the MARS model of individual behavior and performance to provide four different types of reasons why employees at Store #34 might be performing below average. Provide one example for each type of explanation.

Students should answer this question by describing the four causes of individual behavior and applying these causes to the situation.

Ability: It is possible that employees at Store #34 lack the necessary skills or knowledge to complete sales transactions effectively. For example, the store might have high turnover, so most employees lack the necessary experience. Alternatively, the store manager might have hired people who lack the necessary skills and knowledge.

Motivation: Store #34 employees might not be as motivated to serve customers and sell the product. For example, the store might have a different reward system, one that is not very effective at encouraging store sales. Alternatively, employees at this store might have different needs and therefore are not as motivated by the company's compensation system.

Role perceptions: Store #34 employees might have role perceptions that result in lower sales. For example, they might not realize that certain procedures or sales practices are less effective than those used at other stores. Alternatively, employees might not realize that their level of sales is below an acceptable level.

Situational factors: Employees at Store #34 might have lower performance due to unfavorable situational factors. For example, Store #34 might be located in an area with an economic recession. Alternatively, the store might have had difficulty receiving inventory from the company's warehouse, resulting in lack of sales.

Student answers will vary due to the nature of this question.

105. Employees in a company's warehouse are making several errors in inventory control and breaking items shipped. An analysis of the situation reveals that individual competencies are poorly matched with the job requirements. Describe three different strategies that would potentially improve this kind of person-job matching.

The three different strategies that would potentially improve this kind of person-job matching are:

Select qualified applicants: This involves measuring competencies of job applicants and selecting those whose competencies most closely align with the job requirements.

Provide training: Employees who lack certain skills and knowledge should receive training in those areas.

Redesign the job: This involves reassigning specific tasks to employees based on their current knowledge and skills. For example, if an employee is good at stocking inventory but lacks skills and knowledge to use the inventory control system, then this person might be assigned only the task of stocking inventory.

Topic: Behaviors

106. Identify and define the five types of individual behavior in the workplace.

The five types are: task performance, organizational citizenship, counterproductive behavior, joining/staying with the organization, and maintaining attendance.

- Task performance refers to goal-directed behaviors under the individual's control that support organizational objectives. It consists of proficiency, adaptability, and proactivity.
- Organizational citizenship includes various forms of cooperation and helpfulness to others that support the organization's social and psychological context.
- Counterproductive work behaviors are voluntary behaviors that have the potential to directly or indirectly harm the organization.
- Joining and staying with the organization reflects the organization's ability to hire and retain talent.
- Maintaining work attendance consists of absenteeism (missing work), tardiness (being late for work), and presenteeism (attending scheduled work when one's capacity to perform is significantly diminished by illness or other factors).

Learning Objective: 02-02 Summarize the five types of individual behavior in organizations.

Level of Difficulty: 2 Medium
Topic: Behaviors

107. An ongoing debate in organizational behavior is whether we should consider the personality traits of job applicants when selecting them into the organization. Take the view that personality traits should be considered in the selection process and provide arguments for your position.

Students should be evaluated in this question not only on factual knowledge from the text, but also their logic and persuasive argument skills. Factually, the text presents two arguments in favor of using personality testing in selection. First, some personality dimensions, particularly conscientiousness and internal locus of control, predict job performance in almost every job group. This suggests that if we can accurately measure people who have this trait, we can better determine whether they will perform their job well. Second, personality traits affect the types of jobs in which people are interested. In fact, vocational counselors use personality testing to determine vocational interests. Placing people in jobs that match their personalities would potentially reduce employee turnover and perhaps absenteeism. If employees are happier in their jobs as a result of better vocational fit, then the improved job satisfaction might also result in better performance and organizational citizenship behaviors.

Student answers will vary, though they should address these points in their answer.

108. Describe (and/or draw) and explain Schwartz's Values Circumplex model.

This model clusters 57 specific values into 10 broad values categories: universalism, benevolence, tradition, conformity, security, power, achievement, hedonism, stimulation, and self-direction. These 10 categories are further clustered into four quadrants. The first, openness to change, refers to the extent to which a person is motivated to pursue innovative ways. This quadrant includes the value categories of self-direction and hedonism. The opposing quadrant is conservation, which is the extent to which a person is motivated to preserve the status quo. The third quadrant is self-enhancement, which refers to how much a person is motivated by self-interest. The last quadrant, which is the opposite of self-enhancement, is self-transcendence, which refers to the motivation to promote the welfare of others and nature. The model is shown in Exhibit 2.5.

Level of Difficulty: 2 Medium
Topic: Values

109. The textbook states, "...there is often a 'disconnect' between personal values and individual behavior." What does this mean? What influences this disconnect?

This means that people may think that they act consistently with their hierarchy of values, but they don't always do so. One influence on the values-behavior link is the situation. Work environments influence our behavior, at least in the short term, so they necessarily encourage or discourage values-consistent behavior. This sometimes occurs without our awareness, but more often we blame the situation for preventing us from applying our values. Another factor is that we are more likely to apply values when we actively think about them and understand their relevance to the situation. Some situations easily trigger awareness of our values. However, values are abstract concepts, so their relevance to specific situations is not obvious much of the time. We literally need to be reminded of our dominant personal values in these situations to ensure that we apply those values.

110. Explain the three distinct types of ethical principles.

The three distinct types of ethical principles are: utilitarianism, individual rights, and distributive justice.

Utilitarianism: This principle advises us to seek the greatest good for the greatest number of people. In other words, we should choose the option that provides the highest degree of satisfaction to those affected. This is sometimes known as a consequential principle, because it focuses on the consequences of our actions, not on how we achieve those consequences. One problem with utilitarianism is that it is almost impossible to evaluate the benefits or costs of many decisions, particularly when many stakeholders have wide-ranging needs and values.

Individual rights: This principle reflects the belief that everyone has entitlements that let him/her act in a certain way. Some of the most widely cited rights are freedom of movement, physical security, freedom of speech, fair trial, and freedom from torture. The individual rights principle includes more than legal rights; it also includes human rights that everyone is granted as a moral norm of society.

Distributive justice: This principle suggests that people who are similar to one another should receive similar benefits and burdens; those who are dissimilar should receive different benefits and burdens in proportion to their dissimilarity. A variation of the distributive justice principle says that inequalities are acceptable when they benefit the least well off in society. Thus, employees in risky jobs should be paid more if their work benefits others who are less well off. One problem with the distributive justice principle is that it is difficult to agree on who is "similar" and what factors are "relevant."

 Topic: Ethical Behavior

111. Several international sales representatives in your organization have faced the murky question of paying foreign government officials under the table in order to do business in other countries. Describe three strategies that the organization should consider to resolve these and other ethical dilemmas for foreign sales representatives.

First, the company should develop and make its salespeople aware of a written ethical code of conduct. This code may help employees resolve some of the decision-making dilemmas they face. Second, the value of the ethics code would increase if sales representatives received training on ethical conduct. These seminars help employees work through ethical dilemmas by applying the corporate code of ethical conduct. The long-term objective is to help participants internalize these standards so that ethical considerations are addressed almost intuitively. Third, the organization should develop an ethics committee consisting of senior management, sales representatives, and/or board of directors to discuss and resolve ethical dilemmas that are presented to them, as well as dilemmas that foreign salespeople might face in the future. The conclusions of this committee should be communicated clearly to all employees. Finally, the foreign sales representatives' ethical behavior should be linked to the reward system. This might be a difficult task, but the perceived link would maintain consistency with the company's interest in ethical decision making.

112. What have we learned from research about differences in values across cultures? What warning flags do we need to pay attention to?

While our knowledge of cross-cultural dynamics has blossomed due to research in the past two decades, there are three issues we need to be aware of. One is that many research studies have relied on small, convenient samples, and these studies may draw conclusions that might not generalize to the cultures they represent. Second is that cross-cultural studies often assume that each country has one culture, while in reality many countries are culturally diverse. A third concern is that cross-cultural research and writing continues to rely on a major study conducted almost 40 years ago, the findings of which may have become out of date as values in some cultures have shifted over the years.
