## CHAPTER 2-DESCRIPTIVE STATISTICS: TABULAR AND GRAPHICAL DISPLAYS

## MULTIPLE CHOICE

1. A frequency distribution is a tabular summary of data showing the
a. fraction of items in several classes
b. percentage of items in several classes
c. relative percentage of items in several classes
d. number of items in several classes
ANS: D
PTS: 1
TOP: Descriptive Statistics
2. A frequency distribution is
a. a tabular summary of a set of data showing the relative frequency
b. a graphical form of representing data
c. a tabular summary of a set of data showing the frequency of items in each of several nonoverlapping classes
d. a graphical device for presenting categorical data
ANS: C
PTS: 1
TOP: Descriptive Statistics
3. A tabular summary of a set of data showing the fraction of the total number of items in several classes is a
a. frequency distribution
b. relative frequency distribution
c. frequency
d. cumulative frequency distribution
ANS: B
PTS: 1
TOP: Descriptive Statistics
4. The relative frequency of a class is computed by
a. dividing the midpoint of the class by the sample size
b. dividing the frequency of the class by the midpoint
c. dividing the sample size by the frequency of the class
d. dividing the frequency of the class by the sample size

ANS: D PTS: 1 TOP: Descriptive Statistics
5. The percent frequency of a class is computed by
a. multiplying the relative frequency by 10
b. dividing the relative frequency by 100
c. multiplying the relative frequency by 100
d. adding 100 to the relative frequency

ANS: C PTS: 1 TOP: Descriptive Statistics
6. The sum of frequencies for all classes will always equal
a. 1
b. the number of elements in a data set
c. the number of classes
d. a value between 0 and 1
ANS: B
PTS: 1
TOP: Descriptive Statistics
7. Fifteen percent of the students in a school of Business Administration are majoring in Economics, $20 \%$ in Finance, $35 \%$ in Management, and $30 \%$ in Accounting. The graphical device(s) which can be used to present these data is (are)
a. a line chart
b. only a bar chart
c. only a pie chart
d. both a bar chart and a pie chart
ANS: D
PTS: 1
TOP: Descriptive Statistics
8. A researcher is gathering data from four geographical areas designated: South $=1 ;$ North $=2$; East $=$ 3 ; West $=4$. The designated geographical regions represent
a. categorical data
b. quantitative data
c. label data
d. either quantitative or categorical data
ANS: A
PTS: 1
TOP: Descriptive Statistics
9. Categorical data can be graphically represented by using a(n)
a. histogram
b. frequency polygon
c. ogive
d. bar chart
ANS: D
PTS: 1
TOP: Descriptive Statistics
10. A cumulative relative frequency distribution shows
a. the proportion of data items with values less than or equal to the upper limit of each class
b. the proportion of data items with values less than or equal to the lower limit of each class
c. the percentage of data items with values less than or equal to the upper limit of each class
d. the percentage of data items with values less than or equal to the lower limit of each class
ANS: A
PTS: 1
TOP: Descriptive Statistics
11. If several frequency distributions are constructed from the same data set, the distribution with the widest class width will have the
a. fewest classes
b. most classes
c. same number of classes as the other distributions since all are constructed from the same data
ANS: A
PTS: 1
TOP: Descriptive Statistics
12. The sum of the relative frequencies for all classes will always equal
a. the sample size
b. the number of classes
c. one
d. any value larger than one
ANS: C
PTS: 1
TOP: Descriptive Statistics
13. The sum of the percent frequencies for all classes will always equal
a. one
b. the number of classes
c. the number of items in the study
d. 100
ANS: D
PTS: 1
TOP: Descriptive Statistics
14. The most common graphical presentation of quantitative data is a
a. histogram
b. bar chart
c. relative frequency
d. pie chart
ANS: A
PTS: 1
TOP: Descriptive Statistics
15. The total number of data items with a value less than the upper limit for the class is given by the
a. frequency distribution
b. relative frequency distribution
c. cumulative frequency distribution
d. cumulative relative frequency distribution
ANS: C
PTS: 1
TOP: Descriptive Statistics
16. The relative frequency of a class is computed by
a. dividing the cumulative frequency of the class by $n$
b. dividing $n$ by cumulative frequency of the class
c. dividing the frequency of the class by $n$
d. dividing the frequency of the class by the number of classes
ANS: C
PTS: 1
TOP: Descriptive Statistics
17. In constructing a frequency distribution, the approximate class width is computed as
a. (largest data value - smallest data value)/number of classes
b. (largest data value - smallest data value)/sample size
c. (smallest data value - largest data value)/sample size
d. largest data value/number of classes
ANS: A
PTS: 1
TOP: Descriptive Statistics
18. In constructing a frequency distribution, as the number of classes are decreased, the class width
a. decreases
b. remains unchanged
c. increases
d. can increase or decrease depending on the data values
ANS: C
PTS: 1
TOP: Descriptive Statistics
19. The difference between the lower class limits of adjacent classes provides the
a. number of classes
b. class limits
c. class midpoint
d. class width
ANS: D
PTS: 1
TOP: Descriptive Statistics
20. In a cumulative frequency distribution, the last class will always have a cumulative frequency equal to
a. one
b. $100 \%$
c. the total number of elements in the data set
d. None of these alternatives is correct.
ANS: C
PTS: 1
TOP: Descriptive Statistics
21. In a cumulative relative frequency distribution, the last class will have a cumulative relative frequency equal to
a. one
b. zero
c. the total number of elements in the data set
d. None of these alternatives is correct.
ANS: A
PTS: 1
TOP: Descriptive Statistics
22. In a cumulative percent frequency distribution, the last class will have a cumulative percent frequency equal to
a. one
b. 100
c. the total number of elements in the data set
d. None of these alternatives is correct.
ANS: B
PTS: 1
TOP: Descriptive Statistics
23. Data that provide labels or names for categories of like items are known as
a. categorical data
b. quantitative data
c. label data
d. category data
ANS: A
PTS: 1
TOP: Descriptive Statistics
24. A tabular method that can be used to summarize the data on two variables simultaneously is called
a. simultaneous equations
b. crosstabulation
c. a histogram
d. an ogive
ANS: B
PTS: 1
TOP: Descriptive Statistics
25. A graphical presentation of the relationship between two variables is
a. an ogive
b. a histogram
c. either an ogive or a histogram, depending on the type of data
d. a scatter diagram
ANS: D
PTS: 1
TOP: Descriptive Statistics
26. A histogram is said to be skewed to the left if it has a
a. longer tail to the right
b. shorter tail to the right
c. shorter tail to the left
d. longer tail to the left
ANS: D
PTS: 1
TOP: Descriptive Statistics
27. When a histogram has a longer tail to the right, it is said to be
a. symmetrical
b. skewed to the left
c. skewed to the right
d. none of these alternatives is correct

ANS: C PTS: 1 TOP: Descriptive Statistics
28. In a scatter diagram, a line that provides an approximation of the relationship between the variables is known as
a. approximation line
b. trend line
c. line of zero intercept
d. line of zero slope
ANS: B
PTS: 1
TOP: Descriptive Statistics
29. A histogram is
a. a graphical presentation of a frequency or relative frequency distribution
b. a graphical method of presenting a cumulative frequency or a cumulative relative frequency distribution
c. the history of data elements
d. the same as a pie chart
ANS: A
PTS: 1
TOP: Descriptive Statistics
30. A situation in which conclusions based upon aggregated crosstabulation are different from unaggregated crosstabulation is known as
a. wrong crosstabulation
b. Simpson's rule
c. Simpson's paradox
d. aggregated crosstabulation
ANS: C
PTS: 1
TOP: Descriptive Statistics
31. Which of the following is a graphical summary of a set of data in which each data value is represented by a dot above the axis?
a. histogram
b. box plot
c. dot plot
d. crosstabulation
ANS: C
PTS: 1
TOP: Descriptive Statistics
32. An Ogive is constructed by plotting a point corresponding to the $\qquad$ frequency of each class.
a. relative
b. cumulative
c. percent
d. octave
ANS: B
PTS: 1
TOP: Descriptive Statistics
33. The ___ can be used to show the rank order and shape of a data set simultaneously.
a. ogive
b. pie chart
c. stem-and-leaf display
d. bar chart

ANS: C PTS: 1 TOP: Descriptive Statistics
34. Which of the following graphical methods shows the relationship between two variables?
a. pie chart
b. ogive
c. crosstabulation
d. dot plot
ANS: C
PTS: 1
TOP: Descriptive Statistics
35. The reversal of conclusions based on aggregate and unaggregated data is called:
a. Simpson's paradox
b. Trim's paradox
c. Poisson dilemma
d. Simon's paradox
ANS: A
PTS: 1
TOP: Descriptive Statistics

## Exhibit 2-1

A sample of 15 children shows their favorite restaurants:

| McDonalds | Luppi's | Mellow Mushroom |
| :---: | :---: | :---: |
| Friday's | McDonalds | McDonalds |
| Pizza Hut | Taco Bell | McDonalds |
| Mellow Mushroom | Luppi's | Pizza Hut |
| McDonalds | Friday's | McDonalds |

36. Refer to Exhibit 2-1. Which of the following is the correct frequency distribution?
a. McDonalds 4, Friday's 3, Pizza Hut 1, Mellow Mushroom 4, Luppi's 3, Taco Bell 1
b. McDonalds 6, Friday's 2, Pizza Hut 2, Mellow Mushroom 2, Luppi’s 2, Taco Bell 1
c. McDonalds 6, Friday's 1, Pizza Hut 3, Mellow Mushroom 1, Luppi's 2, Taco Bell 2
d. None of these alternatives is correct.

ANS: B PTS: 1 TOP: Descriptive Statistics
37. Refer to Exhibit 2-1. Which of the following is the correct relative frequency for McDonalds?
a. 0.27
b. 0.5
c. 0.4
d. 6
ANS: C
PTS: 1
TOP: Descriptive Statistics
38. Refer to Exhibit 2-1. Which of the following is the correct percent frequency for McDonalds?
a. $10 \%$
b. $27 \%$
c. $2 \%$
d. $40 \%$

ANS: D
PTS: 1
TOP: Descriptive Statistics
Exhibit 2-2
The numbers of hours worked (per week) by 400 statistics students are shown below.

Number of hours
0-9

## Frequency

20

| $10-19$ | 80 |
| ---: | ---: |
| $20-29$ | 200 |
| $30-39$ | 100 |

39. Refer to Exhibit 2-2. The class width for this distribution
a. is 9
b. is 10
c. is 39 , which is: the largest value minus the smallest value or $39-0=39$
d. varies from class to class
ANS: B
PTS: 1
TOP: Descriptive Statistics
40. Refer to Exhibit 2-2. The number of students working 19 hours or less
a. is 80
b. is 100
c. is 180
d. is 300
ANS: B
PTS: 1
TOP: Descriptive Statistics
41. Refer to Exhibit 2-2. The relative frequency of students working 9 hours or less
a. is 20
b. is 100
c. is 0.95
d. 0.05
ANS: D
PTS: 1
TOP: Descriptive Statistics
42. Refer to Exhibit 2-2. The percentage of students working 19 hours or less is
a. $20 \%$
b. $25 \%$
c. $75 \%$
d. $80 \%$

ANS: B PTS: 1 TOP: Descriptive Statistics
43. Refer to Exhibit 2-2. The cumulative relative frequency for the class of 20-29
a. is 300
b. is 0.25
c. is 0.75
d. is 0.5
ANS: C PTS: 1 TOP: Descriptive Statistics
44. Refer to Exhibit 2-2. The cumulative percent frequency for the class of $30-39$ is
a. $100 \%$
b. $75 \%$
c. $50 \%$
d. $25 \%$
ANS: A
PTS: 1
TOP: Descriptive Statistics
45. Refer to Exhibit 2-2. The cumulative frequency for the class of 20-29
a. is 200
b. is 300
c. is 0.75
d. is 0.5
ANS: B
PTS: 1
TOP: Descriptive Statistics
46. Refer to Exhibit 2-2. If a cumulative frequency distribution is developed for the above data, the last class will have a cumulative frequency of
a. 100
b. 1
c. $30-39$
d. 400
ANS: D
PTS: 1
TOP: Descriptive Statistics
47. Refer to Exhibit 2-2. The percentage of students who work at least 10 hours per week is
a. $50 \%$
b. $5 \%$
c. $95 \%$
d. $100 \%$
ANS: C
PTS: 1
TOP: Descriptive Statistics
48. Refer to Exhibit 2-2. The number of students who work 19 hours or less is
a. 80
b. 100
c. 200
d. 400
ANS: B
PTS: 1
TOP: Descriptive Statistics
49. Refer to Exhibit 2-2. The midpoint of the last class is
a. 50
b. 34
c. 35
d. 34.5
ANS: D
PTS: 1
TOP: Descriptive Statistics

## Exhibit 2-3

A survey of 800 college seniors resulted in the following crosstabulation regarding their undergraduate major and whether or not they plan to go to graduate school.

|  | Undergraduate Major |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| Graduate School | Business | Engineering | Others | Total |
| Yes | 70 | 84 | 126 | 280 |
| No | 182 | 208 | 130 | 520 |
| Total | 252 | 292 | 256 | 800 |

50. Refer to Exhibit 2-3. What percentage of the students does not plan to go to graduate school?
a. 280
b. 520
c. 65
d. 32
ANS: C
PTS: 1
TOP: Descriptive Statistics
51. Refer to Exhibit 2-3. What percentage of the students' undergraduate major is engineering?
a. 292
b. 520
c. 65
d. 36.5

ANS: D PTS: 1 TOP: Descriptive Statistics
52. Refer to Exhibit 2-3. Of those students who are majoring in business, what percentage plans to go to graduate school?
a. $\quad 27.78$
b. 8.75
c. 70
d. 72.22
ANS: A
PTS: 1
TOP: Descriptive Statistics
53. Refer to Exhibit 2-3. Among the students who plan to go to graduate school, what percentage indicated "Other" majors?
a. $\quad 15.75$
b. 45
c. 54
d. 35
ANS: B
PTS: 1
TOP: Descriptive Statistics

## Exhibit 2-4

Michael's Compute-All, a national computer retailer, has kept a record of the number of laptop computers they have sold for a period of 80 days. Their sales records are shown below:

## Number of Laptops Sold

Number of Days

$$
0-19
$$

20-39

$$
40-59
$$

60-79
80-99

|  | Number of Days |  |

## PROBLEM

1. Thirty students in the School of Business were asked what their majors were. The following represents their responses ( $\mathrm{M}=$ Management; $\mathrm{A}=$ Accounting; $\mathrm{E}=$ Economics; $\mathrm{O}=\mathrm{Others}$ ).

| A | M | M | A | M | M | E | M | O | A |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| E | E | M | A | O | E | M | A | M | A |
| M | A | O | A | M | E | E | M | A | M |

a. Construct a frequency distribution and a bar chart.
b. Construct a relative frequency distribution and a pie chart.

ANS:
(a)
(b)

## Relative

| Major | Frequency | Frequency |
| :--- | :---: | :---: |
| M | 12 | 0.4 |
| A | 9 | 0.3 |
| E | 6 | 0.2 |
| O | $\underline{3}$ | $0 . \underline{1}$ |
|  | 30 | 1.0 |

PTS: 1
TOP: Descriptive Statistics
2. Twenty employees of the Ahmadi Corporation were asked if they liked or disliked the new district manager. Below you are given their responses. Let L represent liked and D represent disliked.

| L | L | D | L | D |
| :--- | :--- | :--- | :--- | :--- |
| D | D | L | L | D |
| D | L | D | D | L |
| D | D | L | D | L |

a. Construct a frequency distribution and a bar chart.
b. Construct a relative frequency distribution and a pie chart.

ANS:
$a$ and $b$

| Preferences | Frequency | Relative <br> Frequency |
| :--- | :---: | :---: |
| L | 9 | 0.45 |
| D | $\underline{11}$ | $\underline{0.55}$ |
| Total | 20 | 1.00 |

PTS: 1 TOP: Descriptive Statistics
3. Forty shoppers were asked if they preferred the weight of a can of soup to be 6 ounces, 8 ounces, or 10 ounces. Below you are given their responses.

| 6 | 6 | 6 | 10 | 8 | 8 | 8 | 10 | 6 | 6 |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 10 | 10 | 8 | 8 | 6 | 6 | 6 | 8 | 6 | 6 |
| 8 | 8 | 8 | 10 | 8 | 8 | 6 | 10 | 8 | 6 |
| 6 | 8 | 8 | 8 | 10 | 10 | 8 | 10 | 8 | 6 |

a. Construct a frequency distribution and graphically represent the frequency distribution.
b. Construct a relative frequency distribution and graphically represent the relative frequency distribution.

ANS:
$a$ and $b$

| Preferences | Frequency | Relative <br> Frequency |
| :--- | :---: | :---: |
| 6 ounces | 14 | 0.350 |
| 8 ounces | 17 | 0.425 |
| 10 ounces | $\underline{9}$ | $\underline{0.225}$ |
| Total | 40 | 1.000 |

PTS: 1
TOP: Descriptive Statistics
4. A student has completed 20 courses in the School of Arts and Sciences. Her grades in the 20 courses are shown below.

| A | B | A | B | C |
| :--- | :--- | :--- | :--- | :--- |
| C | C | B | B | B |
| B | A | B | B | B |
| C | B | C | B | A |

a. Develop a frequency distribution and a bar chart for her grades.
b. Develop a relative frequency distribution for her grades and construct a pie chart.

ANS:
$a$ and $b$

| Grade | Frequency | Relative <br> Frequency |
| :--- | :---: | :---: |
| A | 4 | 0.20 |
| B | 11 | 0.55 |
| C | $\underline{5}$ | $\underline{0.25}$ |
| Total | 20 | 1.00 |

PTS: 1
TOP: Descriptive Statistics
5. A sample of 50 TV viewers were asked, "Should TV sponsors pull their sponsorship from programs that draw numerous viewer complaints?" Below are the results of the survey. ( $\mathrm{Y}=\mathrm{Yes} ; \mathrm{N}=\mathrm{No} ; \mathrm{W}=$ Without Opinion)

| N | W | N | N | Y | N | N | N | Y | N |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| N | Y | N | N | N | N | N | Y | N | N |

14. The ACT scores of a sample of business school students and their genders are shown below.

|  | ACT Scores |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| Gender | Less than 20 | $\mathbf{2 0}$ up to 25 | $\mathbf{2 5}$ and more | Total |
| Female | 24 | 168 | 48 | 240 |
| Male | 40 | 96 | 24 | 160 |
| Total | 64 | 264 | 72 | 400 |

a. How many students scored less than 20?
b. How many students were female?
c. Of the male students, how many scored 25 or more?
d. Compute row percentages and comment on any relationship that may exist between ACT scores and gender of the individuals.
e. Compute column percentages.

ANS:
a. 64
b. 240
c. 24
d.

| Gender | Less than 20 | AC <br> up to 25 | $\mathbf{2 5}$ and more | Total |
| :--- | :---: | :---: | :---: | :---: |
| Female | $10 \%$ | $70 \%$ | $20 \%$ | $100 \%$ |
| Male | $25 \%$ | $60 \%$ | $15 \%$ | $100 \%$ |

From the above percentages it can be noted that the largest percentages of both genders' ACT scores are in the 20 to 25 range. However, $70 \%$ of females and only $60 \%$ of males have ACT scores in this range. Also it can be noted that $10 \%$ of females' ACT scores are under 20, whereas, $25 \%$ of males' ACT scores fall in this category.
e.

## SAT Scores

| Gender | Less than 20 | 20 up to 25 | 25 and more |
| :--- | :---: | :---: | :---: |
| Female | $37.5 \%$ | $63.6 \%$ | $66.7 \%$ |
| Male | $62.5 \%$ | $36.4 \%$ | $33.3 \%$ |
| Total | $100 \%$ | $100 \%$ | $100 \%$ |

PTS: 1 TOP: Descriptive Statistics
22. A survey of 400 college seniors resulted in the following crosstabulation regarding their undergraduate major and whether or not they plan to go to graduate school.

Undergraduate Major

| Graduate School | Business | Engineering <br> Yes | Others | Total |
| :--- | :---: | :---: | :---: | :---: |
| No | 95 | 63 | 140 |  |
| Total | 91 | 104 | 65 | 260 |
|  | 146 | 128 | 400 |  |

a. Are a majority of the seniors in the survey planning to attend graduate school?
b. Which discipline constitutes the majority of the individuals in the survey?
c. Compute row percentages and comment on the relationship between the students' undergraduate major and their intention of attending graduate school.
d. Compute the column percentages and comment on the relationship between the students' intention of going to graduate school and their undergraduate major.

ANS:
a. No, majority (260) will not attend graduate school
b. Majority (146) are engineering majors
c.

Undergraduate Major

| Graduate School | Business | Engineering | Others | Total |
| :--- | :---: | :---: | :---: | :---: |
| Yes | $25 \%$ | $30 \%$ | $45 \%$ | $100 \%$ |
| No | $35 \%$ | $40 \%$ | $25 \%$ | $100 \%$ |

Majority who plan to go to graduate school are from "Other" majors. Majority of those who will not go to graduate school are engineering majors.
d.

|  | Undergraduate Major |  |  |
| :--- | :---: | :---: | :---: |
| Graduate School | Business | Engineering | Others |
| Yes | $27.8 \%$ | $28.8 \%$ | $49.2 \%$ |
| No | $72.2 \%$ | $71.2 \%$ | $50.8 \%$ |
| Total | $100 \%$ | $100 \%$ | $100 \%$ |

Approximately the same percentages of Business and engineering majors plan to attend graduate school ( $27.8 \%$ and $28.8 \%$ respectively). Of the "Other" majors approximately half ( $49.2 \%$ ) plan to go to graduate school.
